

ESD Gloves

Gloves are worn to prevent components and assemblies becoming contaminated (assembly gloves) or to protect the operator's hands (handling gloves). In an EPA, the gloves should be conductive or static dissipative.

Handling gloves

- Knitted nylon with conductive yarn
- RV >106 <109ohm
- Washable in warm soapy water. Do not use bleach.
- Coated palm improves grip

N.B: Items in **bold** are stock items!

	CODE	UNIT
Plain - small	JG01S	pair
Plain - medium	JG01M	pair
Plain - large	JG01L	pair
Coated palm - small	JG03S	pair
Coated palm - medium	JG03M	pair
Coated palm - large	JG03L	pair

Assembly gloves

- Knitted polyester with 7% conductive yarn
- 5mm between each conductive yarn
- Carefully made tips to maintain tactile feel
- PU coated palm improves grip
- Suitable for use in clean rooms

N.B: Items in **bold** are stock items!

	CODE	UNIT
Plain - medium	JG11M	pair
Coated palm - medium	JG12M	pair
Coated palm - large	JG12L	pair
