**Supreme-series Diagonal cutters Tapered head, 7190, 7191**

These cutters are made from high performance ball bearing steel, polished. Numerically controlled machine grinding guarantees edge angle accuracy and contact which increases the tools reliability and consistency. Precision induction hardened edges 63-65 HRC. Handles in synthetic material and come with return spring. The cutting capacity that is given is for copper wire!  
"CO" standard handle shape in conductive material.  
"DS" slip-on handle in dissipative material.
