NEW CONCEPT CRIMPING TOOLS

TS-05950
STEEL

3

TA-05950
ALLOY

TM-05950
STAINLESS

When stripping is
required the crimping
dies must be of our
design.

**EXCLUSIVE TO "3 IN 1" RANGE
CUT, STRIP AND CRIMP USING THE
SAME TOOL**

Lightweight alloys to aircraft and space specifications are used in their production, reinforced by stainless steel hardened liners wherever necessary to strengthen their construction and ensure their long life with lasting precision.

High grade stainless is used throughout the construction of tools designated for use in very corrosive condition.

Their crimping dies are precision machined from stainless steel or H/D alloys.

Conventional designs are made from high grade carbon steel, hardened to ensure long term quality.

Our designs of frames accommodate standard crimping dies presently available internationally.

UK Patent Application NO. 0418208.5 & 0418209.3
