High Performance Push-Pull Connector and Cable Assembly Solutions

For more than 50 years, Fischer Connectors has designed, manufactured, and distributed high performance push-pull connector and cable assembly solutions. Known for their quality and ruggedness, our products prove to be reliable in the most demanding environments.

Fischer Connectors is committed to working closely with its customers to equip their application with the most appropriate connector and cable system. Our product range comprises over 10,000 standard items and we are always prepared to develop customized solutions for specific requests.

Primary design and manufacturing facilities are in Switzerland, with subsidiaries and distributors located worldwide.

Core Competencies

- High performance push-pull connectors
- Complete cable assembly solutions
- Rugged solutions for demanding environments
- Sealed and hermetic connector solutions
- Lightweight and compact connectors
- High flexibility of product configurations
- Standard solutions or customized product development
- World-class customer service
- Specialized advice and support
- High quality industrial processes
- Trusted by high-end industries
- Certified ISO 9001 and ISO 14001

RoHS compliant

www.fischerconnectors.com

Complete Customer Solutions

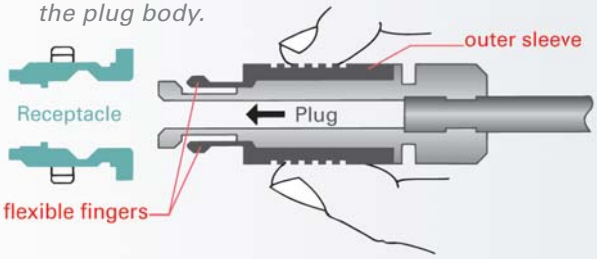
- **Leading edge connector technology**
  innovative and high performance products
- **Cable assembly service**
  standard or custom cabling and cable design assistance
- **Standard or customized solutions**
  > 10,000 standard items or custom developments
- **Specialized technical and sales support**
  assistance through advice, design, prototype and assembly
- **Worldwide network**
  close to our customers to offer unequaled service

Original Push-Pull Locking System

- **Original push-pull locking system**
  widely adopted by the industry
- **Unparalleled signal integrity**
  fully secured against accidental disconnection
- **Self-locking mechanism**
  designed for frequent connect/disconnect operations
- **Ideal for compact product designs**
  locking system integrated into connector housing
- **Push-pull locking system delivered as standard**
  non-locking or emergency quick release solutions also available

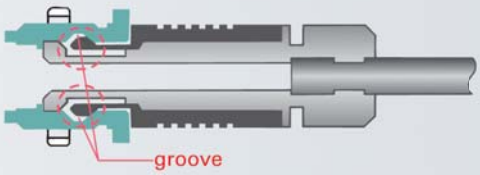
How Does it Work ?

The plug has an outer sleeve, with flexible fingers, which slides forward and backwards along the plug body.



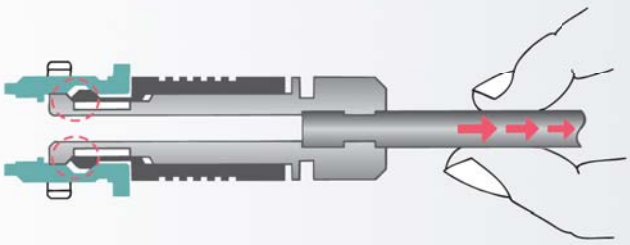
When Mated

The bevelled edges are firmly captured by a locking groove located inside the receptacle.



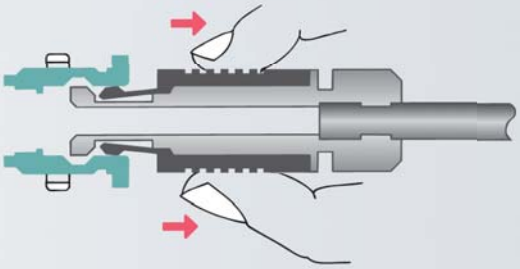
When Cable Pulled

The bevelled edges of the fingers are forced into the groove, securing the connection.



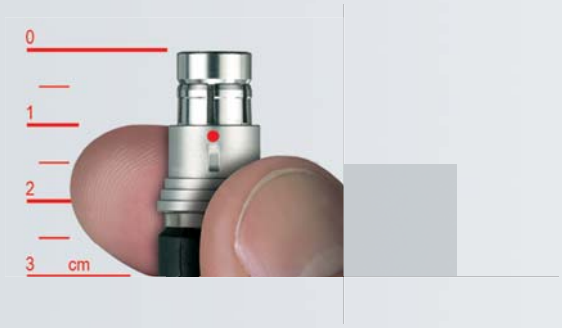
When Unplugging

Pulling on the outer sleeve of the plug unlocks the latching mechanism.



Designed for Easy Connect/ Disconnect Operations

- **Easy mating, can be blind-mated**
  guiding mechanism ensures precise alignment
- **Increased safety and user friendliness**
  mechanical and color coding prevent misconnection
- **Convenient grip even with gloves**
  circular connectors with ribbed housing profile
- **Increased equipment life span**
  guiding mechanism optimally protects the contacts

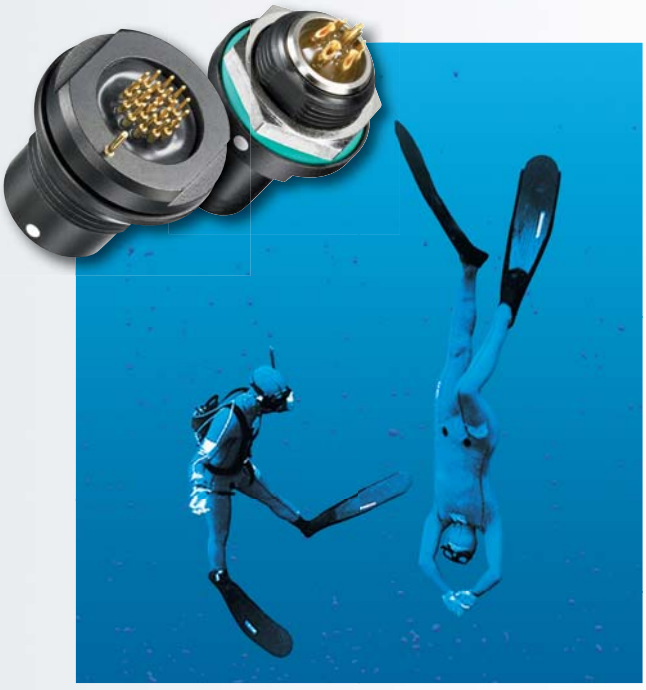


Proven Rugged, Lightweight and Compact Solutions

- **Robust and shock resistant designs**
  ideal for equipment used in the field
- **Compact and lightweight construction**
  ideal for miniature and portable devices
- **High pin density and hybrid contacts**
  contributing to equipment miniaturization
- **Long product durability**
  10,000 mating cycles guaranteed

Operational in Demanding and Harsh Environments

- **High performance connectors**
  designed and tested to withstand extreme conditions
- **Sealed up to IP68 and corrosion resistant**
  usable underwater
- **Hermetic**
  for use in vacuum or pressurized environments
- **Sterilizable**
  ideal for medical applications
- **360° EMC shielded**
  preventing electromagnetic interferences
- **Functional in a wide temperature range**
  from -65°C to +200°C



Medical

- Diagnostic devices
- Surgical instrumentation
- Therapy applications
- Medical imaging
- Cardiac assist devices
- Disposable equipment

Instrumentation

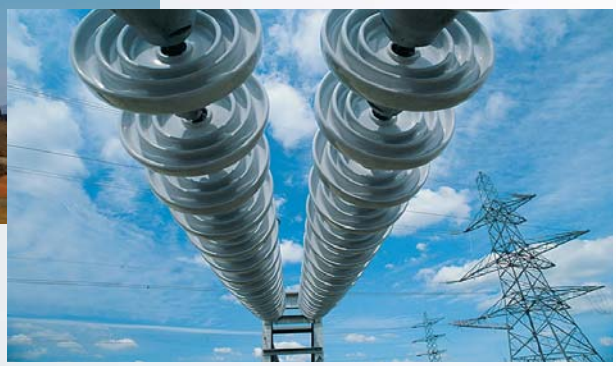
- Test & measurement
- Sensors
- Data acquisition
- Automation
- Scientific research
- Vacuum

Transport

- Avionics
- Maritime
- Automotive
- Railways

Energy

- Petrol & gas
- Nuclear
- Renewable energies
- Batteries
- Fuel cells



Defense & Security

- Communication systems
- Surveillance equipment
- Computers
- Target acquisition

Broadcast

- Studios and outside broadcasting
- TV and motion picture
- HD and SD cameras
- Remote camera control

Extreme

- Motorsports
- Sailboat racing
- Diving
- Submarine industry
- Weatherproof applications

A Connector Solution for Every Application

This catalogue features Fischer Connectors Core Series and related items.

Fischer Connectors Product Range Overview

Generic Connectors

Core Series

Brass connectors ideal for a wide array of applications

Fischer Core Series

AluLite™ Series

Aluminium connectors ideal for ultralight or portable applications

Fischer AluLite™ Series

Plastic Series

Plastic connectors ideal for lightweight applications

Fischer 405 Series
Fischer 4032 Series

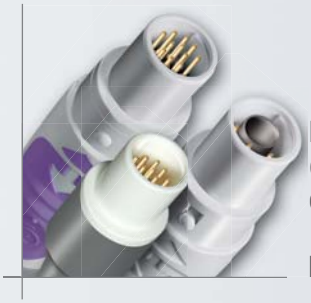
Specific Connectors

Nim-Camac

Coax and Triax Connectors engineered according to Nim-Camac standards

Fischer Nim-Camac 101 Series

Disposable



Low cost, high performance connectors developed for disposable equipments

Fischer L.U.C™ Series

SD/HD Broadcast Cameras

Triax or Fiber Optic connector solutions

Fischer 1051 Series
Fischer 1052 Series
Fischer 1053 HDTV Series

Fischer UltiMate™

High performance connectors specially designed for military land forces

Fischer LandForce™ Series

Our catalogue features standard solutions. For customized solutions, please contact us.

Fiber Optic and Hybrid Connector Solutions

Fiber Optic and Hybrid connector solutions are developed based on specific applications needs.
They are not featured in this catalogue.

However, Fischer Connectors has a broad experience in fiber optic, hybrid connector and cable systems.
Please, contact us for more information.

Fiber Optic

- Wide range of body styles and sizes
- Signal or light
- Single or multimode
- Single or multi-fiber (up to 16)
- Sealed or unsealed

To find more information on Fiber Optic Series, visit **www.fischerconnectors/catalogues**

Hybrids

- High flexibility of contact configurations, mixing:
  - Low voltage
  - High voltage
  - Coax
  - Fiber optic
  - Fluid/Gas
- Solving complex interconnection needs
- Wide range of body styles & sizes
- Sealed or unsealed

Contact Us

What is the optimal connector shell size for my application? Would a plastic housing be better than a metal one? Could my connection mix fiber optic and electrical contacts? For my application, what would be the appropriate sealing level? Selecting the right connector and cable system is an important and challenging process.

If in doubt, just ask! Our specialists are on hand to help you equip your application with the most suitable connector solution. Please contact us.

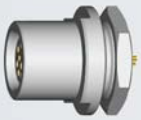
DEU IP68 sealed panel receptacle

DBEE Hermetic front projecting receptacle

DBEU IP68 sealed front projecting receptacle



DBPE Hermetic panel receptacle

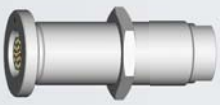
DBPU IP68 sealed panel receptacle

DBPLE Hermetic low profile front projecting receptacle

DBPLU IP68 sealed low profile front projecting receptacle

Bulkhead Feedthrough

WDE Hermetic bulkhead feedthrough for connection of 2 plugs



Ordering Information: How to Build a Part Number?

Fischer Connectors Core Series is built on a modular design and offers over 10,000 standard configurations.
Refer to the table below to find the information you need to build the part number to order your selected connector.
For customized solutions, please contact us.

	CONNECTORS PARTS			
Part System	**Body Style**	**Size**	**Polarity**	**Contact Configuration**
Part Number Examples:				
Plug	S	102	A	056
	S cable mounted plug in size 102 with 7 (multipole) low voltage male contacts and following options			
Receptacle	D	102	A	056
	D panel mounted receptacle in size 102 with 7 (multipole) low voltage female contacts and following options

103
1031
104
105
106
107

See page 2-5 Connector Size vs Cable Diameter for details on Series selection.

See page 2-1 Range Overview for body styles selection.
To check body styles available for each contact configurations see:

Multipole Low Voltage Section 4
Multipole High Voltage Section 5
Coax Low Voltage Section 6
Coax High Voltage Section 7
Triax Section 8
Mixed High Voltage Section 9
Mixed Coax Section 10

As Standard Rule

A = Male contacts on plug and Female contacts on receptacle

Z = Female contacts on plug and Male contacts on receptacle

See page 4-9-1 for details

Exceptions

Multipole High Voltage
Mixed High Voltage

See page 5-5 and 9-5 for details

Three-Digit Number Specific for Each Pin Layout

See Electrical & Contact specifications tables Column "Type"

Options

130

Natural chrome housing, PEEK contact blocks with solder contacts, keying code 1 and clamp nut wihout bend relief.

130

Natural chrome housing, PEEK contact blocks with solder contacts and keying code 1.

Cable Clamp Sets for Cable Mounted Plugs & Receptacles

+

Not applicable as panel mounted

▼

Below Cable Clamp Sets Should be Ordered Separetly

Multipole Low Voltage Triax

Example:

S 102 A 056 - 130 +

Clamp set ordering line

E3 102.5/2.0

See page 4-11 for Cable Clamp Set selection

Below Cable Clamp Sets are Included with Connector

Coax Low Voltage
Coax High Voltage

Shielded (S) or Environmental (E) Cable Clamp Set diameter should be added to the connector part number separated by ø.

Examples:

For Shielded S Clamp Sets

K 103 A002-600 ø6.2

For Environmental E Clamp Sets

KE 103 A002-600 ø6.2

See page 4-11 for S or E Cable Clamp Set selection

Multipole High Voltage
Mixed High Voltage
Mixed Coax

Insulating Clamp Set ø (104, 105 and 106 Series) should be added to the connector part number separated by ø and followed by UI (Unshielded Insulated).

Example:

S 104 A062-130 ø6.6 - UI

See page 5-6 for Insulating Clamp Set selection

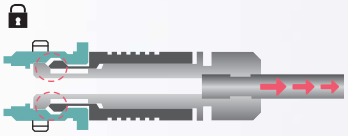
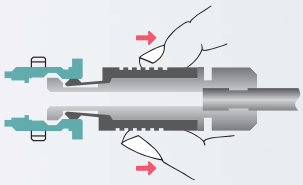
All dimensions shown are in millimeters and are for reference only.

Push-Pull Automatic Locking Plugs: S - SS - WSO

Fischer Connectors original push-pull automatic locking is widely adopted by the industry for its ease of use, safety of mating and speed in connection and disconnection.



Secure locking when cable pulled

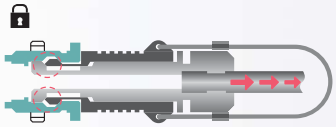


Pull the outer sleeve to unlock

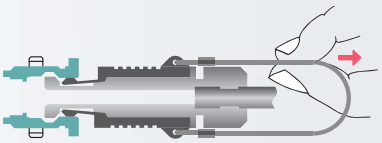
- Fully secured against accidental disconnection, it provides unparalleled signal integrity.
- Integrated into the connector housing, it is ideal for compact product design.
- For more details on Fischer locking expertise, see: **www.fischerconnectors.com/push-pull.**

Lanyard Plug: SA

Fischer Lanyard plug combines push-pull automatic locking with an emergency release lanyard.



Secure locking when cable pulled

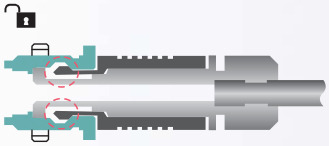


Pull the lanyard to unlock

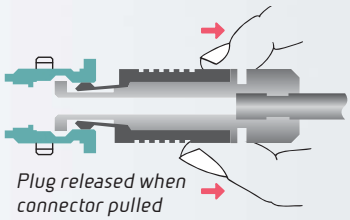
- A strong pull on the lanyard will unlock the latching mechanism.
- Specially suited to allow quick unmating on the field.

Quick Release Plugs: SC - SSC

Fischer Quick Release plugs are designed without locking mechanism for emergency release.



Snapping mechanism

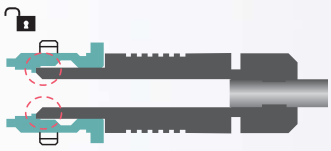


Plug released when connector pulled

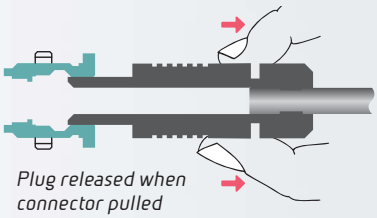
- Quick Release plugs snap into the receptacle with an audible “click”.
- A strong pull on the cable will allow unmating of the plug.
- Specially suited to avoid injuries to the users and damages to the material in case of accidental stress.

Non-Locking Plugs: SOV - SF - SFE/SFU - SFPE/SFPU

Fischer non-locking plugs are designed without snapping mechanism.



No snapping

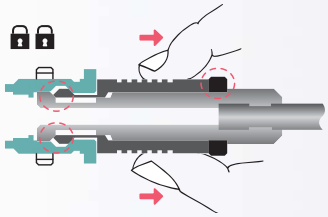


Plug released when connector pulled

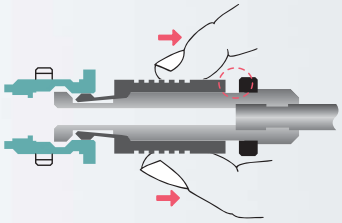
- A soft pull on the cable will release the plug.
- Specially suitable for connections with limited accessibility and/or requiring no locking.

Tamperproof Plug: SV

Fischer tamper proof plug features an integral safety locking ring to prevent unauthorized or unintentional disengagement.



Secure locking when knurled ring tightened



Untighten the knurled ring and pull the outer sleeve to unlock

- When tightened, the knurled ring will prevent unmating of the plug.
- Specially suitable for applications involving high voltage or current.

3 Cable Assembly

Fischer Connectors provides complete, high quality turnkey solutions – connectors, cable assemblies and overmolding – all from one supplier.

Fischer Cable Assembly Solutions

In addition to leading edge connector technology, Fischer Connectors also provides complete cable assembly solutions for:

- Data transmission
- Power transmission
- Coax / Triax
- Fiber-Optic applications
- Fluid / Gas transmission
- Hybrid applications

Fischer Value Added Services

Our services include:

- Design assistance and validation
- Prototyping for customized cable assembly solutions
- Engineering expertise in various assembly and termination techniques
- Advanced in-process testing to ensure optimum reliability

- Full control and responsibility over the complete assembly including connector, cable and termination
- Integration of third party connectors
- World-class customer service

Capabilities

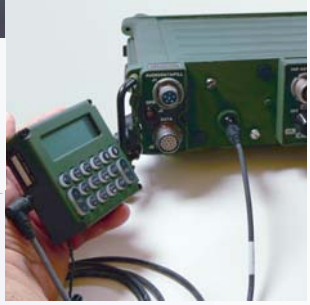
Fischer engineering expertise provides standard and customized high quality cable assembly solutions:

- Conventional cable termination using:
  Cable clamp sets, see pages 4-11 and 5-6
  Cable bend reliefs, see Accessories page 11-2
- Overmolding
- Heat shrink
- Potting
- Fiber optic termination
- Low cost and disposable

Application fields

Fischer provides complete cable assembly solutions for demanding applications.

- Medical
- Defense & Security
- Instrumentation
- Transportation
- Industry
- Energy
- Broadcast
- Extreme environment



Overmolding

For improved cable bend relief, sealing and aesthetics.
Suggested for short body connectors SS, SSC, KS and KSE.

Key Features and Benefits

- Straight and right-angle cable orientation
- Large variety of solutions available for different cable diameters
- Various materials depending on application: thermoplastic and silicone
- Aesthetic design
- Integrated cable bend relief improves cable flex life
- Submersible cable solutions: enhanced sealing level with internal potting

Heat Shrinking

For extra protection of wires and cable support.
Suitable for short body connectors SS, SSC, KS and KSE.

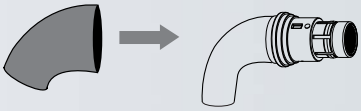
Key Features and Benefits

- Adds protection and support to exposed wires
- Potting and/or adhesive lined heat shrink can allow submersion
- Ideal for quick prototyping or low volume applications
- Use knurled clamp nut for resistant heat shrinking (See Accessories 11-1)
- Typical options:

Straight Tubing

Straight Boot

Right Angle Boot



Please contact us for more details on cable assembly solutions.

4 Multipole Low Voltage Connectors

Key Features

- Wide range of body styles and sizes
- Unsealed, sealed or hermetic
- Signal or power
- Multipole up to 55 contacts
- Up to 30 A
- Standard or inverted polarity
- Solder, crimp or PCB contacts
- Guide mark standard
- Mechanical and color coding

This catalogue covers our standard connector solutions.
For thermocouple connectors, check our online documentation on **www.fischerconnectors.com**
For specific requests, hybrids or fiber optic configurations, please contact us.

How to Order our Products ?

- To find your local Fischer Connectors Office see Catalogue back cover or go to **www.fischerconnectors.com/contacts**
- For General Ordering Information, see page 2-3
- Cable Clamp Set should be ordered separately, see page 4-11
- For details on Options, see page 4-10
- For Accessories, see Section 11
- For Tooling, see Section 12

[1)] Feedthroughs of series 106 and 107 are supplied with slotted nuts. For nuts dimensions see Section 11 Accessories.
[2)] Assembly tool for side slotted nut, see Tooling Page 12-1 for details.

The bulkhead feedthrough connector allows the passing of electrical signals and power through a panel via two cable plugs.

The "AZ" version of the feedthrough accepts a type "A" plug on the flange side and a type "Z" plug on the threaded end, which is typically oriented toward the interior of the chassis.
In the version "ZA" the connections "A" and "Z" are inverted. See A/Z Polarity on Page 4-9-1.

Dimension "B max" specifies the maximum panel thickness. For panels thinner than the unthreaded section "E min" , we can provide spacers as shown in Section 11 Accessories.

All dimensions shown are in millimeters and are for reference only.

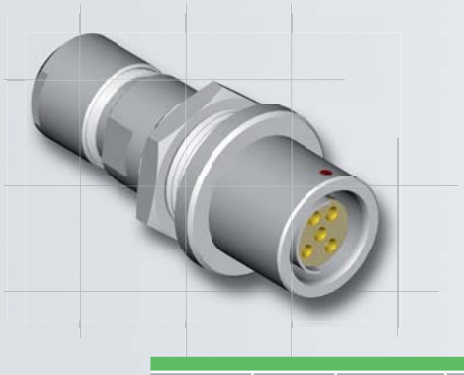
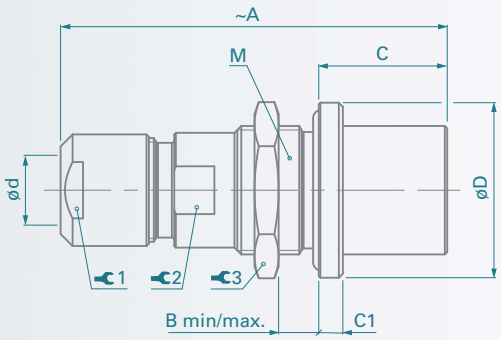
DKE Body Style for 104, 105, 106 and 107 Series





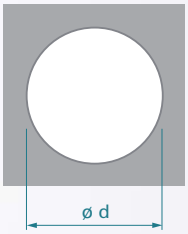
Series	A	B min/max.	C	C1	D	d *max*	M	1	Torque 1 *[Nm]*	2	3	Torque 3 *[Nm]*
104	50	0/8	16.0	3	22	8.7	16x1	12	2.0	13	19	4.5
105	61	0/9	19.0	4	27	10.7	20x1	15	3.5	16	25	6.5
106	85	0/9	25.5	7	37	19.2	30x1	25	8.0	25	TX00.106	14
107	110	0/21	25.0	5	45	22.7	35x1	32	10.0	30	TX00.107	16

All dimensions shown are in millimeters and are for reference only.

Panel Cut-Outs

The dimension of panel cut-outs varies according to the body style and size of the panel mounted connector. Refer to table below for more details.

Check details on dimensional specifications on our web site: **www.fischerconnectors.com/technical**



Panel Mounted Receptacles

Series	D	DEU DEE	DB	DBEU DBEE	DBP	DBPU DBPE	DBPLU DBPLE	DG DGP	DBPC	WDE

106	32.2	34.2	30.2
107	35.2	38.2	35.2

All dimensions shown are in millimeters and are for reference only.

Contents

A/Z Polarity

To protect users from contact with dangerous voltages, most Fischer connectors exist in two versions:

- **Type "A" Standard Polarity:**

The contacts of the receptacle are protected against accidental touch.
This version is recommended when voltage is present on the receptacle.

- **Type "Z" Inverted Polarity:**

The contacts of the plug are protected against accidental touch.
This version is recommended when voltage is present on the plug.

	Receptacle D	Plug S
Type "A" Standard Polarity		Type "Z" Inverted Polarity		
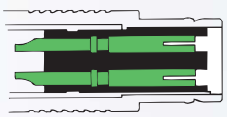
- **Important: An "A" type connector can never be mated with a "Z" type connector.**

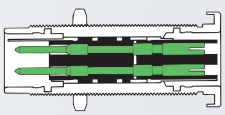
A plug "S" has the same housing in type "A" as in type "Z", but type "A" comes with unprotected contacts while type "Z" is equipped with touch-protected contacts.
In most cases these are female contacts which are recessed in the insulator.
For the exceptions, see High Voltage Connectors page 5-5 and Mixed High Voltage page 9-5

- **Bulkhead Feedthrough WDE:**

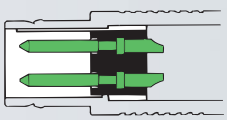
Type "AZ" is the standard version of the WDE.
The flange side accepts an "A" type plug, and the threaded side accepts a "Z" type plug.



Type "Z" plug (S)



WDE, type "AZ"



Type "A" plug (S)

The "ZA" version of the WDE accepts a type "Z" plug at the flange side and accepts a type "A" plug at the threaded end.

Contact Types

The Fischer contact designs are highly reliable and are guaranteed up to 10,000 mating cycles.

All standard brass and bronze contacts for use in the Core Series are screw machined, and all are gold plated over a nickel underplate.

The current Fischer design has very low insertion forces, improved contact area, and can be machined and calibrated in one operation.
The classic Fischer design, which has equivalent performance, is still in use on certain connectors.

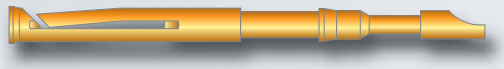
Most connectors are available with solder, crimp or PCB contacts and each type is optimized for a particular application.

Fischer Connectors manufactures as well connectors with thermocouple contacts.
Please check our online documentation on **www.fischerconnectors.com**

All contacts and connectors are RoHS compliant.

Solder Contacts

Solder contacts are the most versatile contact as they can be produced with any type of contact block material and can accept a wide range of wire sizes.



- The contacts are pre-installed in the insulator block, and the wires can be terminated with any appropriately sized soldering iron.
- Solder contacts may require operators who are qualified in specialized soldering techniques.

PCB Contacts

PCB contacts are available on some Panel Mounted Connectors.

- These connectors are designed to be mounted directly to a PCB or flex circuit, and can be used in wave solder operations for faster production assembly.
- The pin diameter has been necessarily reduced in the area that will mount to the PCB, and this can affect the current carrying capacity and voltage characteristics of the connector depending on the PCB design and assembly techniques. These requirements should be reviewed during the product design process.
- PCB pins are non standard for Cable Mounted products.

Contact Types

Crimp Contacts

Crimp contacts are often used in higher volume applications, and offer the advantage of being able to replace individual contacts if they become damaged.

- Each contact has a selectively annealed area that is deformed during assembly by specialized tooling to assure proper termination of the wire to the contact.
- Special tools are also required to insert the contact into the insulator block. See Section 12 Tooling.
- Teflon insulator blocks are not compatible with crimp contacts, and crimp contacts only accept a limited range of wire sizes.
- Crimp contacts are not available in sealed or hermetic connectors.

[1] Stranding values are in brackets.

[2] For a given AWG, the diameter of some stranded conductor designs could exceptionally be larger than the hole diameter of the barrel. Testing may be required.

[3] Recommended max. operating current per contact at 40°C temperature rise measured according to IEC 60512-3-5b.

[4] Recommended operating voltage at sea level measured according to IEC 60664-1.

This rated voltage is a general purpose guideline where no other electrical safety standard applies. In cases where other standards rule a specific use of the connector, the application-specific safety criteria shall be considered first.
This must be evaluated in the framework of equipment engineering. In cases where other calculation methods are preferred, please use the Test Voltage to determine the operating voltage. See page 13-6 for details.

All dimensions shown are in millimeters and are for reference only.

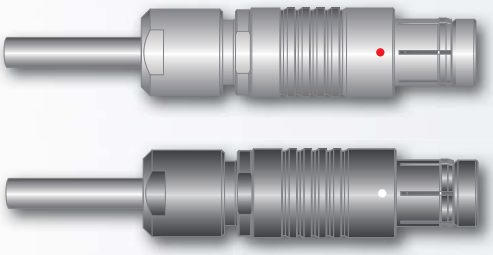
Housing Colors and Cable Bend Reliefs

Connector Housing Colors

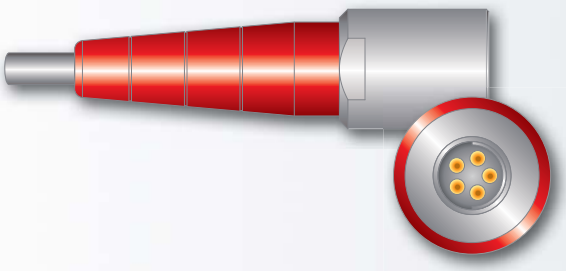
All the body styles of our Core Product Line are available in two colors:



- Natural chrome connector housing with red guide mark.
- Non reflective black chrome housing with white guide mark.

Guide mark is standard for Multipole Low and High Voltage, Mixed Multipole and Mixed Coax Connectors.

Color-coding is achieved by using accessories:



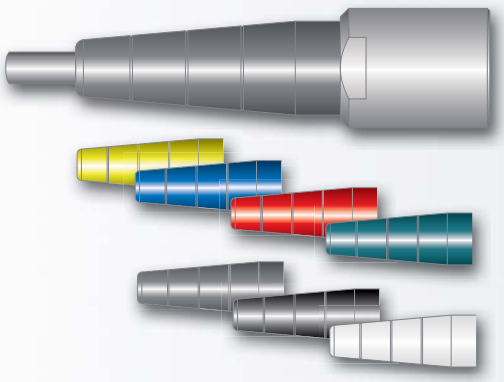
- Cable Bend Reliefs for Cable Connectors.
- Washers for Panel Connectors.

For detailed information on Cable Bend Reliefs and Washers, See Section 11 Accessories.

Our AluLite™ connector Series – ideal for ultralight product development – features a wide array of housing colors. For more, **download** AluLite™ series catalogue at **www.fischerconnectors.com/catalogues.**

Cable Bend Reliefs and Clamp Nut Types

A cable bend relief is a useful accessory for connectors mounted with cable clamp sets (S/SC; SOV; SA; SV; WSO; K/KE; DK; DKE; DBKE).



It enables to:

- Prevent cable torsion, enhancing your connections efficiency.
- Color-code your connectors for easy identification.

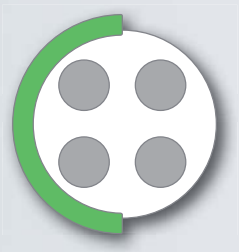
Cable bend reliefs require special clamp nuts, thus are linked with your selection of options.

For detailed information on cable bend reliefs and washers, see Section 11 Accessories.

Mechanical Coding

For Easy Connect / Disconnect Operations

Our contact blocks are engineered with arc-shape metal guides, which ensure precise alignement of connectors during the mating process.



This guiding mechanism provides:

- Increased safety and user friendliness by preventing misconnection.
- Easy mating cycles, can be blind-mated.
- Increased equipment life span by optimally protecting the contacts.

Keying Codes Options

All Multipole body styles are mechanically coded.
Code 1 is the standard, but other codes can be requested (See table below).

	Female Block	Male Block
Code 1		
Code 2		
Code 3		

Other keying codes are available on request, please contact us.

Multipole Low Voltage, High Voltage & Mixed Connectors

1	**Housing Color** Which housing color do you need?		NATURAL CHROME with Red Guide Mark				
2	**Contact Block Material** Which contact block material do you need?		PTFE	PBT		PEEK	
3	**Contact Type** Which contact type do you need?		Solder	Solder	Crimp[1)]	Solder	Crimp[1)]
4	**Keying Code** Which keying code do you need?	Code 1	-60	-80	-100	-130	-150

		Code 3	-3060	-3080	-3100	-330	-350

[1)] Crimp contacts are not an option for sealed or hermetic connectors.

Cable Bend Relief

Do you need a cable bend relief, and if yes which color?

Applicable for	Last Digit	Description
Cable Mounted Plugs & Receptacles using Cable Clamp Sets Except SS/SSC-KS/KSE	0	Clamp nut without bend relief
	1	Clamp nut with white bend relief
	2	Clamp nut with black bend relief
	3	Clamp nut with green bend relief
	4	Clamp nut with blue bend relief
	5	Clamp nut with yellow bend relief
	6	Clamp nut with red bend relief
	7	Clamp nut with grey bend relief

Contact Type for Panel Mounted Connectors

Applicable for	Last Digit	Description
Front Mounted: D-DEU/E-DB-DBEU/E-DG-SF-SFU/E	0	Standard: solder contacts
	9	With PCB (Printed Circuit Board) contacts instead of solder contacts
Rear Mounted: DBP-DBPU/E-DBPLU/E-DGP-SFPU/E	0	Standard: PCB (Printed Circuit Board) contacts
	9	With solder contacts instead of PCB (Printed Circuit Board) contacts

Design and Accessories

Applicable for	Extensions	Description
Receptacles	N	Nickel plated body with bright finish
	E	EPDM interface O-ring
	G	Ground tag if solder contact or Ground pin if PCB contact
	B	Black Nut
	D	Decorative slotted nut
	F	Decorative nut (with 2 flats)

Other options are available on request, please contact us.

Examples

Plugs

S 102 A056 - 130+
Natural chrome housing color with PEEK contact block, solder contacts, keying code 1, clamp nut without bend relief and without cable clamp set (To be ordered separately)

S 102 A056 - 232+
Natural chrome housing color with PEEK contact block, solder contacts, keying code 2, clamp nut with black bend relief, without cable clamp set

SS 102 A056 - 260
Black chrome housing color with PEEK contact block, crimp contacts, keying code 2

Receptacles

D 102 A056 - 130
Natural chrome housing color with PEEK contact block, solder contacts, keying code 1

D 102 A056 - 260
Black chrome housing color with PEEK contact block, crimp contacts, keying code 2

DBPU 102 A056 - 130G
Natural chrome housing color with PEEK contact block, PCB contacts, keying code 1 and ground pin

DBPU 102 A056 - 130NBE
Nickel plated body with PEEK contact block, solder contacts, keying code 1, with black nut and EPDM interface O-ring

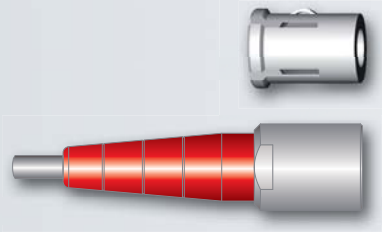
Dimensions WSO Body Style

Introduction

To guarantee excellent cable retention and strain relief, Fischer Connectors provides robust and high quality cable clamp sets:



- Collet style clamp system retaining cable over large jacket surface area.
- Protection of small diameters and delicate conductors.
- Can be combined with cable bend reliefs for optimal performance. See Accessories, page 11-2.

Cable clamp sets are suitable for all cable mounted connectors, except SS/SSC and KS/KSE.
For these specific body styles, see Section 3 Cable Assembly for overmolding or heat shrinking techniques.

Range Overview: S, U and E Cable Clamp Sets

Fischer Connectors offers three types of cable clamps sets.
The table below will help you select the one corresponding to your needs.

Cable Clamp Set	Do you need the interface between the cable and the connector to be sealed?		Do you need the connector to be terminated to the cable shield?	
	Unsealed	Sealed	Unshielded	Shielded
S - Shielded	●			●
U - Unshielded	●		●	
E - Environmental		●	●	●

For 106 and 107 connector series, only S and E cable clamp sets are available. See page 4-11-7 and 4-11-8 for details.

Part Numbering

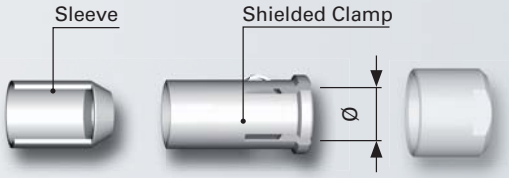
Below Cable Clamp Sets Should be Ordered Separately	
Multipole Low Voltage	Triax
S 102 A056-130 +	
Examples	
Connector ordering line	
S 102 A056-130 +	
Clamp Set ordering line	
E3 102.5/2.0	
See following pages for Cable Clamp Set selection.	

Below Cable Clamp Sets are Included with Connector	
Coax Low Voltage	Coax High Voltage
Shielded (S) or Environmental (E) Cable Clamp Set diameter should be added to the connector part number separated by ø.	
Examples	
For S - Shielded Clamp Sets	
K 103 A002-600 ø6.2	
For E - Environmental Clamp Sets	
KE 103 A002-600 ø6.2	
See following pages for S or E Cable Clamp Set selection.	

102 Series

S - Shielded

Shielded cable clamp with sleeve.

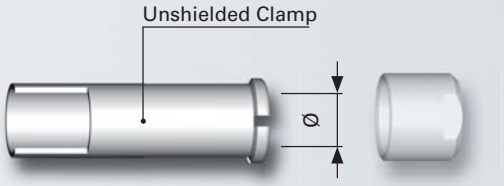


Cable dia. Range	Collet Ø	Cable Clamp Set [1]
1.5 - 2.1	2.1	E32 102.1/2.1 + A
2.1 - 2.6	2.6	E32 102.1/2.6 + A
2.6 - 3.1	3.1	E32 102.1/3.1 + A
3.1 - 3.6	3.6	E32 102.1/3.6 + A

Cable dia. Range	Collet Ø	Cable Clamp Set [1]
3.6 - 4.1	4.1	E32 102.1/4.1 + A
4.1 - 4.3	4.3	E32 102.1/4.3 + A
4.3 - 4.7	4.7	102.248 + A

U - Unshielded

Unshielded, one-piece cable clamp.

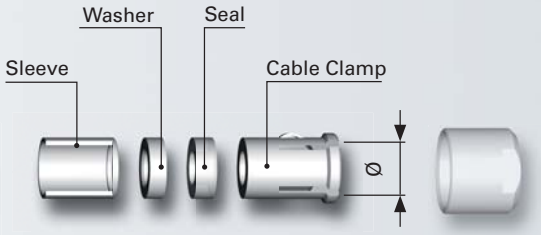


Cable dia. Range	Collet Ø	Cable Clamp Set [1]
1.4 - 2.0	2.0	E3 102.5/2.0
2.0 - 2.7	2.7	E3 102.5/2.7
2.7 - 3.5	3.5	E3 102.5/3.5

Cable dia. Range	Collet Ø	Cable Clamp Set [1]
3.5 - 4.2	4.2	E3 102.5/4.2
4.2 - 4.7	4.7	E3 102.5/4.7

E - Environmental

Environmentally sealed clamp for use with shielded or unshielded cables.



Cable dia. Range	Collet Ø	Cable Clamp Set [1]
1.5 - 2.1	2.1	E31 102.2/2.1 + B
2.1 - 2.6	2.6	E31 102.2/2.6 + B
2.6 - 3.1	3.1	E31 102.2/3.1 + B

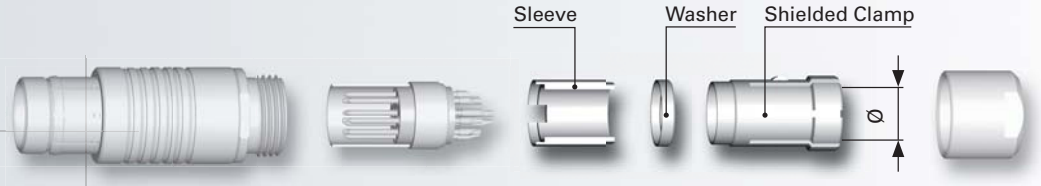
Cable dia. Range	Collet Ø	Cable Clamp Set [1]
3.1 - 3.6	3.6	E31 102.2/3.6 + B
3.6 - 4.1	4.1	E31 102.2/4.1 + B
4.1 - 4.3	4.3	E31 102.2/4.3 + B

[1] For ordering information see Page 4-11-1.

103 Series

S - Shielded

Shielded cable clamp with washer and sleeve.

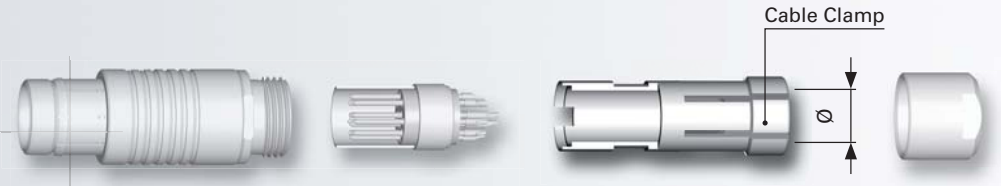


Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator
1.7 - 2.2	2.2	E31 103.1/2.2 +B
2.2 - 2.7	2.7	E31 103.1/2.7 +B
2.7 - 3.2	3.2	E31 103.1/3.2 +B
3.2 - 3.7	3.7	E31 103.1/3.7 +B
3.7 - 4.2	4.2	E31 103.1/4.2 +B

Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator
4.2 - 4.7	4.7	E31 103.1/4.7 +B
4.7 - 5.2	5.2	E31 103.1/5.2 +B
5.2 - 5.7	5.7	E31 103.1/5.7 +B
5.7 - 6.2	6.2	E31 103.1/6.2 +B
6.2 - 6.7	6.7	E31 103.1/6.7 +B

U - Unshielded

Unshielded, one-piece cable clamp.

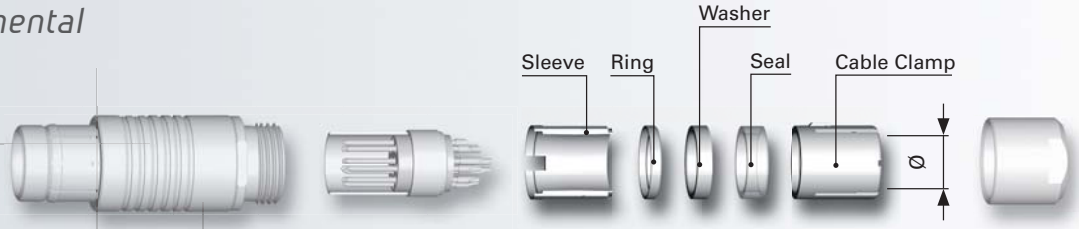


Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator
2.2 - 3.2	3.2	E3 103.6/3.2
3.2 - 4.2	4.2	E3 103.6/4.2
4.2 - 4.7	4.7	E3 103.6/4.7
4.7 - 5.2	5.2	E3 103.6/5.2

Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator
5.2 - 5.7	5.7	E3 103.6/5.7
5.7 - 6.2	6.2	E3 103.6/6.2
6.2 - 6.7	6.7	E3 103.6/6.7

E - Environmental

Environmentally sealed clamp for use with shielded or unshielded cables.



Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator
1.7 - 2.2	2.2	E31 103.2/2.2 + B
2.2 - 2.7	2.7	E31 103.2/2.7 + B
2.7 - 3.2	3.2	E31 103.2/3.2 + B
3.2 - 3.7	3.7	E31 103.2/3.7 + B
3.7 - 4.2	4.2	E31 103.2/4.2 + B

Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator
4.2 - 4.7	4.7	E31 103.2/4.7 + B
4.7 - 5.2	5.2	E31 103.2/5.2 + B
5.2 - 5.7	5.7	E31 103.2/5.7 + B
5.7 - 6.2	6.2	E31 103.2/6.2 + B

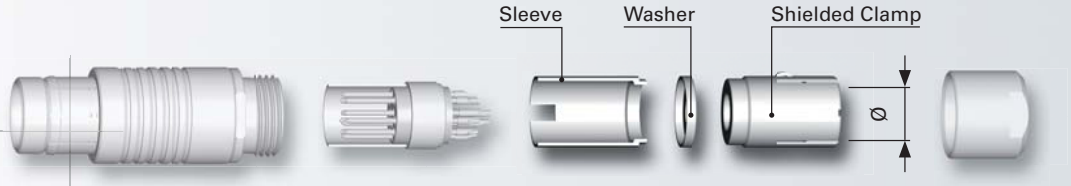
[1] For ordering information see Page 4-11-1.

All dimensions shown are in millimeters and are for reference only.

1031 Series

S - Shielded

Shielded cable clamp with washer and sleeve.



Cable dia. Range	Collet Ø	Cable Clamp Set [1]
2.2 - 2.7	2.7	E3 1031.1/2.7
2.7 - 3.2	3.2	E3 1031.1/3.2

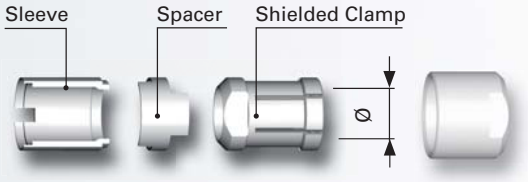
104 Series

S - Shielded

Shielded cable clamp with spacer and sleeve.

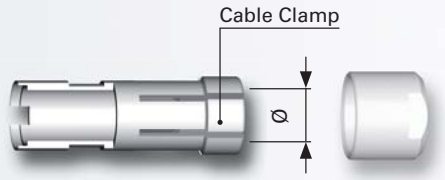


Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator	
		Plug	Receptacle
2.9 - 4.0	4.0	E3 104.3/4.0 + B	E3 104.4/4.0 + C
4.0 - 4.7	4.7	E3 104.3/4.7 + B	E3 104.4/4.7 + C
4.7 - 5.7	5.7	E3 104.3/5.7 + B	E3 104.4/5.7 + C

Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator	
		Plug	Receptacle
5.7 - 6.7	6.7	E3 104.3/6.7 + B	E3 104.4/6.7 + C
6.7 - 7.7	7.7	E3 104.3/7.7 + B	E3 104.4/7.7 + C
7.7 - 8.7	8.7	E3 104.3/8.7 + B	E3 104.4/8.7 + C
8.7 - 9.1	9.1	E3 104.3/9.1 + B	E3 104.4/9.1 + C

U - Unshielded

Unshielded, one-piece cable clamp.

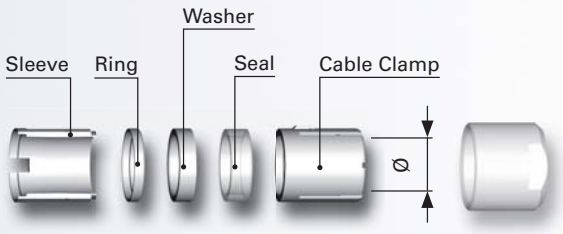


Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator
3.2 - 4.2	4.2	E3 104.6/4.2
4.2 - 4.7	4.7	E3 104.6/4.7
4.7 - 5.7	5.7	E3 104.6/5.7
5.7 - 6.7	6.7	E3 104.6/6.7

Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator
6.7 - 7.7	7.7	E3 104.6/7.7
7.7 - 8.2	8.2	E3 104.6/8.2
8.2 - 8.7	8.7	E3 104.6/8.7

E - Environmental

Environmentally sealed clamp for use with shielded or unshielded cables.



Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator	
		Plug	Receptacle
2.9 - 4.0	4.0	E3 104.2/4.0 + B	E3 104.2/4.0 + C
4.0 - 4.7	4.7	E3 104.2/4.7 + B	E3 104.2/4.7 + C
4.7 - 5.7	5.7	E3 104.2/5.7 + B	E3 104.2/5.7 + C

Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator	
		Plug	Receptacle
5.7 - 6.7	6.7	E3 104.2/6.7 + B	E3 104.2/6.7 + C
6.7 - 7.7	7.7	E3 104.2/7.7 + B	E3 104.2/7.7 + C
7.7 - 8.7	8.7	E3 104.2/8.7 + B	E3 104.2/8.7 + C

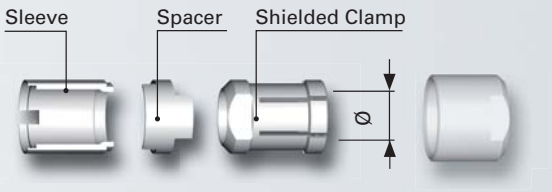
[1] For ordering information see Page 4-11-1.

All dimensions shown are in millimeters and are for reference only.

105 Series

S - Shielded

Shielded cable clamp with spacer and sleeve.

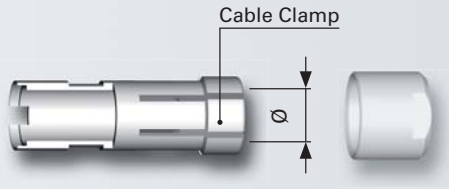


Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator
3.2 - 4.2	4.2	E3 105.1/4.2 + B
4.2 - 5.2	5.2	E3 105.1/5.2 + B
5.2 - 6.2	6.2	E3 105.1/6.2 + B
6.2 - 7.2	7.2	E3 105.1/7.2 + B

Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator
7.2 - 8.2	8.2	E3 105.1/8.2 + B
8.2 - 9.2	9.2	E3 105.1/9.2 + B
9.2 - 10.0	10.0	E3 105.1/10.0 + B
10.0 - 10.7	10.7	E3 105.1/10.7 + B

U - Unshielded

Unshielded, one-piece cable clamp.

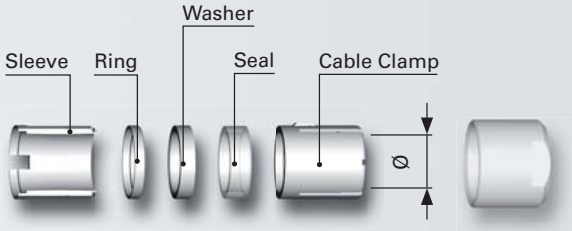


Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator
2.5 - 3.5	3.5	E3 105.6/3.5
3.5 - 4.5	4.5	E3 105.6/4.5
4.5 - 5.5	5.5	E3 105.6/5.5
5.5 - 6.5	6.5	E3 105.6/6.5

Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator
6.5 - 7.5	7.5	E3 105.6/7.5
7.5 - 8.5	8.5	E3 105.6/8.5
8.5 - 9.5	9.5	E3 105.6/9.5
9.5 - 10.5	10.5	E3 105.6/10.5

E - Environmental

Environmentally sealed clamp for use with shielded or unshielded cables.



Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator
3.2 - 4.2	4.2	E31 105.2/4.2 + B
4.2 - 5.2	5.2	E31 105.2/5.2 + B
5.2 - 6.2	6.2	E31 105.2/6.2 + B
6.2 - 7.2	7.2	E31 105.2/7.2 + B

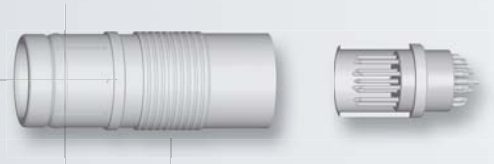
Cable dia. Range	Collet Ø	Cable Clamp Set [1] PEEK or PBT Insulator
7.2 - 8.2	8.2	E31 105.2/8.2 + B
8.2 - 9.2	9.2	E31 105.2/9.2 + B
9.2 - 10.0	10.0	E31 105.2/10.0 + B
10.0 - 10.7	10.7	E31 105.2/10.7 + B

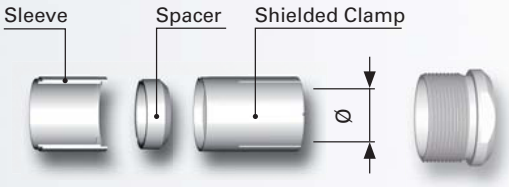
[1] For ordering information see Page 4-11-1.

106 Series

S - Shielded

Shielded cable clamp
with spacer and sleeve.





Cable dia. Range	Collet Ø	Cable Clamp Set [1] PTFE Insulator	
		Plug	Receptacle
4.2 - 5.2	5.2	E3 106.1/5.2	E3 106.3/5.2
5.2 - 6.2	6.2	E3 106.1/6.2	E3 106.3/6.2

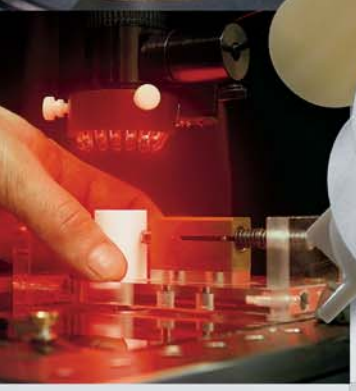
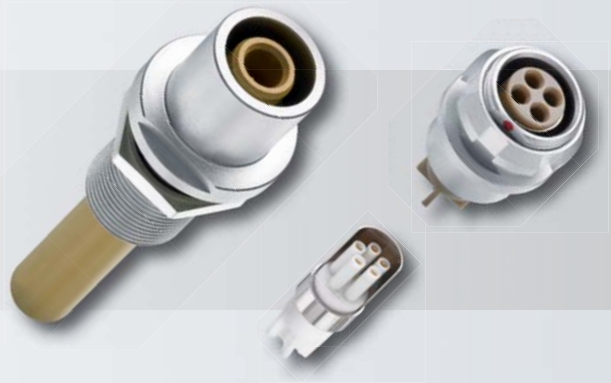
5 Multipole High Voltage Connectors



Key Features

- Wide range of body styles and sizes
- Unsealed, sealed or hermetic
- Power
- Up to 14 kV
- Standard or inverted polarity
- Individually insulated contacts
- Locking ring for integral safety
- Guide mark standard



This catalogue covers our standard connector solutions.
For specific requests, hybrids or fiber optic configurations, please contact us.

How to Order our Products?

- To find your local Fischer Connectors Office see Catalogue back cover or go to **www.fischerconnectors.com/contacts**
- For General Ordering Information, see page 2-3
- Cable Clamp Set is included with connector, see Page 5-6
- For details on Options, see page 4-10
- For Accessories, see Section 11
- For Tooling, see Section 12

Other Fischer Connectors Series with Multipole High Voltage Contacts

AluLite™ Series

Aluminium connectors ideal for ultralight or portable applications

Fischer AluLite™ Series

Plastic Series

Plastic connectors ideal for lightweight applications

107	110	85	34	38	22.7	32	10	32

Torque [Nm] are recommended values that may be influenced by the characteristics of the cable jacket.
Tests have to be made to evaluate the exact values. To secure the cable clamp nut, we recommend the use of thread locking adhesive.

Panel Mounted Receptacle

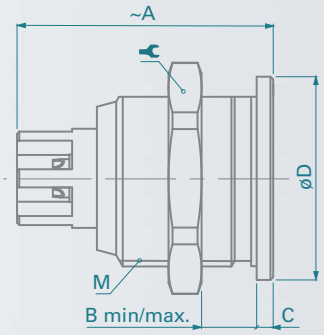
D Body Style



Series	A	B min/max.	C1	D	M		Torque [Nm]
104	28	0/10.5	2.25	19	15x1	17	4.0
105	34	0/15.0	2	22	18x1	22	6.0
106	51	0/18.0	3	37	32x1	TX00.106	15
107	63	0/18.0	4	40	35x1	TX00.107	16

Receptacles of 106 and 107 Series are supplied with slotted nuts.
For nut dimensions see section 11 Accessories.
For wrenches see section 12 Tooling.

Other connector styles and contact configurations are available on request.

All dimensions shown are in millimeters and are for reference only .

Torque [Nm] are recommended values that may be influenced by the quality of the surface under the nut. Tests have to be made to evaluate the exact values.

A / Z Polarity

For Multipole High Voltage connectors, it is essential to pay attention to the differences between type "A" and "Z".

Type "A" Standard Polarity:

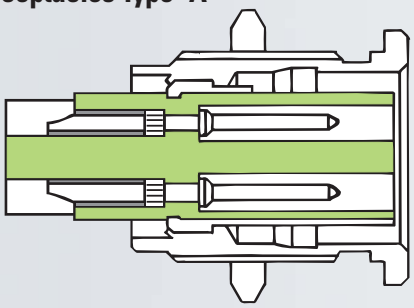
The contacts of the receptacle are recessed to reduce the possibility of electric shock in the unmated position. This version should be used when the voltage is sourced from the receptacle.

Type "Z" Inverted Polarity:

The contacts of the plug are recessed to reduce the possibility of electric shock in the unmated position. This version should be used when the voltage is sourced from the plug.
Protected contacts are usually female contacts recessed in the insulator. For Multipole High Voltage connectors, however, it is safer to recess the male contacts. In these cases, the plug type "A" is equipped with female contacts and the receptacle with protected male contacts.

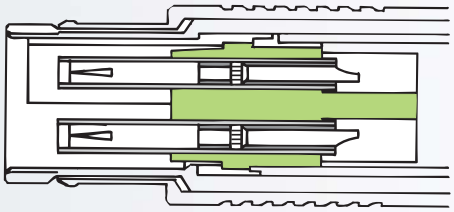
Example: **Receptacles Type "A"**

D105 A039



Plug Type "A"

S105 A039



104, 105, 106 and 107 Series

● = Standard ❍ = Option

Type	Pin Layout	Number of Contacts	Contact Termination		Insulating Material	Contact ø [mm]	Wire Barrel ø [mm]	Test Voltage [V] in mated position				Current Rating[1] [A]
								AC rms		DC

[1] Recommended max. operating current per contact at 40°C temperature rise measured according to IEC 60512-3-5b.
[2] For clamp sets selection see page 4-11-8.
[3] See Section 12 Tooling, for insertion tool of contacts.

Part Numbering

Multipole High Voltage connectors as well as Mixed High Voltage and Mixed Coax connectors are equipped with POM (Delrin®) collet type cable clamps. These insulated one-piece clamps are fitted for optimal High-Voltage ratings.

Material
POM (Polyoxymethylene) Delrin ®

Insulating Cable Clamp Set is Included with Connector		
Multipole High Voltage	**Mixed High Voltage**	**Mixed Coax**

Insulating Clamp Set ø should be added to the connector part number separated by ø (Select the collet ø according to the cable clamping range) and followed by - UI (Unshielded Insulated).

Example

S 104 A062-130 ø 6.6 - UI

104 Series 4 pole High Voltage S plug with Insulating Cable Clamp Set allowing cable diameter included between 4.7 & 6.6 mm

Connector Types with Insulating Cable Clamps

Series	Multipole High Voltage	Mixed High Voltage	Mixed Coax

6 Coax Low Voltage Connectors

Key Features

- Wide range of body styles and sizes
- Unsealed, sealed or hermetic
- RF signal or power
- 50 and 75 Ohms impedance
- Up to 2GHz
- Standard or inverted polarity
- No guide mark standard

This catalogue covers our standard connector solutions.
For specific requests, hybrids or fiber optic configurations, please contact us.

How to Order our Products ?

- To find your local Fischer Connectors Office see Catalogue back cover or go to **www.fischerconnectors.com/contacts**
- For General Ordering Information, see page 2-3
- Cable Clamp Set is included with connector, see page 4-11
- For details on Options, see page 6-10
- For Accessories, see Section 11
- For Tooling, see Section 12

The bulkhead feedthrough connector allows the passing of electrical signals and power through a panel via two cable plugs.

The "AZ" version of the feedthrough accepts a type "A" plug on the flange side and a type "Z" plug on the threaded end, which is typically oriented toward the interior of the chassis.
In the version "ZA", the connections "A" and "Z" are inverted, see "A/Z Polarity" on Page 4-9-1.

Dimension "B max" specifies the maximum panel thickness.

All dimensions shown are in millimeters and are for reference only.

1) Insulated, stranded wires with screen and jacket, standardized by the German VDE 0812, for low frequency applications when no defined impedance is required.

2) Insulated, highly flexible stranded wires with screen and jacket, for low frequency applications when no defined impedance is required.

Examples

Plugs

SV 103 A002 - 600 Ø6.7
Natural chrome housing color with PTFE contact block, solder contacts and cable clamp set (diameter 6.7 mm)

S 104 A060 - 600 Ø3.4-UI
Natural chrome housing color with PTFE contact block, solder contacts and insulating clamp set (diameter 3.4 mm)

Receptacles

DBPLE 102 A002 - 709EGD
Black chrome housing color with PTFE contact block, solder contacts, EPDM interface O-ring, ground tag and decorative slotted nut

DKBE 103 A026 - 600 Ø6.2E
Natural chrome housing color with PTFE contact block, solder contacts, cable clamp set (diameter 6.2 mm) and EPDM interface O-ring

7 Coax High Voltage Connectors

Key Features

- Wide range of body styles and sizes
- Unsealed, sealed or hermetic
- RF signal or power
- 50 and 75 Ohms impedance
- Standard or inverted polarity
- No guide mark standard
- Up to 50kV

This catalogue covers our standard connector solutions.
For specific requests, hybrids or fiber optic configurations, please contact us.

How to Order our Products ?

- To find your local Fischer Connectors Office see Catalogue back cover or go to **www.fischerconnectors.com/contacts**
- For General Ordering Information, see page 2-3
- Cable Clamp Set is included with connector, see page 4-11
- For details on Options, see page 6-10
- For Accessories, see Section 11
- For Tooling, see Section 12

Other Fischer Connectors Series with Coax High Voltage Contacts

AluLite™ Series

Aluminium connectors ideal for ultralight or portable applications

Fischer AluLite™ Series

Plastic Series

Plastic connectors ideal for lightweight applications

[1] Cable screen and jacket (e.g. RG-58) are retained by hex-crimp to the plug shell.
[2] For improved safety, the center contact is further recessed than in the S 105 A049.
[3] Two wrenches with an opening of 32 mm are required for SV/SVE 107 series.
[4] For insertion of center contact which has to be assembled after wiring, we recommend tool TP00.000, as shown on page 12-3.

Suitable Coax cables are indicated in the column "Cable Group" in Electrical & Contact specifications. The cable specifications are listed on page 6-9. If required, we will supply adapter sleeves which must be placed over the cable dielectric during assembly in order to guarantee proper performance.

For cable clamps sets see page 4-11. For non-sealed Coax connectors, the collet diameter has to be selected from the tables of type "S-Shielded", and for sealed Coax connectors from the tables of type "Environmental".

All dimensions shown are in millimeters and are for reference only.
Torque [Nm] are recommended values that may be influenced by the characteristics of the cable jacket.
Tests have to be made to evaluate the exact values. To secure the cable clamp nut, we recommend the use of thread locking adhesive.

[1] See list of recommended cables on page 6-9.
[2] Recommended max. operating current per contact at 40°C temperature rise measured according to IEC 60512-3-5b.
[3] Plug: Center contact-crimp / Outer contact-crimp ferrule.
Receptacle: Center contact-solder / Outer contact-washer with solder tag.
[4] Receptacles are available with an optional micro switch.
[5] Plug contains additionally recessed contacts.
[6] See Section 11 Tooling for insertion tool of contact.

8 Triax Connectors

Key Features

- Wide range of body styles and sizes
- Unsealed, sealed or hermetic
- RF signal or power
- 50 Ohms impedance
- No guide mark standard

This catalogue covers our standard connector solutions.
For specific requests, hybrids or fiber optic configurations, please contact us.

How to Order our Products ?

- To find your local Fischer Connectors Office see Catalogue back cover or go to **www.fischerconnectors.com/contacts**
- For General Ordering Information, see page 2-3
- Cable Clamp Set should be ordered separately, see page 4-11
- For details on Options, see page 6-10
- For Accessories, see Section 11
- For Tooling, see Section 12

For insertion of female high voltage contacts which have to be assembled after wiring, we recommend tool TP00.000, shown on page 12-3.

These connectors are supplied with insulating cable clamps sets. The available inner diameters are listed on page 5-6.

The connection of a cable screen and/or a sealed cable entry is not possible with this clamp type.
Some of these types, however, can be delivered with special metal clamps, allowing the clamping of a cable screen.

All dimensions shown are in millimeters and are for reference only.

Torque [Nm] are recommended values that may be influenced by the characteristics of the cable jacket.
Tests have to be made to evaluate the exact values. To secure the cable clamp nut, we recommend the use of thread locking adhesive.

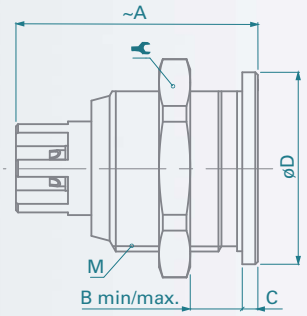
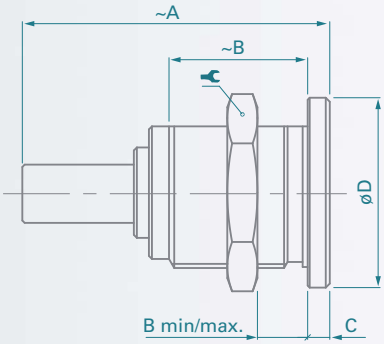
Panel Mounted Receptacles

D Body Style



Types	A	B min/max.	C	D	M		Torque [Nm]
104 A/Z 083	31	0/10.5	2.2	19	15x1	17	4.0
105 A 112	34	0/15.0	2.0	22	18x1	22	6.0

D Body Style



Types	A	B min/max.	C	D	M		Torque [Nm]
105 A 020	54	0/15	2	22	18x1	22	6.0
105 A 036	54	0/15	2	22	18x1	22	6.0
105 A 060	58	0/15	2	22	18x1	22	6.0
106 A 014 [1)]	49	0/18	3	37	32x1	TX00.106	15

[1)] The D 106 A014 is supplied with a slotted nut.
The required hook spanner TX00.106 is shown on page 12-1.
For insertion of male high voltage contacts which have to be assembled after wiring, we recommend tool TP00.001, shown on page 12-3.

105 Series

The high voltage center contact is retained in a special insulator. To achieve proper high voltage performance, the window for soldering of the wire has to be covered by the supplied insulating tube, which must be placed over the cable before soldering.

All dimensions shown are in millimeters and are for reference only.
Torque [Nm] are recommended values that may be influenced by the quality of the surface under the nut. Tests have to be made to evaluate the exact values.

A / Z Polarity

For Mixed High Voltage connectors, it is essential to pay attention to the differences between type "A" and "Z".

Type "A" Standard Polarity:

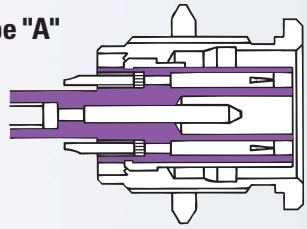
The contacts of the receptacle are recessed to reduce the possibility of electric shock in the unmated position. This version should be used when the voltage is sourced from the receptacle.

Type "Z" Inverted Polarity:

The contacts of the plug are recessed to reduce the possibility of electric shock in the unmated position. This version should be used when the voltage is sourced from the plug.
Protected contacts are usually female contacts recessed in the insulator. For Mixed High Voltage connectors, however, it is safer to recess the male contacts. In these cases, the plug type "A" is equipped with female contacts and the receptacle with protected male contacts. This applies to all below connectors except 104 $\frac{A}{Z}$ 083.

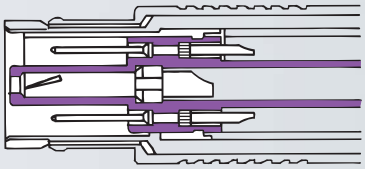
Example: **Receptacles Type "A"**

D105 A036



Plug Type "A"

S105 A036



104, 105 and 106 Series

[1] Recommended max. operating current per contact at 40°C temperature rise measured according to IEC 60512-3-5b.
[2] Contact dia 2.0 is positioned to make contact first and break last.
[3] See Section 11 Tooling for insertion tool of contact dia. 2.0.

10 Mixed Coax Connectors

Key Features

- Wide range of body styles and sizes
- 50 Ohms impedance
- Guide mark standard
- Unsealed version only
- Frequency up to 2 GHz

This catalogue covers our standard connector solutions.
For specific requests, hybrids or fiber optic configurations, please contact us.

How to Order our Products ?

- To find your local Fischer Connectors Office see Catalogue back cover or go to **www.fischerconnectors.com/contacts**
- For General Ordering Information, see page 2-3
- Cable Clamp Set is included with connector, see page 5-6
- For details on Options, see page 6-10
- For Accessories, see Section 11
- For Tooling, see Section 12

[3] Recommended max. operating current per contact at 40°C temperature rise measured according to IEC 60512-3-5b.

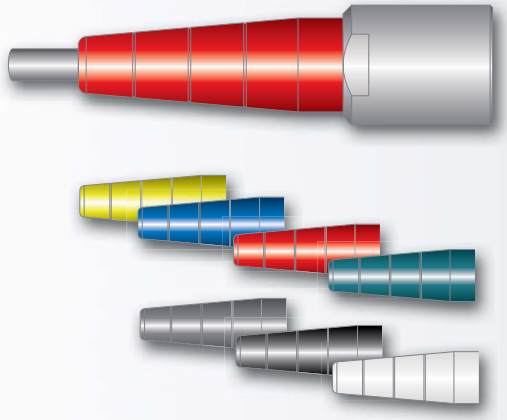
[4] PEEK for main insulator and PTFE for Coax.

All dimensions shown are in millimeters and are for reference only.

11 Accessories

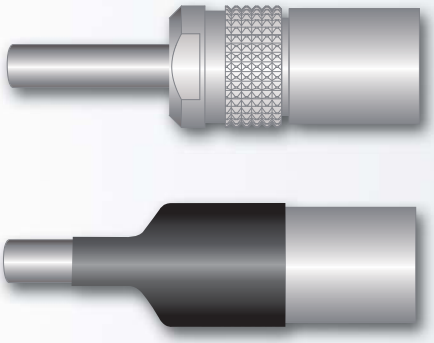
Cable Mounted Plugs and Receptacles

Cable Bend Reliefs for an Increased Protection of your Connections 11-2



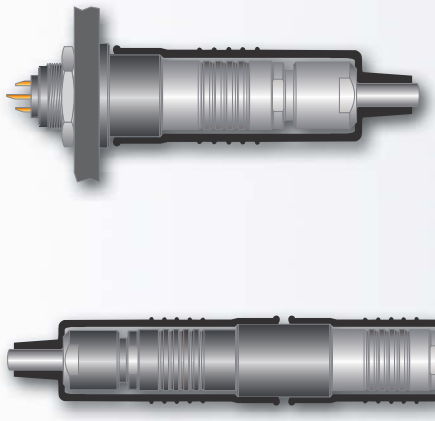
- Suitable for:
  - Cable Mounted Plugs (S/SC, SOV, SA, SV, WSO)
  - Cable Mounted Receptacles (K/KE)
  - Panel Mounted Cable Receptacles (DKBE, DK, DKE)
- Prevent cable torsion and increase protection of connection
- Color coding for easy identification when combined with color washer of panel mounted connector

Knurled Clamp Nuts for Resistant Heat Shrinking 11-2



- Suitable for:
  - Cable Mounted Plugs (S/SC, SOV, SA, SV, WSO)
  - Cable Mounted Receptacles (K/KE)
  - Panel Mounted Cable Receptacles (DKBE, DK, DKE)
- Give a good grip to a shrinkable tube acting as cable bend relief

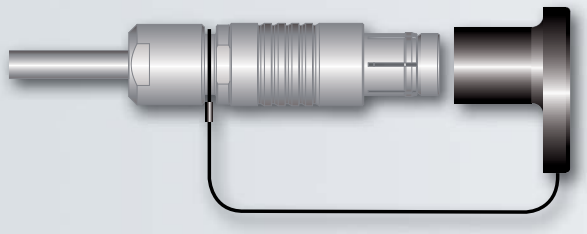
Protective Sleeves for Improved Protection 11-3



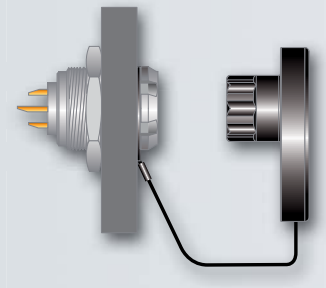
- Suitable for:
  - Cable Mounted Plugs (S/SC, SOV)
  - Cable Mounted Receptacles (K/KE)
- Protect against any foreign matter:
  - Dust, dirt or mud
  - Liquid splash
- Minimize mechanical damage from impact on hard surfaces
- When mated, the front end of the protective sleeve encloses the projecting portion of the receptacle
- Connectors can additionally be protected with sealing caps while unmated

Plugs and Receptacles

Sealing Caps for Protection of Unmated Connectors in the Field 11-4



- Suitable for:
  - Cable Mounted Plugs (S/SC, SOV, SA, SV, SS/SSC, WSO)
  - Cable Mounted Receptacles (K/KE, KS/KSE)

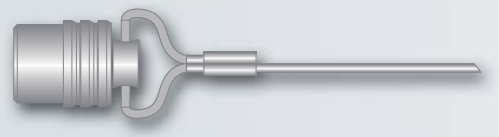


- Suitable for:
  - Panel Mounted Receptacles (D, DEU/E, DBEU/E, DBP, DBPU/E, DBPLU/E, DG/DGP, DBPC, WDE)
  - Panel Mounted Plugs (SF, SFU/E, SFPU/E)
  - Panel Mounted Cable Receptacles (DKBE, DK, DKE)

Soft Caps 11-4

- Lightweight
- Noiseless operation
- Operating temperature – 55°C to + 85 °C
- IP68
- Easily installed
- Available in single-piece or lanyard model
- Caps are intermateable to provide additional dust protection

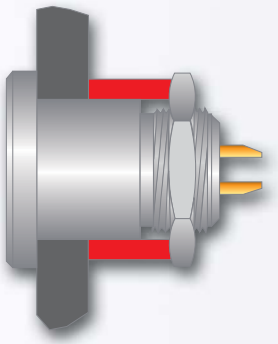
Metal Caps 11-4-4



- Rugged
- Fitted with an o-ring seal
- Protect & seal the mating face of the connector
- IP68
- Easily installed

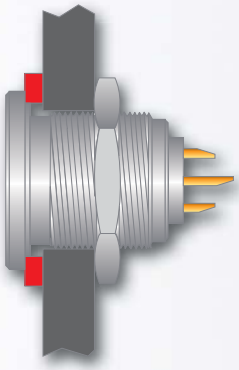
Panel Mounted Plugs and Receptacles

Spacers to Allow Mounting on all Panels 11-5

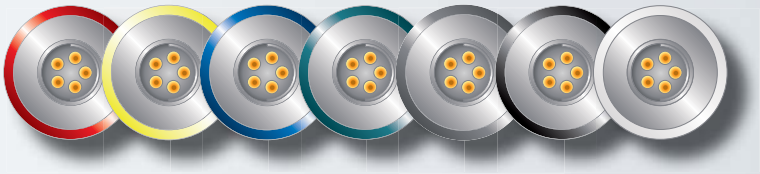


- Suitable for:
  Feedthrough (WDE)
  Panel Mounted Receptacles (DEE, DEU, DKE)
- Permit mounting on panels or bulkheads thinner than the unthreaded section

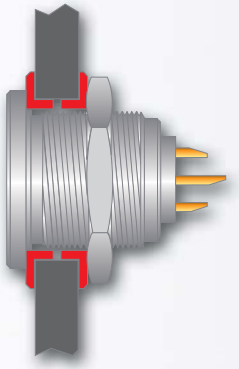
Color Coding Washers for Easy Connector Identification 11-6



- Suitable for:
  Panel Mounted Receptacles (D, DB, DBP, DBPC, DG, DGP, DK)
  Panel Mounted Plug (SF)
- Can be mounted between the connector flange and the panel
- Color coding for easy identification when combined with cable bend relief for cable mounted connectors
- Not suitable for sealed version



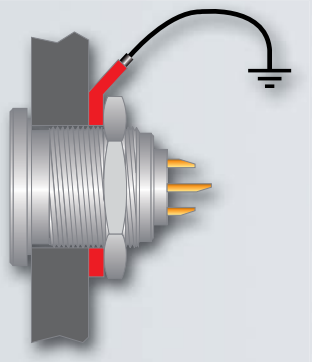
Insulating & Color Coding Washers for Easy Connector Identification and Efficient Insulation 11-6



- Suitable for:
  Panel Mounted Receptacle (D)
- Can be mounted on both sides of the panel cut-out
- Color coding for easy identification when combined with cable bend relief for cable mounted connectors
- Isolate the connector body electrically from the panel
- Not suitable for sealed version

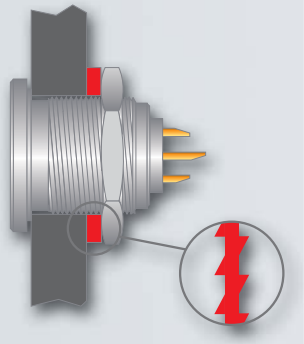
Panel Mounted Plugs and Receptacles

Grounding Washer 11-6-1



- Suitable for Panel Mounted Connectors

Locking Washer 11-6-1



- Suitable for Panel Mounted Connectors

Mounting Nuts for Perfect Connector Grip 11-7

Front

- Decorative slotted nuts supplied for:
  Rear Mounted Panel Receptacles (DBP, DBPC, DBPE, DBPU, DG,DGP)
- Decorative nuts supplied for:
  Panel Mounted Receptacles (DKBE, DBPLU/E, SFPU/E)
  Panel Mounted Plugs (SFPU/E)

Rear

- Hex nuts supplied for:
  Front Mounted Panel Receptacles
  Rear Mounted Panel Receptacles (DG, DGP)
- Slotted nuts supplied for:
  Panel Mounted Connectors for 106 & 107 Series

	5.0 - 6.2	L3 = 16	
1031	3.0 - 4.0	L1 = 26	18
	4.0 - 5.0	L2 = 21	
	5.0 - 6.5	L3 = 16	

Series [1]	Cable ø Range	Length	A
104	4.0 - 5.0	L1 = 31	18
	5.0 - 6.5	L2 = 25	
	6.0 - 7.5	L3 = 18	
105	4.0 - 5.0	L1 = 37	21
	5.5 - 6.5	L2 = 31	
	7.0 - 8.5	L3 = 24	
	8.5 - 10.5	L4 = 18	

[1] For the 102 Series cable bend reliefs are designed specifically for a given cable ø range.
For other Series cable bend reliefs have to be cut to length L1, L2, L3 or L4 to fit your cable ø range.

Material
Clamp nut: Nickel and chromium plated brass (ISO CuZn39Pb3)
Bend relief: TPE (Thermoplastic elastomer)

These cable bend reliefs cannot be assembled with the clamp nuts supplied with the standard connectors.
Therefore, the cable bend reliefs are supplied as sub-assemblies.

These metal caps are fitted with an O-ring seal. They protect and seal the mating face of the plugs and receptacles.
To attach the ferrule or the crimp lug to the stainless-steel cable, use a crimp tool, a vice or a pair of pliers with parallel jaws.
See page 12-2 for recommended crimping tool for ferrule.
[1] Assembled with natural plastic covered stainless steel cable.
[2] Assembled with black plastic covered stainless steel cable.

TX00.240	0.5	BALMAR 18 - 000 or DANIELS MH - 800
	0.7	
	0.9	
	1.3	
TX00.242	1.6	BUCHANAN 615 708

The best choice of precision crimp tools for highly reliable eight indenter crimping per US-MIL, IEC and DIN Specifications. Positioners have to be ordered according to contact.

Standards
IEC 60203 / DIN 41 611, Part 3 / MIL-C-22520, Class I, Type 1

Fischer Positioner

Suitable for Crimp Tool TX00.242

Suitable for Crimp Tool TX00.240

For the choice of Fischer positioner, please refer to page 4-9-3

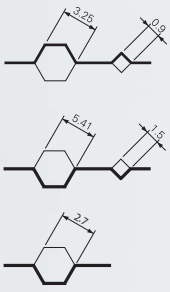
Crimp Tool for Coaxial Cable

Part Number	Description
TX00.241	ERMA 29020 precision crimp tool without dies for hexagon and square crimping. A light weight tool with handle span of only 130 mm. Weight (without dies): 0.75 kg. For crimping dies not larger than 8.23 mm across flats. Maximum crimping dies: IEC 60803-G; BSI size G.

Standards
MIL-C-22520, Class I, Type 2

Crimping Dies for Precision Crimp Tool

Suitable for Crimp Tool TX00.241



Part Number	Description
TX00.250	Special crimping dies for coaxial cables of cable group 1 (RG-174 etc.). The hexagon corresponds to IEC 60803-B.
TX00.251	Special crimping dies for coaxial cables of cable group 4 (RG-58 etc.). The hexagon corresponds to IEC 60803-D.
TX00.265	Special crimping dies for crimp ferrule of sealing caps

Table of cable groups see page 6-9.

All dimensions shown are in millimeters and are for reference only.

Contact Insertion Tool

Part Number	Contact dia.	Description
TX00.214	0.5	Tool for inserting male and female removable crimp contacts into the contact block. Especially recommended for small gauge and fragile wires.
TX00.210	0.7	
TX00.211	0.9	
TX00.273	1.3	

Material
Handle: Black POM (Delrin®)
Fork: Tool Steel, chrome plated

Contact Extraction Tool

Part Number	Contact dia.	Description
TX00.213	0.5	Tool for extracting male and female removable crimp contacts from the contact block. The sleeve of this tool is pushed over the contact, thereby releasing the contact retaining mechanism. The tool plunger is then pushed to eject the contact.
TX00.200	0.7	
TX00.205	0.9	
TX00.212	1.3	
TX00.201	1.6	

Material
Housing and Plunger: Black POM (Delrin®)
Sleeve: Stainless Steel
Slide: Tool Steel

Assembly Tool for Male Contacts with Outside Thread

Part Number	Description
TP00.001	Tool for special contacts which are inserted only after termination to a wire. To be used for: - Multipole HV Cable Receptacle 107 A034 - Coax HV Plugs 105 A005 and 105 A108 - Mixed HV Cable Receptacles 105 A020, 105 A036,105 A060 Receptacles 106 A014

Material
Stainless Steel

Length 75 mm – Inside thread M3

Assembly Tool for Female Contacts with Inside Thread

Part Number	Description
TP00.000	Tool for special contacts which are inserted only after termination to a wire. To be used for: - Multipole HV Plug 107 A034 - Coax HV Plugs 105 Z005 (right-angle only) and 105 Z049 Receptacles 105 A049, 105 A108 - Mixed HV Plugs 105 A020, 105 A036, 105 A060 and 106 A014

Material
Stainless Steel

Length 75 mm – Outside thread M1.7

13 Technical Information

Quality and Environment

Fischer Connectors ISO 9001 and ISO 14001 Certified ISO 9001 ISO 14001

- Fischer Connectors is ISO 9001 certified. Through its longstanding quality management commitment, the company targets excellence.
- Fischer Connectors' environmental management system is ISO 14001 certified. Fischer Connectors is committed to efficiently managing its waste, to preventing contamination and to reducing the environmental impact.
- Fischer Connectors is committed to protecting the health and safety of its employees, customers and visitors. Fischer Connectors complies with the requirements of OHSAS 18001 standard.

RoHS Compliant Connectors RoHS compliant

- All connectors from Fischer are RoHS compliant since July 1st 2006. The European Directive 2002/95/EC calls for the elimination of certain hazardous materials - cadmium, lead, mercury, hexavalent chromium, polybrominated biphenyls (PBB), and polybrominated diphenylethers (PBDE) - from electrical and electronic equipment including connectors.

Fischer Connectors REACH Compliant REACH

- Fischer Connectors took all necessary measures to be in conformity with the European Directive REACH (Directive 1917/2006/CE, Regulation on Registration, Evaluation, Authorisation and Restriction of Chemicals).
- Fischer Connectors does not manufacture or import chemicals, thus does not need to do any registration or pre-registration. Today, all our business partners gave us sufficient guarantees that the materials and products used in the manufacturing of our connectors are and will be registered according to the REACH Directive.

Sony® Green Partner Qualified SONY green partner

- Fischer Connectors is Sony® Green Partner qualified for several years. This qualification is only granted by Sony® to the business partners who work continuously to maintain and upgrade their environmental management systems. This qualification emphasizes the commitment of Fischer Connectors for the environment.

Norms

Environment, Mechanical and Electrical Norms

- Fischer Connectors' standard products, as well as our products engineered to withstand extreme operational environments, are tested to strict IEC norms comparable to MIL-Specs. Fischer is performing 15 environmental, mechanical and electrical tests for each product according to IEC standards. To view cross-references table comparing IEC testing standards to MIL-Specs see **www.fischerconnectors.com/mil-specs**

- For information on norms valid for our products, visit: **www.fischerconnectors.com/technical** to download technical specifications.

Sealed and Hermetic Connectors

Metal Parts

The standard Fischer Connectors shells are nickel plated brass with natural (silver) chrome finish. Black chrome finish is available as an option; see Options pages 4-10 and 6-10. Internal piece parts are nickel plated brass. When warranted by an extreme environment, in most cases stainless steel can be substituted for all metal parts.

Metal Parts		Material			Finish	
		Designation	ISO	Standard	Designation	Standard
Body Shell		Brass	CuZn39Pb3	CW614N UNS C 38500	Chrome over Nickel	SAE-AMS2460
Cable Clamps, Nuts and other Inner Parts		Brass	CuZn39Pb3	CW614N UNS C 38500	Nickel	SAE-AMS-QQ-N-290 SAE-AMS2404
Contacts	Male (solder)	Brass	CuZn39Pb3	CW614N UNS C 38500	1 µm Gold over Nickel	MIL-DTL-45204D Type 1 + ASTM B488
	Female, Male (crimp)	Bronze	CuSn4Zn4Pb4	CW456K ASTM B 139, UNS C 54400		

Other material and surface treatments are available on request

Insulator and Sealing

Contact blocks and other insulators for our standard connectors are manufactured from high performance engineering plastic materials. The standard materials of each connector series are listed under Electrical & Contact Specifications in Section 4 through 10. Ceramics and other dielectrics are available on special order.

Insulator and Sealing	International Synbol	Flammability
Insulator	PEEK - PTFE - PBT	UL 94 V-O
Interface O-rings (Receptacles)	Viton® EPDM	UL 94 V-O UL 94 HB
Sealant Material (Receptacles) - IP68 - Hermetic	Silicon compound Epoxy compound	UL 94 V-O UL 94 HB
Cable Sealing (Plugs) - IP68	TPE-S	UL 94 HB

Our products are RoHs compliant and conform with the EC Directives 2002/95/EC.

Elastomer Seals

Sealed connectors are fitted with O-rings and cable sealing gaskets. The standard materials are:

- Viton® for O-rings
- TPE (Thermoplastic Elastomers) for cable seals, protective sleeves and strain reliefs.

Please note that as an elastomer reaches its lower temperature limit, it becomes rigid and loses the flexibility required for connector mating and unmating. If sealed connectors have to be manipulated at low temperatures, the O-rings in the mating area has to be of a material with a considerably lower temperature limit.

The elastomers listed below represent presently available materials, which Fischer can substitute when required by an application. Not all materials are available in all shapes and sizes so please check with us for details.

Compound and Trade Name	Chemical Name	Excellent Resistance to
FPM (Viton®)	Fluoro Elastomer	Acids, weather, ozone, fuels, mineral and silicone oils, high vacuum, gamma rays
EPDM, EPM or EPR	Ethylene Propylene Diene Elastomer	Alcohol, weather, hot water, vapour, brake fluids, detergents, gamma rays
TPE-S, TPE-O (Thermoplastic Elastomer)	Styrene-Ethylene-Butadiene-Styrene	Very resistant, except to aromated and chlorinated hydrocarbons

Performance and Standard

Characteristic	Product Type	Value	Standard
Sealing Performance	Unsealed Connectors (mated)	IP50	IEC 60529
	Plugs (mated) with General Purpose Sealed Clamps[1]	IP68 IP69K[2]	
	Receptacles "U" Body Style	IP68	
	Receptacles "E" Body Style	Hermetic: Tested: $<10^{-8}$ mbar l/sec.[3] IP69K[2]	
Operating Temperature Range	See details on page 13-5	See details on page 13-5	IEC 60512-6-11 i+j IEC 60068-2-14-Nb
Corrosion Resistance		Salt mist, 96 hours, 5% salt solution, 35°C	IEC 60068-2-11 Test Ka MIL-STD-202 Method 101 Condition A
Endurance		10'000 mating cycles	IEC 60512-5-9a EIA-364-09
Vibration		10 to 2000 Hz, 1.5 mm or 15g, 12 sweep cycles per axis, 20 minutes per 10-2000-10 Hz sweep cycle, no discontinuity > 1us	MIL-STD-202 Method 204 Condition B
Radiation Resistance[4]	Unsealed Connectors	PEEK: 10^6 Gy(=100M Rads)	
	Sealed Receptacles "E"	Viton® O-Rings 10^5 Gy (=10M Rads)	

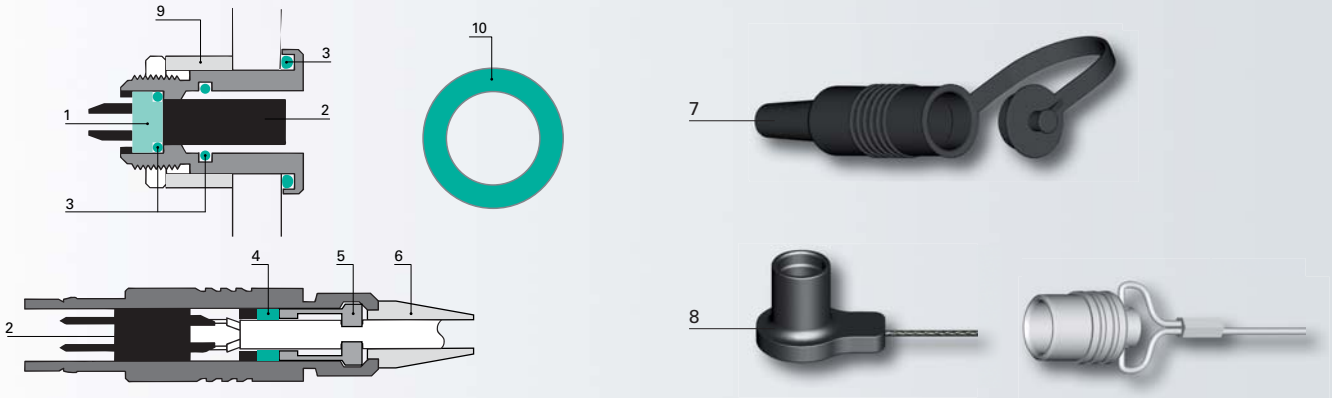
[1] The sealing performance can be affected by the long term quality of the cable.
[2] Protected against the effects of high-pessure liquids. The test requirements for IP69K exist only in DIN 40050-9, the German version of IEC 60529.
[3] If needed, the residual leakage can be tested 1 minute for values < 10^{-9} mbar l/s or < 10^{-4} Pa cm^3/s.
[4] For information only. Not tested by Fischer Connectors.

Most of our connectors are completely sterilizable in autoclave, Cidex® , EtO, gamma radiation, Steris® or Sterrad®. Please contact us for more details.

For more information on norms valid for our products, visit: **www.fischerconnectors.com/technical** to download technical specifications.

Operating Temperature Range

The temperature ranges quoted by the manufacturers of the plastic materials are usually the absolute maximum values. When exposed to the mechanical and electrical stresses present in a connector, these values are often unrealistic. If a composite connector system including accessories is used, then the item with the lowest temperature performance will dictate the operating temperature limit of the system. See in below table our recommended operating temperature ranges.



Ref.	Component	Material		Operating Temperatures
1	Sealant	"U" Type		-55°C to +200°C
		"E" Type		-65°C to +150°C
2	Insulator	PEEK		-65°C to +200°C
		PTFE (Teflon®)		-65°C to +160°C
		PBT		-65°C to +135°C
3	Standard O-rings	FPM (Viton®)		-20°C to +200°C [1]
	Interface O-rings (Option)	EPDM		-50°C to +160°C [2]
4	Cable Clamp Seal	TPE		-70°C to +130°C
5	Cable Clamp	Standard	Brass	
		High Voltage Connectors	POM	-40°C to +100°C
6	Cable Strain Relief	TPE		-60°C to +100°C
		VMQ - Silicone Rubber		-60°C to +180°C
7	Protective Boots	TPE		-60°C to +100°C
8	Sealing Caps	Metallic	Plug: Brass with FPM O-ring	-20°C to +200°C [1]

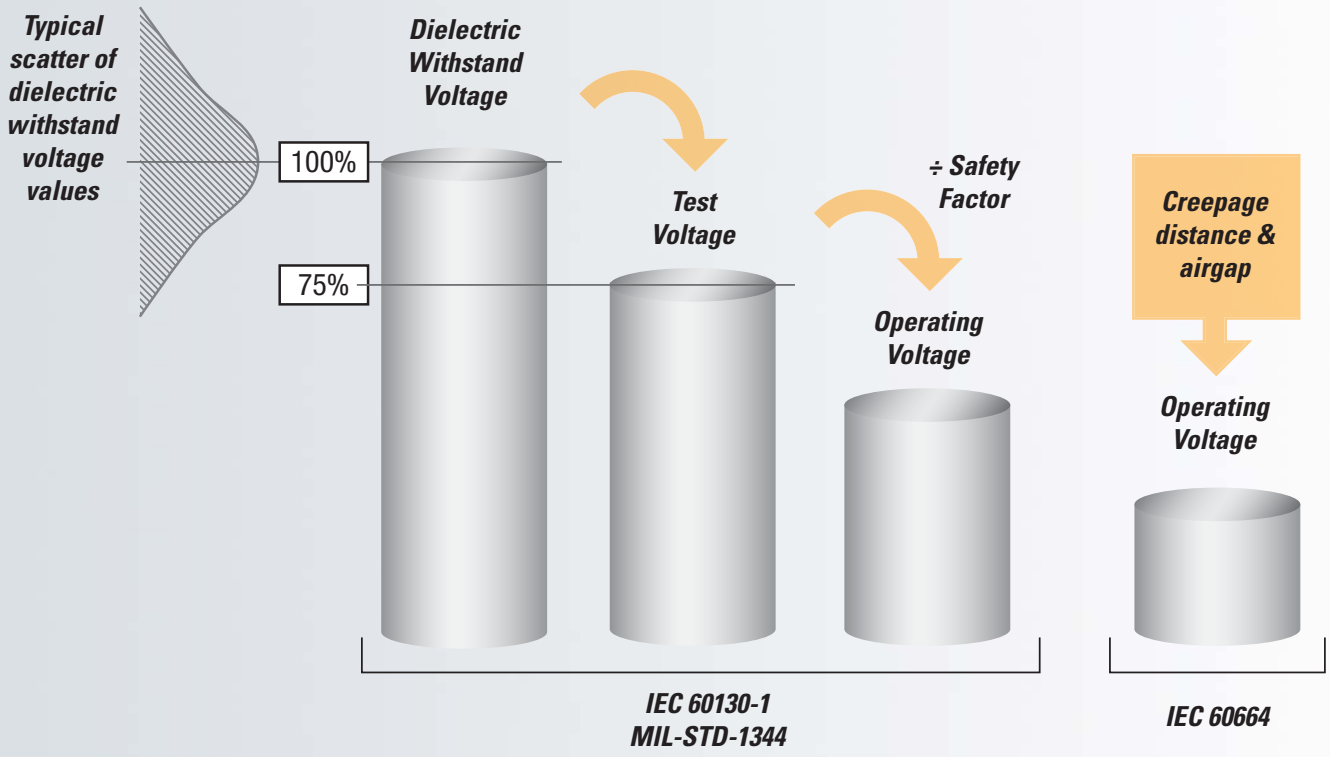
Test Voltage and Operating Voltage

Definitions

Dielectric Withstand Voltage is the breakdown value of the component in a destructive test.

Test Voltage : Voltage level at which the connector is tested during qualification test. This value represents the upper physical limit. It is usually set at 75% of dielectric withstand value.
Fischer Connectors always applies this ratio to get reliable results even when breakdown values exhibit the large scatter typical in high voltage testing.

Operating Voltage (or Rated Voltage): Voltage under which the connector will actually work in the equipment over the normal expected lifetime and in typical environmental conditions. This value depends on connector design and specific operating environment as well as on safety requirements.



Determination of Operating Voltage

General Recommendation for Connectors in Common Applications

IEC 60664: Generic standard recommended for typical electrical devices. It takes into account long term degradation of insulating materials under variable aggressive environmental influences and uses creepage distance as calculation basis for the operating voltage.

Fischer Connectors recommends the use of IEC 60664 in the general multipole connector specifications, unless other more specific standard or regulations are applicable to the design. For example, IEC 60601 provides adequate special guidelines for medical devices.

For cases where the connector "on-time" or duty cycle is low, and there is little exposure to environmental factors, for example scientific instruments or similar equipment, other previous standards such as former IEC 60130-1 can be used. It does not take into consideration either long term environmental effects, or the specific behaviour of different insulator materials and uses test voltage as calculation basis for the operating voltage

Former IEC 60130-1 recommends to set the operating voltage at

- 0.33 x test voltage for 500V < test voltage < 3kV
- 0.66 x test voltage for test voltage ≥ 3kV

Similar recommendations are provided in EIA-364-20 (MIL-STD-1344 method 3001 superseded).

For more details see **www.fischerconnectors.com/technical**

Sealing Standards

The IP classification system (IP rating) provides a reliable method of comparing relative levels of sealing between various connector products. The protection level offered by a typical envelope is described in IEC 60529.
While the first number describes the level of protection from solid objects, the second one relates to protection from moisture.

Example :

IP68 = IP Letter Code ——— IP
1st Digit ——— 6
2nd digit ——— 8

1st Digit	Protection from Solid Objects	2nd Digit	Protection from Moisture
0	Non Protected	0	Non Protected
1	 Protected against solid objects greater than 50 mm	1	 Protected against dripping water
2	 Protected against solid objects greater than 12 mm	2	 Protected against dripping water when tilted up to 15°
3	 Protected against solid objects greater than ø 2.5 mm	3	 Protected against spraying water
4	 Protected against solid objects greater than ø 1.0 mm	4	 Protected against splashing water
5	 Dust protected	5	 Protected against water jets
6	 Dust tight	6	 Protected against heavy seas
Note: EN 60529 does not specify sealing effectiveness against the following: - Mechanical damage of the equipment - Risk of explosions - Certain types of moisture conditions, e.g. those that are produced by condensation - Corrosive vapours - Fungus - Vermin		7	 Protected against immersion effects
		8	 Protected against submersion (See note)
		9K	 IP69K is a definition from German DIN 40050-9. It is an additional sealing level defined to protect an envelope from intense water jets for short duration (Typically for high pressure cleaning).

Environmental tests performed during design and qualification of Fischer Connectors environmentally sealed products are standardized to IP68 at a depth of 2 m and duration of 24 hours.
Fischer Connectors hermetically sealed products achieve IP69K.

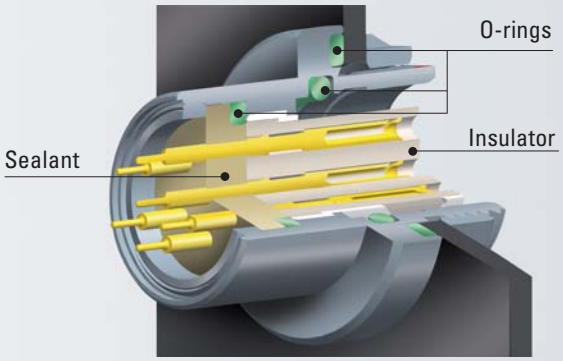
Selecting the right connector for an application is an important and challenging process, even more so when the application involves sealing the connector against various environmental conditions.

Sealing Categories

Fischer Connectors provides solutions for:

- Environmental sealing
- Hermetic sealing
- High pressure

Each requires different sealing levels and therefore, different connector solutions.



Environmental Sealing

Typically for outdoor applications, exposed to rain, dust and other aggressive environments. Exposure is generally limited in time and pressure.

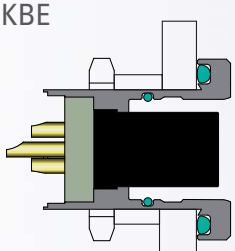
Recommended Fischer Connectors Solutions

Fischer Connectors offers a complete range of environmentally sealed connectors. These products are designed to offer sealing up to IP68.

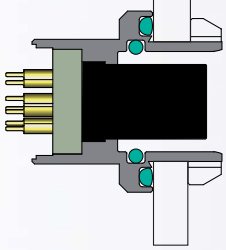
Panel mounted connectors, sealed mated and unmated:

DEU, DBEU, DBPU, DBPLU, WDE, SFU, SFPU, DKE and DKBE

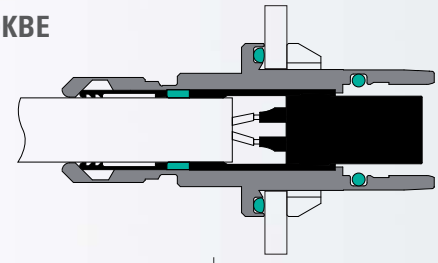
DEU



DBPU



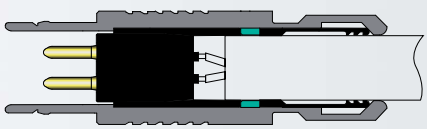
DKBE



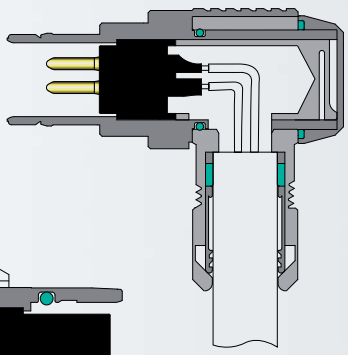
Cable mounted connectors with appropriate sealed clamp sets:

S, SC, SOV, SA, SV, WSO, KE, DKE and DKBE

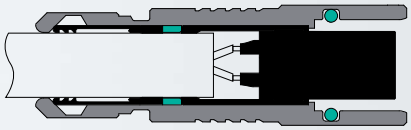
S



WSO



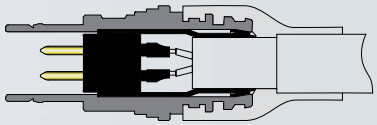
KE



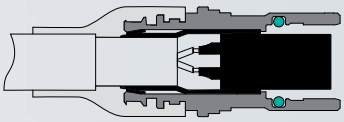
Cable mounted connectors with appropriate cable assembly solution:

SS, SSC and KSE

SS



KSE



Hermetic Sealing

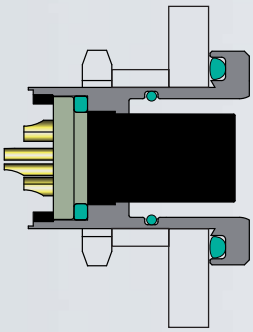
Typically for applications requiring gas tightness like vacuum applications and pressurized vessels, immersed for long period of time or exposed to strong jets.
100% of the hermetic pieces are tested with a leak testing instrument to ensure a leak smaller than 10^{-8} mbar l/s, or even 10^{-9} mbar l/s on request.

Recommended Fischer Connectors Solutions

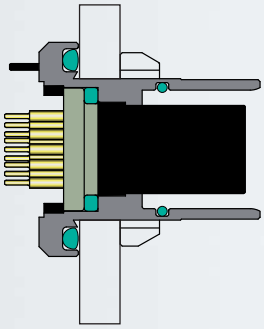
Fischer Connectors offers a complete range of hermetically sealed connectors.
These products undergo a 100% leak test and are designed to offer sealing up to IP69K.

Panel mounted connectors, sealed mated and unmated:
DEE, DBEE, DBPE, DBPLE, WDE, SFE, SFPE.

DEE



DBPLE



High Pressure Sealing

Typically for applications exposed to liquids under high pressure, like deep submarine applications.

Level of sealing required is extreme in order to withstand exposure to high pressure during an extended period of time.

Recommended Fischer Connectors Solutions

Fischer Connectors design centre can assist customers for such special requests.
Customized product developments can be proposed, combining hermeticity with high strength mechanical design.

Limitations

The recommendations provided in this catalogue are given only with the intention of assisting with the choice of a connector with respect to its particular application.
It remains always the responsibility of the equipment manufacturer, and not the connector supplier, to determine the appropriate technical standards, as well as the necessary safety factors for a given application.

Sealing Techniques

The degree of protection needed defines the sealing technique to use.

There are various degrees of sealing protection available for connectors, these can be broadly classified into two groups:

- External sealing, achieved through a protective device such as a flexible boot,
- Internal sealing, utilizing some combination of o-rings or potting material.

External Sealing

Most applications requiring protection against only dust or splashing liquid can use an unsealed connector with a flexible protective boot.
When not in use, an unmated connector can be sealed with a protective cap. Using protective caps and boots is often a cost-effective solution to prevent mud, dirt and other foreign matter from fouling, shorting or otherwise damaging contacts and connector locking mechanisms. In addition, mechanical damage caused by impact on hard surfaces can be minimized by using covers and boots. This is particularly well appreciated in the broadcast industry, where outdoor shooting conditions are very rough.

Caps, for receptacles, and flexible boots, for plugs, represent a cost-effective solution to protect interconnections from environmental conditions.

O-rings, here in green, are an efficient mechanical sealing method.

Internal Sealing

Applications requiring exposure to environmental factors like pressure, vacuum, liquids or steam demand a greater degree of sealing than that provided by covers and boots: the connector needs to be intrinsically sealed.
Elastomer o-rings are one of the most common mechanical gaskets used in connector technology. Designed to be seated in a groove and compressed between two parts – for example between two mating connectors, between a connector and its mounting surface (typically a chassis-panel), or between a cable and its attached connector – o-rings create a seal at the interface.

For the contacts of a panel mounted connector, the sealing technique generally applied exploits potting material, such as epoxy resin, rubber compounds, or for the highest levels of impermeability, glass. Sealing this area of the connector guarantees that no fluid or other contaminant will enter an enclosure through the connector, even when the connector is unmated. These sealing methods can achieve reliable and economical sealing performance for deep water applications or ultra vacuum with leakage rates below 10^{-8} mbar l/s.

Close-up of the rear of a receptacle, in which potting material was injected.

Warranty

A limited warranty applies to Fischer Connectors SA products. Except for obligations assumed by Fischer Connectors SA under warranty, Fischer Connectors SA, its subsidiaries, and agents, will not be liable for any loss, damage, cost of repairs, incidental or consequential damages of any kind, whether or not based upon express or implied warranty, contract, negligence, or strict liability arising in connection with the design, manufacture, sale, use, or repair of the products.

Fischer Connectors SA warrants that each product sold is in accordance with Fischer specifications, drawings, samples, or data in effect on the date of receipt of the order and that each unit is free from defects in material and workmanship.

Fischer's liability under this warranty is limited to the repair or replacement of any unit which proves to be defective in material or workmanship under normal use or service within one year from date of shipment, provided the unit is returned at purchaser's expense to seller's shipping point. No material is accepted for analysis, replacement or repair without the written agreement of Fischer Connectors SA, or its subsidiaries or agents.

This warranty is in lieu of all other warranties, expressed or implied.

All of the information included in this catalog, including any other illustrations and documentation which may be provided by Fischer Connectors SA, is believed to be accurate at the time of printing. It is recommended, however, that users should independently evaluate the suitability of each product for their intended application.
Fischer Connectors SA makes no warranties as to the accuracy or completeness of the information, and disclaims any liability regarding its use.

Security Disclaimer

The values given in this catalogue are measured under standard environmental conditions.
Applications in non-standard environmental conditions may require additional testing and values that may vary from those listed in the catalog.

Some connectors shown herein are intended for use in areas of high frequencies and high voltages.
Suitable safety precautions should be taken to ensure that people do not come into contact with powered conductors during installation and operation.

Every effort has been made to ensure that this catalogue is accurate at the time of printing.
Fischer Connectors reserves the right to make any modification to its products without notice and without obligation to replace or manufacture obsolete items.
