

3M™ Privacy Filters for Laptops, Netbooks and Desktop Monitors

Any idea who's been looking at your screen today?

Did you know there is a 4 in 5 chance that someone, somewhere, will have been trying to snatch a glance at your laptop, phone or PC today. Thankfully, 3M has a fast, affordable solution that will help protect your data instantly, whichever electronic devices you're using. **Fit a 3M Privacy Filter, problem solved. Simple.**

How do 3M Privacy Filters work?

3M Privacy Filters block out the view from either side of your screen without blurring or distortion, enabling you to safely continue viewing confidential data and personal files in public – all everyone else will see is a black screen (or, with our new gold filters, their own golden reflection!). Our filters range from removable protective films for mobile phones and PDAs, to a flexible, hard-wearing film that fits easily over the screens of PCs, laptops and netbooks.

Laptop filters

Above Left: Without 3M™ Privacy Filter, on-screen data is easily visible
Above Right: By simply inserting a 3M™ Privacy Filter, confidential information remains... confidential (Gold filter shown)

Gold or Black? Two routes to personal privacy.
When originally launched, 3M blackout privacy filters set a new standard for on-screen data protection. But now, our new Gold Privacy Filters provide twice the level of effective privacy protection and a further 14% of clarity. You see more clearly than ever, while on-lookers see nothing but a vibrant reflective golden screen!

- Unique attachment system means the filter can remain inside the laptop, even when closed
- Easily removable to allow for screen sharing when privacy not required
- LCD screen protection

Screen Size (ins)	Standard 4:3	Standard 5:4	Widescreen 16:10	Widescreen 16:9
