Swissgear Ibex 17" Backpack

Swissgear Ibex 17" Backpack

Ever feel like you're carrying the entire office around with you? Well, let the Swissgear Ibex take the weight off your shoulders. With space for a larger laptop as well as all your computer accessories, documents and business essentials, the Swissgear Ibex provides comfort and convenience no matter how much gear you are carrying.

Superior Protection for your laptop

Keeping your laptop safe is a priority for any good laptop bag and the Swissgear Ibex is no exception. It features a padded computer pocket to keep your laptop secure. Alongside the padded computer pocket sits an additional compartment for storing your mouse and leads.

Enjoy the journey

Whether you are commuting or jetting off on a business trip, the Swissgear Ibex has a range of features that make travelling a breeze.

A stabilising platform in the base keeps the backpack upright ensuring that your laptop and other belongings stay securely in place and at the rear of the backpack, you'll find a useful hanging handle that doubles as a trolley strap. Extra durable material is used on the base of the backpack to provide even more protection.

Versatile space

With the Swissgear Ibex, you'll never have a problem finding a particular item. The wide range of different pockets ensures that there's a place for everything. The 'essentials organiser' pocket is perfect for storing all of your small but important items such as business card, wallet and mobile phone. There are also compartments large enough to carry A4 folders or even a change of clothes and toiletries – perfect for those overnight business trips. Useful side mesh and zippered pockets provide even more storage options.

Quick pocket

A particularly useful compartment is the Swissgear Ibex's Quick Pocket. Located towards the top of the backpack, this pocket gives you easy access to the items that you need to keep close to hand such as tickets, travel cards, keys and cash.

Music on the go

Listening to music can make any journey more enjoyable and the Swissgear Ibex features a clever music pocket with a headset port. Simply store your iPod or MP3 player in the specially designed pocket and then feed your headphones through the headset port to listen to music whilst your player sits securely in the bag.

Ultimate Comfort

The Swissgear Ibex features a dual handle system giving you versatile carrying options. When carrying in the traditional backpack style the adjustable shoulder straps give great comfort and fit whilst their shock-absorbing quality distributes weight evenly. Alternatively, you can carry the Swissgear Ibex using the reinforced ergonomic handle on the top. This is perfect for those times when it's more practical to carry the backpack by hand such as when boarding a plane or train.

Keep your cool

When you're on the go it's important to keep cool and comfortable. With this in mind, the Swissgear Ibex features air-flow back padding to increase the air-flow between your body and the fabric. This keeps your back cool – even when you're carrying a full pack.

Quality guaranteed

The Swissgear Ibex is designed by Wenger, the makers of the Genuine Swiss Army Knife™. The same innovation, quality and attention to detail that are inherent to the iconic knife are incorporated into all Wenger products including the Swissgear Ibex backpack.

Built to last

The Swissgear Ibex has been carefully crafted to give you years of use and is supported by a limited lifetime warranty that ensures worry-free usage throughout the life of the product.

SWISSGUARD protection

One of the most important functions of a good laptop case is to protect your computer from accidental damage. To ensure this, the Swissgear Ibex features the superior SWISSGUARD protection system. The triple-layer foam shields the corners and increases shock absorption to keep your laptop and other belongings safe.

Premium materials

The Swissgear Ibex is made from high-quality materials that will maintain their good looks for years to come. And with enhanced durability, the robust fabric can sustain the rigours of day-to-day use without showing signs of fatigue.
