STRATO switch mode driver technology is designed to generate one constant current output from a wide range AC input. The size and performance of these products make them the ideal choice for LED lighting applications.

- Wide Range Input: 120, 240, or 277 VAC
- Constant Current Output for Powering LEDs Directly
- High Efficiency ~90%
- Compact Design
- Adjustable Output Current Settings
- Dimmable with (0-10VDC) Input
- Temperature Protection for LEDs
- Convection Cooled
- Long Life
- Wide Temperature Range
- ROHS Compliant

Applications and Benefits

STRATO is designed for directly powering LEDs in commercial & industrial lighting applications.

The product’s extremely small form factor and high efficiency makes it suitable for integration into most light fixtures and standard electrical junction boxes.

A host of integrated control features:
- Simplify Light Fixture Design
- Ease Safety Approval Cycles
- Lower Fixture Complexity and Cost

**STRATO’s versatile control features:**
- A Temperature sensor (NTC thermistor) protects the LED from over-temperature.
- A 2 wire Dimming input provides both output trimming, and 10-100% Iout Dimming function.
Output Controls: Two dedicated inputs provide control and safety features.

**Dim:** A dimming input can be used to adjust the output setting via a standard commercial wall dimmer, an external control voltage source (1 to 10VDC), or a variable resistor when using the recommended number of LEDs. The input permits 100% to 80% trimming and 100% to 10% dimming. This permits active control of the driver and may be used for trimming and dimming purposes. See Roal Strato Application Note 1 for details on functionality and compatibility with standard industry practices.

**Ts:** The Temperature input may be connected to a 100k NTC thermistor. The thermistor should be located on the LED assembly to monitor its temperature. If the temperature exceeds a predetermined set point, the output current of the module is automatically reduced to regulate the temperature of the LED at a safe level. See Roal Strato Application Note 1 for details.

Performance Requirements: Meets the requirements of IEC 62384; control gear for LED modules

EMI and EMC:

- Conducted and Radiated EMI: EN55015 Class B, FCC 47CFR Part 15 Class B
- Susceptibility: EN61000-4-2, -3, -4, -5, -6, and -11
- ANSI c62.41-1991 Category A1, 2.5kV Ringwave

Subject to Change without Notice
Mechanical Details

Packaging Options: Partially Encapsulated with ABS plastic body enclosure

I/O Connections: Flying leads, 18AWG on power leads, 20AWG on control leads, 152mm long, 105C Rated, Stranded, Stripped by approximately 9.5mm and tinned

Mounting Details: Universal Mounting Clips, and 6 mounting locations per package allow installer to choose the most suitable position for the mounting feet.

Ingress Protection: IP64 Rated

Outline Drawings

Package: RSLD035

Max Dimensions: 70mm x 40mm x 27mm, 2.76” x 1.57” x 1.06”

Volume: 75.6 cm³, 4.59 in³

Mass: 142 grams, 5 Oz.
Environmental

Operating Temperature: -30 to +90°C case temperature without derating
Operating Relative Humidity: 5% to 95%, non condensing
Storage Temperature: -40°C to +85°C
Surface Temperature: Exposed surfaces <90°C under all operating conditions
Cooling: Convection cooled

Safety Agency Approvals

UL60950-1 Recognized, UL8750 recognized Class 2 Output. Approved for damp locations.
EN61347-2-13 electronic control gear for LED Modules
ENEC Mark and CE Mark for EU.

Notes Regarding European (ENEC) approvals:

1. All models with Vout < 25VDC are SELV equivalent per EN61347-2-13.
2. All models with Vout > 25VDC are considered “Isolated Control Gear” per EN61347-2-13

</table>

Recommended number of LEDs is based on a typical Vf of 2.5 to 3.5V during normal operation and temperature. Operation outside of the voltage window is not guaranteed. Care should be taken during the design phase to assure good alignment between LED string voltage and the dynamic output range for the driver. See application notes.

* Certain models have lower output set points for compatibility with specific LED modules and arrays. As a result, these units will exhibit lower efficiency and lower power factor than specified herein.
