

TM11/TM21/TM31 Hand Tool:

Issue: 05/2011

The FB-TM21 hand tool from Hirose is a user friendly tool suitable for Hirose's TM11, TM21 & TM31 series. The unique tool features a ratchet mechanism for quick and easy assembly of

Hirose's RJ45 modular plugs. The innovative design of the tool allows high quality simultaneous crimping of the crimp contact and the cable clamp saving time. The prepared connector cable assembly is simply inserted into the tool, a audible snap confirms the connector is correctly positioned and locked into place, the termination operation is then completed by releasing and closing the ratchet. The tool comes complete with changeable crimpers and anvils to terminate TM11, TM21 & TM31 series.
