Personal precautions, protective equipment and emergency procedures:

Avoid skin and eye contact.

Environmental precautions:

Do not let product enter drains.

Methods and material for containment and cleaning up:

For small spills wipe up with paper towel and place in container for disposal.
For large spills absorb onto inert absorbent material and place in sealed container for disposal.
Wash spillage site thoroughly with soap and water or detergent solution.

See advice in chapter 8

SECTION 7: Handling and storage

Precautions for safe handling:

- Use only in well-ventilated areas.
- Avoid skin and eye contact.
- Prolonged or repeated skin contact should be avoided to minimise any risk of sensitisation.

Hygiene measures:

- Good industrial hygiene practices should be observed.

Conditions for safe storage, including any incompatibilities:

- Store in a cool, well-ventilated place.

Specific end use(s):

- Epoxy adhesive

SECTION 8: Exposure controls/personal protection**Control parameters:****Exposure controls:**

Respiratory protection:

- Use only in well-ventilated areas.

Hand protection:

- The use of chemical resistant gloves such as Nitrile are recommended.
- Please note that in practice the working life of chemical resistant gloves may be considerably reduced as a result of many influencing factors (e.g. temperature). Suitable risk assessment should be carried out by the end user. If signs of wear and tear are noticed then the gloves should be replaced.
- Chemical-resistant protective gloves (EN 374).
- Suitable materials for short-term contact or splashes (recommended: at least protection index 2, corresponding to > 30 minutes permeation time as per EN 374):
 - nitrile rubber (NBR; ≥ 0.4 mm thickness)
- Suitable materials for longer, direct contact (recommended: protection index 6, corresponding to > 480 minutes permeation time as per EN 374):
 - nitrile rubber (NBR; ≥ 0.4 mm thickness)
- This information is based on literature references and on information provided by glove manufacturers, or is derived by analogy with similar substances. Please note that in practice the working life of chemical-resistant protective gloves may be considerably shorter than the permeation time determined in accordance with EN 374 as a result of the many influencing factors (e.g. temperature). If signs of wear and tear are noticed then the gloves should be replaced.

Eye protection:

- Wear protective glasses.

Skin protection:

- Wear suitable protective clothing.
