Substances without classification may have community workplace exposure limits available.
### 4. First aid measures

**Inhalation:**
Move to fresh air. If symptoms persist, seek medical advice.

**Skin contact:**
Rinse with running water and soap.
Seek medical advice.

**Eye contact:**
Rinse immediately with plenty of running water (for 10 minutes). Seek medical attention if necessary.

**Ingestion:**
Rinse out mouth, drink 1-2 glasses of water, do not induce vomiting.
Seek medical advice.

### 5. Fire fighting measures

**Suitable extinguishing media:**
Carbon dioxide, foam, powder

**Special protection equipment for firefighters:**
Wear self-contained breathing apparatus and full protective clothing, such as turn-out gear.

**Hazardous combustion products:**
Oxides of carbon, oxides of nitrogen, irritating organic vapors.

### 6. Accidental release measures

**Personal precautions:**
Avoid skin and eye contact.

**Environmental precautions:**
Do not let product enter drains.

**Clean-up methods:**
For small spills wipe up with paper towel and place in container for disposal.
For large spills absorb onto inert absorbent material and place in sealed container for disposal.
Wash spillage site thoroughly with soap and water or detergent solution.

### 7. Handling and storage

**Handling:**
Use only in well-ventilated areas.
Avoid skin and eye contact.
Prolonged or repeated skin contact should be avoided to minimise any risk of sensitisation.

**Storage:**
Store in a cool, well-ventilated place.

### 8. Exposure controls / personal protection

**Components with specific control parameters for workplace:**

**Respiratory protection:**
Ensure adequate ventilation.
Do not inhale vapors and fumes.
Hand protection:
Avoid skin-contact.
Chemical-resistant protective gloves (EN 374).
Suitable materials for short-term contact or splashes (recommended: at least protection index 2, corresponding to > 30 minutes permeation time as per EN 374):
nitrile rubber (IIR; >= 0.4 mm thickness)
Suitable materials for longer, direct contact (recommended: protection index 6, corresponding to > 480 minutes permeation time as per EN 374):
nitrile rubber (IIR; >= 0.4 mm thickness)
This information is based on literature references and on information provided by glove manufacturers, or is derived by analogy with similar substances. Please note that in practice the working life of chemical-resistant protective gloves may be considerably shorter than the permeation time determined in accordance with EN 374 as a result of the many influencing factors (e.g. temperature). If signs of wear and tear are noticed then the gloves should be replaced.

Eye protection:
Avoid eye contact.
Tightly fitting safety goggles

General protection and hygiene measures:
Good industrial hygiene practices should be observed.
