Item # 26700-213, Cradle Stand

\$25.00

Cradle Stand

Our cradle stand includes base unit with two insert adaptors providing three "hands free" fixed working distance and magnification options. Ideal for collectors, hobbyists, graphic artists as well as in the home and classroom.

The stand is designed so that the Mighty Scope simply slides into either the base itself for near inspection/higher magnification or into one or both of the "stackable" insert adaptors for greater working distance/lower magnification. When using a base+single adaptor an entire USA penny can be viewed while using the base+both adaptors allows an entire USA quarter can be viewed. The clear acrylic cutaway base design allows easy accessibility of tools and light to the observed object.

Working distance(WD)/magnification table:

Base w/o adaptor ----- 0.58 inches WD from object = 40x magnification

Base + 1 Adaptor ----- 1.6 inches WD from object = 25x magnification

Base + 2 Adaptors ----- 2.40 inches WD from object =18x magnification

Dimensions: 3 1/4" x 3 1/4" x 3"

Please note this cradle stand will not work with our 500x model
