

## Very low drop voltage regulators with inhibit

### Features

- Very low dropout voltage (0.4V)
- Very low quiescent current (typ. 50  $\mu$ A in OFF MODE, 500  $\mu$ A in ON MODE)
- Output current up to 500 mA
- Logic-controlled electronic shutdown
- Output voltages of 1.5; 2.5; 3; 3.3; 4; 5; 5.2; 6; 8
- Internal current and thermal limit
- Only 2.2  $\mu$ F for stability
- Available in  $\pm$  2% accuracy at 25  $^{\circ}$ C
- Supply voltage rejection: 70 db (typ.)
- Temperature range: -40 to 125  $^{\circ}$ C

suitable for Low Noise, Low Power applications and specially in battery powered systems.

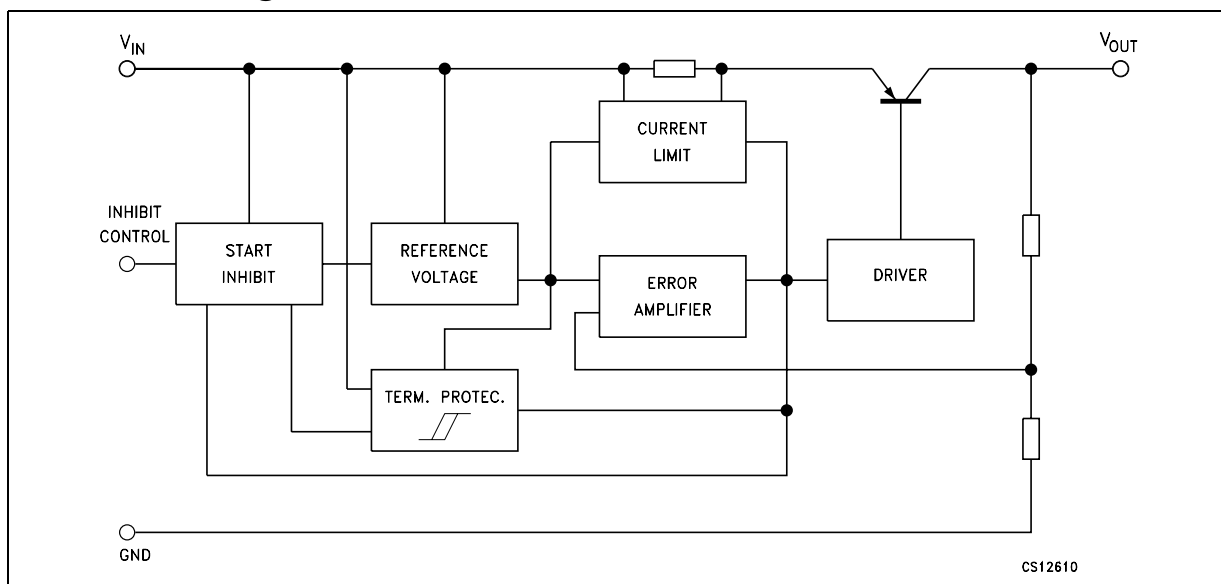

A Shutdown Logic Control function is available (pin 5, TTL compatible). This means that when the device is used as a local regulator, it is possible to put a part of the board in standby, decreasing the total power consumption. It requires only a 2.2  $\mu$ F capacitor for stability allowing space and cost saving.

### Description

The KF00 series are very Low Drop regulators available in SO-8 package and in a wide range of output voltages.

The very Low Drop voltage (0.4V) and the very low quiescent current make them particularly

## 5 Package mechanical data

In order to meet environmental requirements, ST offers these devices in ECOPACK<sup>®</sup> packages. These packages have a Lead-free second level interconnect. The category of second Level Interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: [www.st.com](http://www.st.com).
