3 Button Optical Scroll Mouse

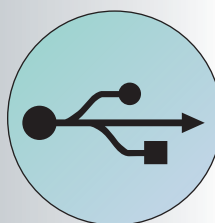

The Computer Gear USB optical scroll mouse is the essential accessory for any Desktop PC, Laptop or Netbook.

Built with the latest optical technology it works on a variety of surfaces. The 800dpi resolution creates accurate, fast and precise movement. With no ball or moving parts to collect dust or dirt less cleaning is required and sticking is eliminated.

Featuring an innovative extra wide scroll wheel with rubberised coating for comfort and none slip use aiding for easy scroll essential with applications such as the internet. A rubberised coating has also been added to the sides of the mouse for a better grip. Together with the sleek contoured shape this mouse is perfect for all PC users.
