### **Recommendations:**

Specification Table

High cooling capacity from a small surface and long lifetime in power cycling applications with change of current polarity Operation temperature up to 90°C for long lifetime; up to 110°C for short periods With operation current close to 0.5 I max. extremely high COP (coefficient of performance possible)

Preferable application; high cooling capacity at high temperatures / cycling

Thot =  $27^{\circ}C$ 

Epoxy sealed for moisture protection
