

Conversion Kits 1:1 and 2:1 ratio

The Loctite Caulking Gun Conversion Kit provides an inexpensive means of converting a household caulking gun into a hand-held meter-mix dispenser. Simply insert the converter into a household caulking gun, and you're ready to go.

This is an ideal approach for the occasional user of 1:1 or 2:1 ratio 2-part adhesives packaged in 50 ml dual cartridges. Not recommended for high demand production line applications.
