

'T' Series TV/FM Booster Splitters

The 'T' series tvLINK compatible TV Booster Splitters are designed to amplify the TV signals in a poor signal area; as well as distributing the TV signals, including Sky Digital channel around the home. T120 and T140 (2 way and 4 way) can either be powered by the Sky Digibox or via separate mains power supply. The T180 (8 way) is only powered via a separate power supply. Each booster is designed to carry a return signal from the tvLINK back to the Sky Digibox, this allows the viewer to change channels from various locations.

- Fully compatible with the Sky Digital tvLink System
- Powered from Digibox or separate PSU
- High performance
- Compact design
- Indoor use only
- DC Inserter and PSU available for line powering
- Pack includes tvLINK booster, 5 connectors, mounting plate and installation guide
