Product Reviews

"Indispensable" by **davideo987** on 6/28/2011

Value: ★★★★★　Quality: ★★★★★

I keep a few of these around for testing troublesome IR remotes. They can get misplaced way too easily, so drill a small hole in the end of it and attach something, I use a brightly colored tie-wrap. And it'll make you feel smart, too.

"Infrared Detector" by **dkfisch** on 4/24/2010

Value: ★★★★★　Quality: ★★★★★

I have had one of these infrared detector cards for at least 15 years. I got it at the Las Vegas C.E.S. show. I have had it in my wallet since then. This easy to use tool has come in handy to many times to count. Just point any I.R. remote at the small rectangle on the card and if the remote is working the rectangle on the card will glow an orange collar. This has been a great easy to use tool . This card is a must have item when working on any I.R. systems!!!!!! Thanks, MCM..........Dan F.
