

DVI Video Leads

A comprehensive range of professional quality DVI interconnection leads that are manufactured and support the standards laid down by the DDWG (Digital Display Working Group). The DVI-D and DVI-I cables are all dual link cables, which can be used for both single and dual link applications. Dual link DVI are compatible with all graphics cards to TFT/LCD monitor applications.

- Single link types can support UXGA (1600x1200) displays
- Dual link types can support QXGA (2048x1536) displays
- Future proof for dual link (QXGA) applications
- Overmoulded connector construction

DVI-I: Supports analogue and digital TMDS transmissions

DVI-D: supports 1.6Gbit/sec transmission rates

DVI-A: supports 2.5GHz analogue RGB bandwidths
