

SLIM AV MICRO SYSTEM

FOR IPOD/IPHONE WITH AIRPLAY, INTERNET RADIO AND DLNA (BLACK/
SILVER)

Stylish, handy, wireless playback.

If you have made the switch to "digital" music listening, the X-SMC3 is a great solution. Stylish and handy in size, it's also fully compatible with today's sources for music. It works with wireless networks, and AirPlay and DLNA v1.5 are supported. This means you can place this handy system literally anywhere in your house and play directly from your computer (Mac or PC) or portable device. No cables, no hassle. And with multiple units, you can easily create your own multi-room system! Does your iPhone or iPod need charging? Just place it in the iPhone dock. You can play directly from the device once it's connected, of course. With the optional AS-BT200 Bluetooth adapter you can enjoy Air Jam, which allows you to play and share playlists from 4 different iPhone, iPad, or iPod touch devices. Or view videos on any screen via the Composite Out. An additional port for USB devices accepts WMA, MP3, MPEG4 AAC and FLAC files. FM or internet radio - this system has both. Streaming via Bluetooth is also possible (with an optional adapter). This system is available in black and silver.

iPhone is not included.
