Power supply CP-E 5/3.0

Primary switch mode power supply

Data sheet

① OUTPUT L+, L-: terminals - output

② INPUT L, N, PE: terminals - input

③ LOW: red LED - output voltage too low

④ OK: green LED - output voltage OK

⑤ OUTPUT Adjust: potentiometer - adjustment of the output voltage

⑥ Circuit diagram

Features

- Rated output voltage 5 V DC
- Output voltage adjustable via front-face rotary potentiometer “OUTPUT Adjust”
- Rated output current 3 A
- Rated output power 15 W
- Wide range input 100-240 V AC (90-264 V AC, 120-375 V DC)
- Typical efficiency of 75 %
- Low power dissipation and low heating
- Free convection cooling (no forced cooling with ventilators)
- Ambient temperature range during operation -20...+70 °C
- Open-circuit, overload and short-circuit stable
- Integrated input fuse
- Redundancy unit CP-RUD offering true redundancy, available as accessory
- LEDs for status indication

Approvals

	UL 508, CAN/CSA C22.2 No.14	Approval refers to rated input voltage U_{in}
	UL 1310, CAN/CSA C22.2 No.223 (Class 2 Power Supply)	
	ANSI/ISA-12.12 (Class I, Div. 2, hazardous locations)	
	UL 60950, CAN/CSA C22.2 No.60950	Approval refers to rated input voltage U_{in}
	GOST	
	CCC	Approval refers to rated input voltage U_{in}

Type	Description	Order code
CP-RUD	**Redundancy unit** The CP-RUD provides decoupling of two CP-E power supply units ≤ 35 V and < 5 A.	1SVR 423 418 R9000

Application

The primary switch mode power supply offers two voltage input ranges. This enables the supply with AC or DC. Furthermore it is equipped with two generous capacitors, which ensure mains buffering of at least 75 ms (at 230 V AC). That is why the devices can be used worldwide also in high fluctuating networks and battery-powered plants.

Power supply CP-E 5/3.0

Primary switch mode power supply

Data sheet

Operating mode

By means of the potentiometer „OUTPUT Adjust“ the output voltage can be adjusted within a range of 4.5 to 5.75 V DC. Thus, the power supply can be optimally adapted to the application, e.g. compensating the voltage drop caused by a long line length.

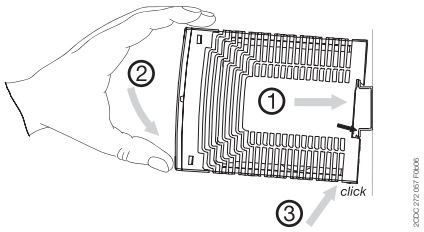
The green LED „OK“ is lightening during proper operation.

The red LED „LOW“ is lightening when the output voltage is too low.

Installation

Mounting

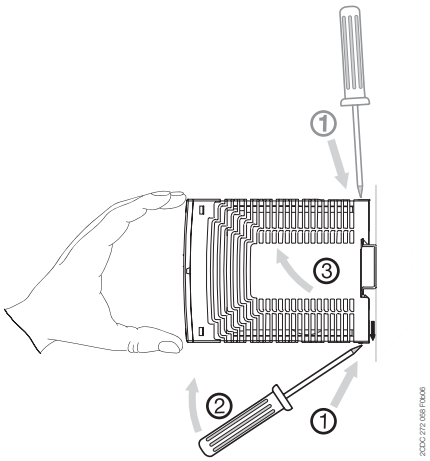
The switch mode power supply can be snapped on a DIN rail according to IEC/EN 60715 as shown in the accompanying picture. For that the device is set with its mounting rail slide on the upper edge of the mounting rail and locked by lifting it downwards.



2CDC 272 057 F0006

Demounting

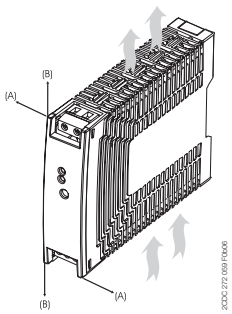
Remove the switch mode power supply as shown in the accompanying picture. For that the latching lever is pulled downwards by means of the screwdriver. Alternatively you can press the unlock button to release the device. Then in both cases the device can be unhinged from the mounting rail edge and removed.



2CDC 272 058 F0006

Mounting position

The devices have to be mounted horizontally with the input terminals on the bottom. In order to ensure a sufficient convection, the minimum distance to other modules should not be less than 25 mm in vertical and horizontal direction.



2CDC 272 059 F0006

Electrical connection

Connect the input terminals L and N. The protective earth conductor PE must be connected. The installation must be executed acc. to EN 60950, provide a suitable disconnecting device (e. g. line protection switch) in the supply line. The input side is protected by an internal input fuse.

Rate the lines for the maximum output current (considering the short-circuit current) or provide a separate fuse protection. We recommend to choose the cable section as large as possible in order to minimize voltage drops. Observe the polarity. The device is overload, short-circuit and open-circuit proof. The secondary side of the power supply unit is electrically isolated from the input and internally not earthed (SELV) and can therefore be earthed by the user according to the needs with L+ or L- (PELV).

Safety instructions and warnings

The device must be installed by qualified persons only and in accordance with the specific national regulations (e.g., VDE, etc.). The devices are maintenance-free chassis-mounted units.

Disconnect system from supply network!

Before any installation, maintenance or modification work: Disconnect the system from the supply network and protect against switching on.

Before start of operation:

Attention! Improper installation/operation may impair safety and cause operational difficulties or destruction of the unit. Before operation the following must be ensured:

- Connect to main according to the specific national regulations.
- Power supply cables and unit must be sufficiently fused. A disconnecting device has to be provided for the power supply to disengage unit and supply cables from supply mains if required.
- The protective earth conductor must be connected to the terminal PE (Protection class I)
- The secondary side of the power supply unit is not earthed and can be earthed by the user according to the needs with L+ or L-.
- Rate the output lines for the output current of the power supply and connect them with the correct polarity.
- In order to ensure sufficient air-cooling the distance to other devices has to be considered.

In operation:

- Do not modify the installation (primary and secondary side)! High current! Risk of electric arcs and electric shocks (danger to life)!
- Risk of burns: Depending on the operation conditions the enclosure can become very hot.
- The internal fuse is not user-replaceable. If the internal fuse blows, most probably the device is defective. In this case, an examination of the switch mode power supply by the manufacturer is necessary.

Attention! High voltage! Danger to life!

The power supplies contain components with high stored energy and circuits with high voltage! Do not introduce any objects into the unit, and do not open the unit. With some units of this range the output is capable of providing hazardous energy. Ensure that the service personnel is protected against inadvertent contact with parts carrying energy.

Primary switch mode power supply

Data sheet

Technical data

Data at T_a = 25 °C, U_{in} = 230 V AC and rated values, unless otherwise indicated

Type		**CP-E 5/3.0**
Input circuit		L, N
Rated input voltage U_{in}		100-240 V AC
Input voltage range		90-264 V AC / 120-375 V DC
Frequency range AC		47-63 Hz
Typical current consumption	at 115 V AC	335 mA
	at 230 V AC	210 mA
Typical power consumption		19.8 W
Inrush current limiting	at 115 V AC	10 A (max. 3 ms)
	at 230 V AC	18 A (max. 3 ms)
Discharge current	input / output	0.25 mA
	input / PE	3.5 mA
Power failure buffering time	at 115 V AC	min. 20 ms
	at 230 V AC	min. 75 ms
Internal input fuse		2 A slow-acting / 250 V AC
Power factor correction (PFC)		no
Indication of operational states		
Output voltage	OK: green LED	⎍: output voltage OK
	LOW: red LED	⎍: output voltage too low
Output circuit		**L+,L-**
Rated output voltage		5 V DC
Tolerance of the output voltage		0 ... +1 %
Adjustment range of the output voltage		4.5-5.75 V DC
Rated output power		15 W
Rated output current I_r	$T_a \leq 60$ °C	3.0 A
Derating of the output current	60 °C < $T_a \leq$ 70 °C	2.5 %/°C
Maximum deviation with	load change statical	±2 %
	change of output voltage within the input voltage range	±1 %
Control time		< 2 ms
Starting time after applying the supply voltage	at I_r	max. 1 s
	with 7000 µF	max. 1.5 s
Rise time	at I_r	max. 150 ms
	with 7000 µF	max. 500 ms
Fall time		max. 150 ms
Residual ripple and switching peaks	BW = 20 MHz	50 mV
Parallel connection		yes, to enable redundancy
Series connection		yes, to increase voltage
Resistance to reverse feed		1 s - max. 7.5 V DC
Output circuit - No-load, overload and short-circuit behaviour		
Characteristic curve of output		Hiccup-mode
Short-circuit protection		continuous short-circuit proof
Short-circuit behaviour		Hiccup-mode
Overload protection		output power limiting
No-load protection		continuous no-load stability
Starting of capacitive loads		7000 µF

Power supply CP-E 5/3.0

Primary switch mode power supply

Data sheet

Type		CP-E 5/3.0
General data		
Power dissipation		typ. 5 W
Efficiency		typ. 75 %
Duty time		100 %
Dimensions (W x H x D)		22.5 x 90 x 114 mm (0.89 x 3.54 x 4.49 in)
Weight		0.144 kg (0.317 lb)
Material of housing		Plastic
Mounting		DIN rail (IEC/EN 60715), snap-on mounting without any tool
Mounting position		horizontal
Minimum distance to other units	horizontal / vertical	25 mm / 25 mm (0.98 in / 0.98 in)
Degree of protection	housing / terminals	IP20 / IP20
Protection class		I
Electrical connection - input circuit / output circuit		
Wire size	fine-strand with wire end ferrule	0.2-2.5 mm² (24-14 AWG)
	fine-strand without wire end ferrule	
	rigid	
Stripping length		6 mm (0.24 in)
Tightening torque		0.6 Nm (5 lb.in)
Environmental data		
Ambient temperature range	operation	-20…+70 °C
	rated load	-20...+60 °C
	storage	-25…+85 °C
Damp heat		95 % RH, without condensation
Vibration (sinusoidal) (IEC/EN 60068-2-6)		10-500 Hz, 2 G, along X, Y, Z each axis, 60 min. for each axis
Shock (half-sine) (IEC/EN 60068-2-27)		15 G, 11 ms, 3 axis, 6 faces, 3 times for each face
Isolation data		
Rated insulation voltage U_i	input / output	3 kV AC
	input / PE	1.5 kV AC
Pollution degree		2
Overvoltage category (UL/IEC/EN 60950-1)		II
Standards		
Product standard		EN 61204-3
Low Voltage Directive		2006/95/EC
EMC directive		2004/108/EC
RoHS directive		2002/95/EC
Electrical safety		EN 60950-1, UL 60950-1, UL 508
Protective low voltage		SELV (EN 60950)
Electromagnetic compatibility		
Interference immunity to		IEC/EN 61000-6-2
electrostatic discharge	IEC/EN 61000-4-2	Level 4 (air discharge 15 kV / contact discharge 8 kV)
radiated, radio-frequency, electro-magnetic field	IEC/EN 61000-4-3	Level 3 (10 V/m)
electrical fast transient / burst	IEC/EN 61000-4-4	Level 4 (4 kV / 2.5 kHz)
surge	IEC/EN 61000-4-5	L-L Level 3 (2 kV) / L-PE Level 4 (4 kV)
conducted disturbances, induced by radio-frequency fields	IEC/EN 61000-4-6	Level 3 (10 V)
power frequency magnetic fields	IEC/EN 61000-4-8	Level 4 (30 A/m)
voltage dips, short interruptions and voltage variations	IEC/EN 61000-4-11	dip: >95 % 10 ms / >30 % 500 ms interruptions: >95 % 5000 ms

limits for harmonic current emissions	IEC/EN 61000-3-2	Class D

Technical diagrams

Output behaviour

The switch mode power supply CP-E 5/3.0 is able to supply at 5 V DC output voltage and

- at an ambient temperature of:
  ≤ 60 °C a continuous output current of approx. 3 A
- at ambient temperatures of:
  60 °C < T_a ≤ 70 °C the output power has to be reduced by 2.5 % per °C temperature increase.
