Fiber Unit

Standard Models

Solutions for General-Purpose Applications

These Fibers Units can be used in a variety of applications, such as detecting the presence of workpieces and positioning.

A Wide Variety of Shapes for Adapting to Different Installation Locations

Choose the model that suits the installation space from a wide variety of shapes and sizes (7 shapes, in standard or small sizes).

Screw-shaped

Cylindrical

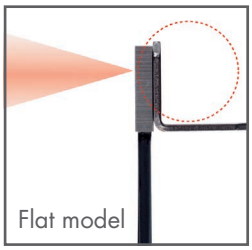
Flat

Equipped with sleeve

Space Savings and Simple Mounting

Flat Models

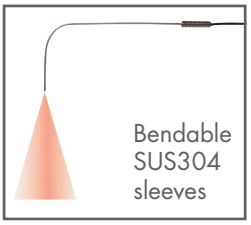
Flat models that allow simple screw mounting and straightforward wiring have been added to the lineup. Using these models eliminates the problem of fibers getting caught on surrounding objects.



Detect Workpieces in Tight Spaces

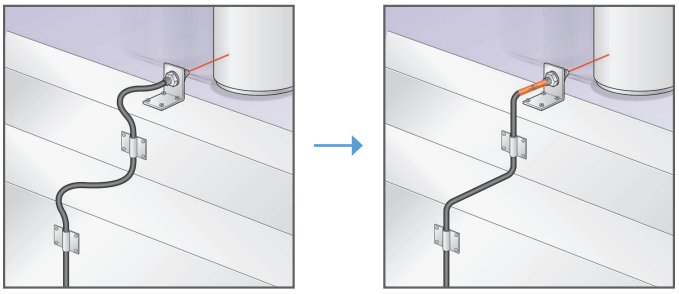
Custom-produced Sleeves

Models with sleeves allow detection in tight spaces. We will perform the time-consuming task of fashioning the sleeve, with a length and bends to suit the space (except for ultrafine sleeves).



Flexible, Pliable Fiber That Can Be Handled Like Wire

We have developed a broad range of fibers to meet a wide variety of needs. Multicore (flexible) fiber is a new type of standard fiber that can be used like wire without worrying about the bending radius. We have also produced fiber that will not break when used in moving parts and fiber that is not degraded by contact with oil.



Conventional fiber

Flexible fiber

You will certainly appreciate the ease of use that flexible fiber ensures.

Cut to Length in the Field

Omron's fibers marked with this symbol Free-cut let you customize the length and eliminate excess fiber for a tidy, safe installation.

Length Can Be Specified in 1-m Units

Saving Energy and Work

We will produce fiber of the required length (in meter units). For large-scale installations, specifications of up to 20 m can be handled. (Specifications of 0.3 m and 0.5 m are also possible.)

Special-beam Models

Detection with Increased Reliability

A variety of heads incorporating the latest optical technology makes it possible to solve common problems related to detection and to increase reliability.

- Resistant to dust and dirt
- Capable of detecting small workpieces
- Resistant to workpiece vibration

Use these models to handle unstable detection conditions.

Small-spot models
E32-C42+
E39-F3A

Area-sensing models
E32-T16J

Limited-reflective models
E32-L24L

Area-sensing models
E32-T16J

Environment-resistive Models

High Resistance to External Conditions with Fiber

We have developed model variations for adapting to a variety of environmental conditions. These models enable detection in high-temperature environments and vacuums.

- High-temperature environments
- Environments subject to the splattering of chemicals
- Vacuums

Use these models to handle applications in special environments.

Heat-resistant models

Chemical-resistant models

Application-specific Models

Fiber Units for the Food-packaging, Semiconductor, and Solar Industries

These models, which were developed for specific applications, offer top-quality detection performance.

- Label detection
- Liquid-level detection
- Alignment and mapping of glass substrates
- Wafer mapping
- True color detection
- Distance measurement

Use these models for specific applications.

Label-detection models
E32-G14

Alignment-check models
E32-L16

Liquid-level detection models
E32-D36T

Standard Models

Flexible (New Standard)

R: Flexible fiber

- Perform wiring without worrying about the bending radius.
- Choose the model to suit the installation space from a variety of shapes.

Flexible fiber | Conventional fiber

Fewer problems ◀ Light intensity affected by bends in fiber
Fiber broken by getting caught on surrounding objects

■ Feature: Multicore (Flexible) Fibers

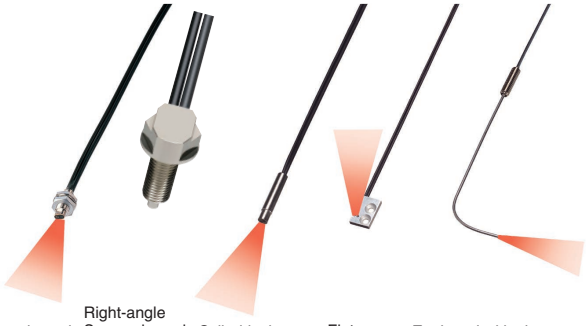
A large number of ultrafine cores are all surrounded by cladding. As a result, the fiber is flexible and can be bent without significantly reducing the light intensity. This helps solve problems, such as fiber being broken by getting caught on other objects.

■ Ratings/Characteristics

Min. sensing object	0.005-mm dia.
Min. bending radius	1 mm
Ambient temperature	−40°C to 70°C (no icing or condensation)
Fiber material	Plastic Free-cut

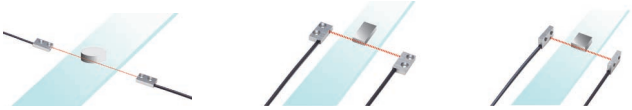
Standard

- Choose the model to suit the installation space from a variety of shapes.
- New flat models allow space savings and simple installation.



■ Feature: Flat Models

Flat models, which allow simple attachment and wiring, have been added to the lineup. Choose the model to suit the installation space from 3 sensing directions and 2 sizes, standard and small.



■ Ratings/Characteristics

Min. sensing object	0.005-mm dia.
Min. bending radius	10 or 25 mm*
Ambient temperature	−40°C to 70°C (no icing or condensation)
Fiber material	Plastic Free-cut

* Depends on the fiber diameter.

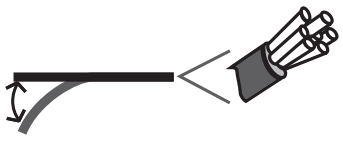
Break-resistant

B: Bendable fiber

- Bundle-fiber models can be used for moving parts.
- Capable of withstanding at least one million repeated bends (in typical applications).

■ Feature: Bundle Fibers

The Fiber Units contain a large number of independent fine fibers, ensuring a high degree of flexibility.



■ Ratings/Characteristics

Min. sensing object	0.005-mm dia.
Min. bending radius	4 mm (withstands repeated bending)
Ambient temperature	−40°C to 70°C (no icing or condensation)
Fiber material	Plastic Free-cut

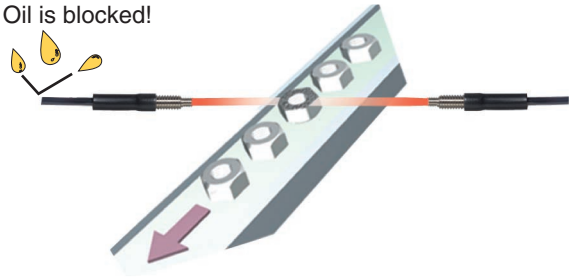
Standard Models

Fluorine Coating

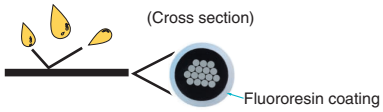
U: Fluorine-coated fiber

- Fiber degradation due to oil is prevented using a fluororesin coating.
- Free cutting is possible with cutter provided.

Oil is blocked!



■ Feature: Fluorine Coating



Fluororesin is used as the sheath material to prevent fiber degradation resulting from oil adhesion.
Note: The tip of the head is not chemical-resistant.

■ Ratings/Characteristics

Min. sensing object	0.005-mm dia.
Min. bending radius	4 mm
Ambient temperature	–40°C to 70°C (no icing or condensation)
Fiber material	Plastic Free-cut

Fiber Customization Service

(Fiber Length, Sleeve Length, and Bends)

Fiber Length

■ Applicable Models
Standard models

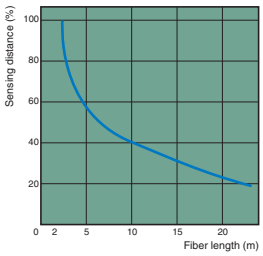
■ Model Number Used for Ordering
Standard model number + Fiber length
Fiber length: 0.3 m, 0.5 m, or any length from 1 to 20 m (in 1-m units)

Sleeve Length and Bends

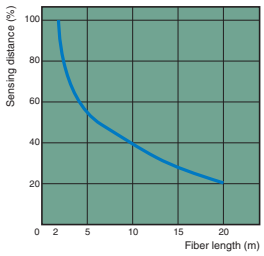
This customization/delivery service applies to standard models. It is aimed at reducing industrial waste and simplifying the installation procedure.

■ Fiber Length vs. Sensing Distance

Through-beam Fiber Units
E32-TC200B/E32-TC200F
(Fiber length of 2 m corresponds to 100%.)



Fiber Units with Reflective Sensors
E32-DC200B/E32-DC200F
(Fiber length of 2 m corresponds to 100%.)

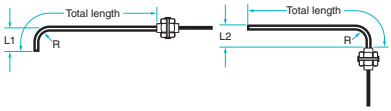


■ Model Number Used When Changing Only the Sleeve Length

Model: E32-*1C200*2-S*3

*1: Insert "T" for Through-beam Fiber Units and "D" for Fiber Units with Reflective Sensors.
*2: Insert the "B" or "F" that appears at the end of the original model number.
*3: Insert "50" if the total length is 50 mm. The total length must not exceed 120 mm.

■ Model Number Used When Changing the Sleeve Length and Bends



Model Numbers Incorporating the Bending Radius, R, and Dimensions L1 and L2

Specifying L1 Only (Units: mm)

Bending Radius	L1 (±1)	Model number
R5	10	E32-*1C200*2-S*3A1
	15	E32-*1C200*2-S*3A2
R7.5	12.5	E32-*1C200*2-S*3B1
	17.5	E32-*1C200*2-S*3B2
R10	15	E32-*1C200*2-S*3C1
	20	E32-*1C200*2-S*3C2
R12.5	17.5	E32-*1C200*2-S*3D1
	22.5	E32-*1C200*2-S*3D2

Specifying L2 Only (Units: mm)

Bending Radius	L2 (±1)	Model number
R5	5	E32-*1C200*2-S*3A3
	10	E32-*1C200*2-S*3A4
R7.5	7.5	E32-*1C200*2-S*3B3
	17.5	E32-*1C200*2-S*3B4
R10	10	E32-*1C200*2-S*3C3
	20	E32-*1C200*2-S*3C4
R12.5	12.5	E32-*1C200*2-S*3D3
	22.5	E32-*1C200*2-S*3D4

Special-beam Models

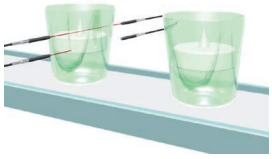
Long Distance, High Power

- Powerful beam reduces influence of dust and dirt.
- Long sensing distance enables use in large-scale installations.

E32-T14

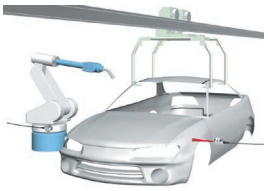
■ Applications

Detecting parts inside (translucent) containers



E32-T11L

Detecting workpieces in coating processes



E32-T17L

■ Ratings/Characteristics

Ambient temperature	–40°C to 70°C (no icing or condensation)
Fiber material	Plastic (Free-cut)

■ Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	Equipped with large lens	20,000	E32-T17L
	Side-view, screw mounting	3,400	E32-T14
	M4 screw	1,330	E32-T11L
Reflective	Equipped with large lens	700	E32-D16
	M6 screw	400	E32-D11L

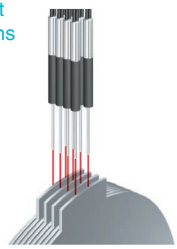
Ultracompact, Ultrafine Sleeve

- Ultracompact head can be installed in tight spaces.
- Ultrafine sleeve ensures reliable detection of small objects, such as electronic components.

■ Applications

Alignment inspections

E32-D33



Detection of terminals

E32-T33-S5

■ Ratings/Characteristics

Min. sensing object	0.005-mm dia.
Ambient temperature	–40°C to 70°C (no icing or condensation)
Material	Plastic

■ Overview of Model Variations

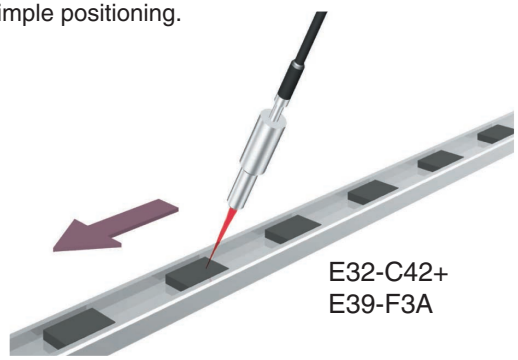
Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	1-dia. cylinder	130	E32-T223R
	0.5-dia. sleeve (0.25-dia. opening)	44	E32-T33-S5
	0.22-dia. sleeve (0.1-dia. opening)	5	E32-T334-S5
Reflective	0.8-dia. sleeve	16	E32-D33
	0.5-dia. sleeve	3	E32-D331

*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

Special-beam Models

Coaxial, Small Spot

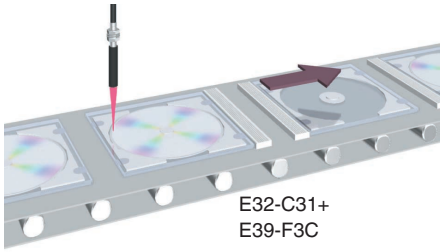
- Small spot diameter (0.1 mm min. in diameter) enables the reliable detection of small workpieces.
- Use of red light ensures easy visual recognition and simple positioning.



E32-C42+
E39-F3A

■ Applications

Detecting of CDs



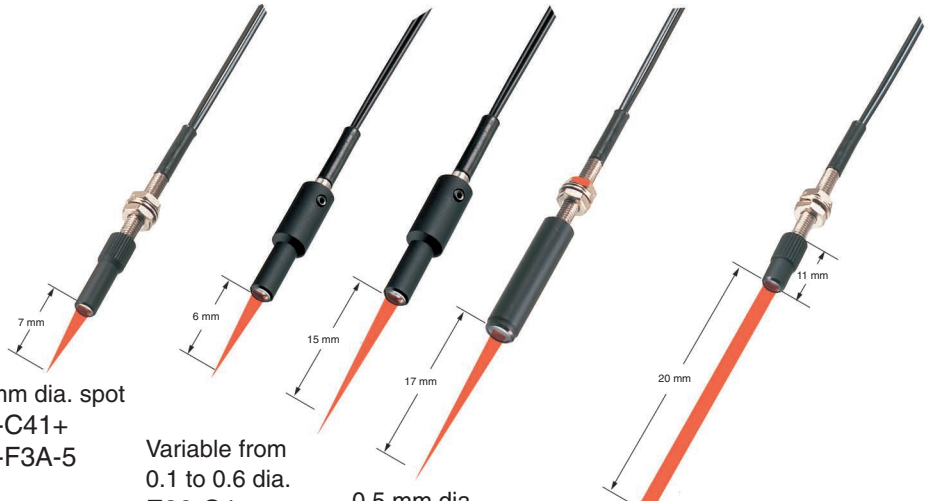
E32-C31+
E39-F3C

■ Ratings/Characteristics

Min. sensing object	0.005-mm dia.
Ambient temperature	−40°C to 70°C (no icing or condensation)
Fiber material	Plastic

■ Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Coaxial, reflective	Coaxial, M6 screw	300	E32-CC200
	Coaxial, 3-dia. cylinder	150	E32-D32L
	Small spot	0.1-dia. spot at a distance of 7 mm	E32-C41+ E39-F3A-5
	Small variable spot	Spot diameter variable in the range 0.1 to 0.6 mm at distances in the range 6 to 15 mm	E32-C42+ E39-F3A
	Long distance, small spot	0.5-dia. spot at 17 mm	E32-C31+ E39-F3B
	Long distance, parallel light	Spot diameter of 4 mm max. at distances in the range 0 to 20 mm	E32-C31+ E39-F3C



0.1 mm dia. spot
E32-C41+
E39-F3A-5

Variable from
0.1 to 0.6 dia.
E32-C4+
E39-F3A

0.5 mm dia.
E32-C31+
E39-F3B

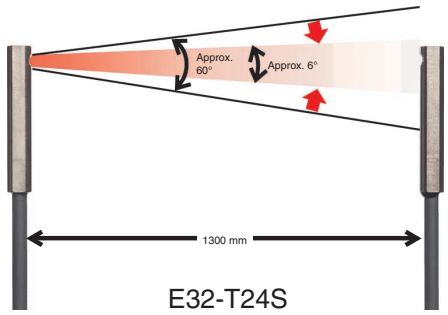
4 mm dia.
E32-C31+
E39-F3C

*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

Special-beam Models

Fine Beam (Narrow Vision Field)

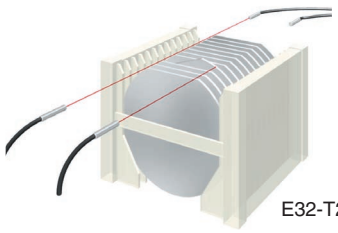
- Fine beam reduces unwanted light in surrounding area.
- Powerful beam allows use in applications requiring a long sensing distance.



E32-T24S

■ Applications

Alignment inspection of orientation flats



E32-T22S

■ Ratings/Characteristics

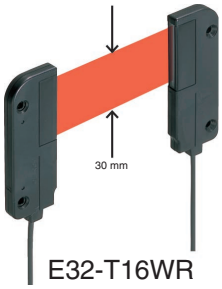
Min. bending radius	10 mm
Ambient temperature	–40°C to 70°C (no icing or condensation)
Fiber material	Plastic (Free-cut)

■ Overview of Model Variations

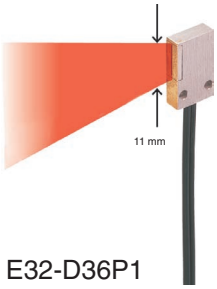
Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	Top-view	1,900	E32-T22S
	Side-view	1,300	E32-T24S

Area Sensing

- These Fiber Units ensure greater reliability with the detection of position inconsistencies in passing workpieces and the presence of workpieces with holes.
- Wide sensing bands of 11 and 30 mm (through-beam models) enable the detection of large position inconsistencies.



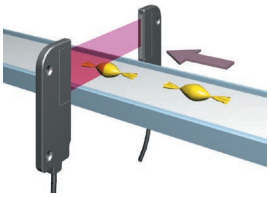
E32-T16WR



E32-D36P1

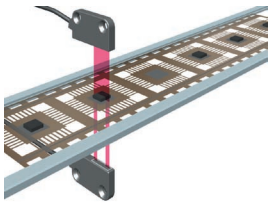
■ Applications

Detecting passage of candies



E32-T16WR

Detecting chips on film



E32-T16R

■ Ratings/Characteristics

Ambient temperature	–40°C to 70°C (no icing or condensation) E32-T16W□ only: –25°C to 55°C
Fiber material	Plastic (Free-cut)

■ Overview of Model Variations

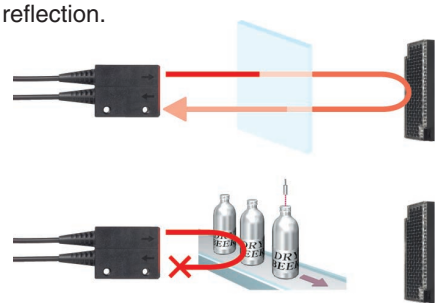
Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	Sensing width: 11 mm	840	E32-T16PR
	Sensing width: 11 mm Flat-view	750	E32-T16JR
	Sensing width: 30 mm	1,300	E32-T16WR
Reflective	Beam width: 11 mm	150	E32-D36P1

*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

Special-beam Models

Retroreflective

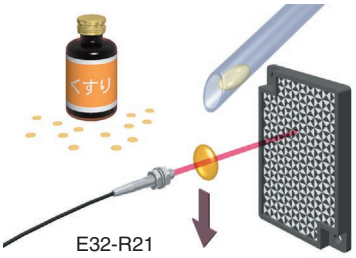
- The return optical path ensures that more light is interrupted by transparent workpieces than with through-beam models.
- Equipped with MSR function to eliminate light reflection.



E32-R16

■ Applications

Detecting translucent medicine



E32-R21

■ Ratings/Characteristics

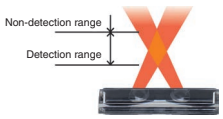
Ambient temperature	E32-R21: –40°C to 70°C E32-R16: –25°C to 55°C (no icing or condensation)
Fiber material	Plastic Free-cut

■ Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Retroreflective	MSR function, M6 screw	250	E32-R21
	MSR function, screw mounting, long distance	1,500	E32-R16

Limited-reflective

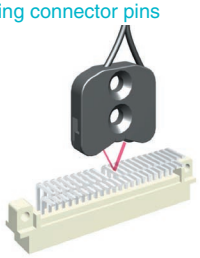
- Limited-reflective models eliminate light reflected from distant objects.
- Small level differences can be reliably detected.
- The optical-axis direction can be selected according to the installation space.



E32-L24L

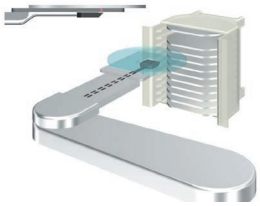
■ Applications

Detecting connector pins



E32-L25L

Detecting wafers (glass substrates)



E32-L24L

■ Ratings/Characteristics

Min. sensing object	0.005-mm dia.
Fiber material	Plastic Free-cut 200°C models only: Glass

■ Overview of Model Variations

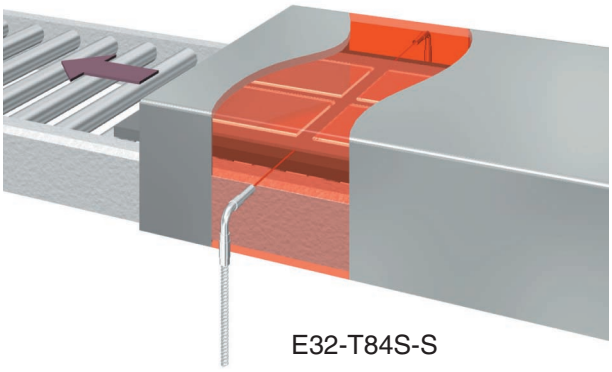
Type	Features	Shape, sensing distance (mm)*	Model number
Limited-reflective	Ultracompact, flat-view Ideal for checking stocks of glass substrates	0 to 4	E32-L24S
	Heat-resistant up to 105°C, top-view	5.4 to 9 (center: 7.2)	E32-L25L
	Wide sensing range flat-view	0 to 15	E32-L16
	Heat-resistant up to 200°C, flat-view	4 to 10	E32-L86

*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

Environment-resistive Models

Heat-resistant

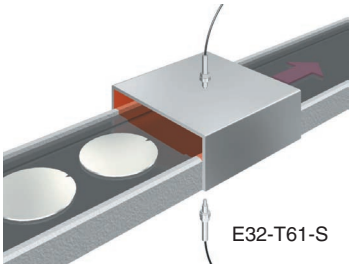
- These Fiber Units can be used for various applications in temperatures up to 400°C.



E32-T84S-S

■ Applications

Detecting wafers in high-temperature environments



E32-T61-S

■ Ratings/Characteristics

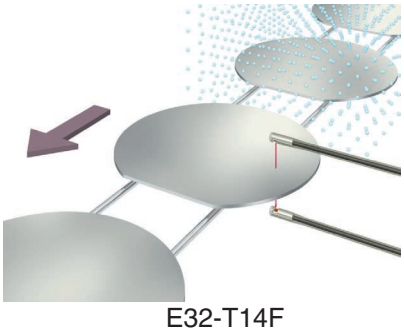
	150°C models	200°C and higher models	
		E32-T81R E32-D81R	All other models
Min. bending radius	35 mm	10 mm	25 mm
Fiber material	Plastic (Free-cut) (fluororesin coating)	Glass (fluoroesin coating)	Glass (SUS spiral coating)

■ Overview of Model Variations

Type	Ambient Temperature	Features	Shape, sensing distance (mm)*	Model number
Through-beam	–40°C to 150°C	M4 screw	760	E32-T51
	–40°C to 200°C	L-shaped, long distance	1,300	E32-T84S-S
	–60°C to 350°C	M4 screw	450	E32-T61-S
Reflective	–60°C to 350°C	M6 screw	90	E32-D61-S
	–40°C to 400°C	M6 screw, with sleeve	60	E32-D73-S

Chemical-resistant

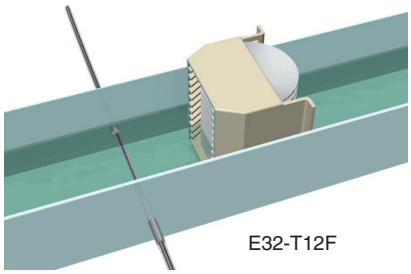
- Built-in lens and high-power beam reduce the influence of dirt and drops of water.
- Round design prevents drops of water sticking to the head (E32-T11F).



E32-T14F

■ Applications

Detecting workpieces in cleaning processes



E32-T12F

■ Ratings/Characteristics

	All other models	E32-T51F	E32-T81F-S
Ambient temperature	–40°C to 70°C	–40°C to 150°C	–40°C to 200°C
Fiber material	Plastic (Free-cut) (fluororesin coating)		Glass (fluororesin coating)

■ Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	Water-resistant round head	2,000	E32-T11F
	Built-in lens, high power	3,000	E32-T12F
	Heat-resistant up to 200°C	700	E32-T81F-S
Reflective	Built-in lens, high power	95	E32-D12F

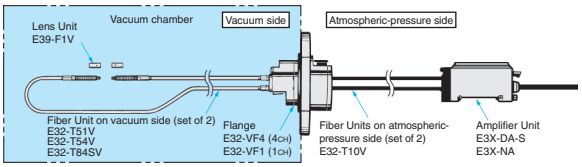
*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

Environment-resistive Models

Vacuum-resistant

- These models can be used in high-vacuum environments at pressures from 10^{-5} to 0.1 Pa.
- The 4-channel multi-flange, which has a maximum leakage rate of 1×10^{-10} Pa·m³/s, contributes to space savings.

■ Applications (Configuration Example)



■ Ratings/Characteristics

	120°C models	200°C models	Atmospheric-pressure side
Min. bending radius	30 mm	25 mm	
Fiber material	Glass (fluororesin coating)	Glass (SUS spiral coating)	Plastic Free-cut (fluororesin coating)

■ Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	M4 screw, top-view, heat-resistant up to 120°C, long distance	1,000	E32-T51V 1M+ E39-F1V
	L-shaped, heat-resistant up to 120°C	130	E32-T54V 1M
	L-shaped, long distance, heat-resistant up to 200°C	480	E32-T84SV 1M

Fiber Units on Atmospheric-pressure Side

Appearance	Type	Model number
	Common	E32-T10V 2M

Flanges

Appearance	Type	Model number
	4-channel flange	E32-VF4
	1-channel flange	E32-VF1

■ Ratings/Characteristics

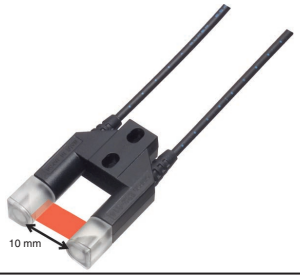
Number of channels		4 channels	1 channel
Item	Model number	E32-VF4	E32-VF1
Leakage rate		1×10^{-10} Pa·m³/s max.	
Ambient temperature		Operating: –25°C to 55°C Storage: –25°C to 55°C	
Material		Aluminum (A5056)	Stainless steel (SUS304) Aluminum (A5056)
Flange-seal material		Fluorocarbon rubber (Viton)	
Weight (packed state)		Approx. 280 g	Approx. 240 g

*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

Application-specific Models

Label Detection

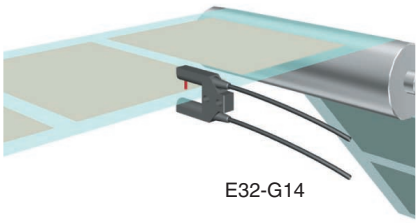
- Built-in lens and high-power beam enable the reliable detection of labels through a mounting board.
- These Fiber Units can be washed with hydrogen peroxide, making them ideal for the food industry.



E32-G14

■ Applications

Detecting labels



E32-G14

■ Ratings/Characteristics

Ambient temperature	–40°C to 70°C (no icing or condensation)
Fiber material	Plastic (Free-cut)
Degree of protection	IP67

■ Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	Slot sensor, no adjustment of optical axis required	10	E32-G14
	Screw mounting, side-view	3,400	E32-T14

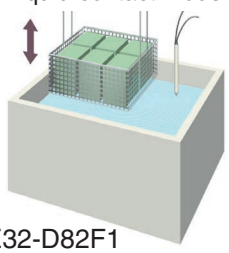
Liquid-level Detection

- Area sensing is possible with minimal influence from bubbles and drops of water (E32-A01/A02/D36T).
- For safety when disconnections occur, two models have been developed, a light ON model for liquid presence and a light ON model for liquid absence (E32-A01/ A02).

Tube-mounting model

E32-D36T

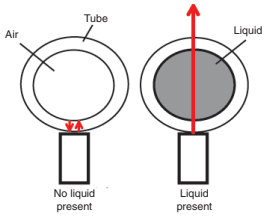
Liquid-contact model



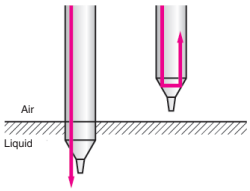
E32-D82F1

■ Operating Principle

Tube-mounting



Liquid-contact model



The presence/absence of liquid is detected using the refractive properties of light. More specifically, it utilizes the fact that the difference in refractive index between the air and the tip/tube is larger than the difference between the liquid and the tip/tube.

■ Overview of Model Variations

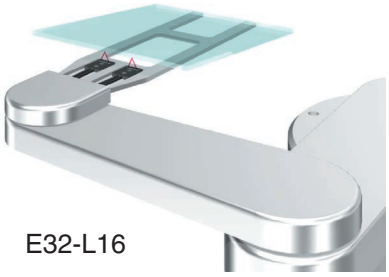
Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	Light ON when liquid is present (ideal for checking lower limits)	Applicable tube: Transparent tube with a diameter of 3.2, 6.4, or 9.5 mm and a recommended wall thickness of 1 mm	E32-A01
	Light ON when liquid is absent (ideal for checking for overflow)	Applicable tube: Transparent tube with a diameter in the range 6 to 13 mm and a recommended wall thickness of 1 mm	E32-A02
	No restriction on tube diameter, resistant to bubbles and drops of water	Applicable tube: Transparent tube (no restriction on diameter)	E32-D36T
Liquid-contact	Heat-resistant up to 200°C, shape prevents liquid buildup	Liquid-contact model	E32-D82F1

*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

Application-specific Models

Glass-substrate Alignment

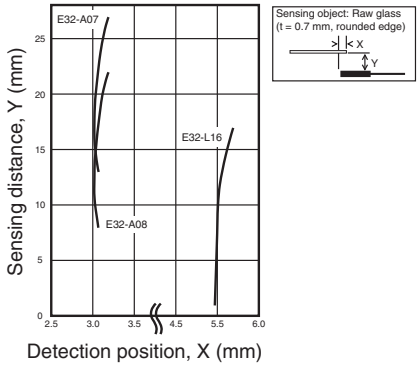
- There is little variation of detection position within the detection range (±0.1 mm max.)
- The different model variations can handle a variety of sensing distances and temperature conditions.



E32-L16

■ Engineering Data (E32-A07/A08/L16)

Detection-Position Characteristics (Typical Examples)

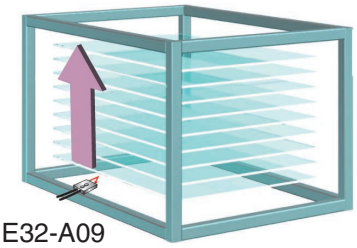


■ Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Limited-reflective	0 to 15 mm, wide-range sensing	0 to 15	E32-L16
	Long-distance sensing	10 to 20	E32-A08
		15 to 25	E32-A07E1 E32-A07E2
	Heat-resistant up to 300°C	5 to 18	E32-L66

Glass-substrate Mapping

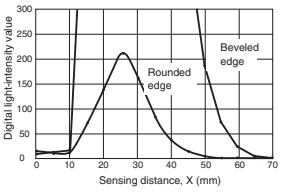
- These models can reliably detect thin glass-substrate end faces (t = 0.5 mm, beveled edge).
- Using a large-diameter lens makes it possible to cope with tilting of the glass substrates.

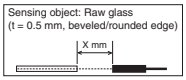


E32-A09

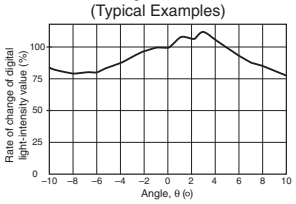
■ Engineering Data (E32-A09)

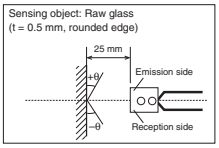
Digital Light-intensity Value vs Sensing Distance (Typical Examples)





Angle Characteristics in Left and Right Directions (Typical Examples)





■ Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Limited-reflective	Large-diameter lens ensures resistance to tilting	15 to 38 (center: 25)	E32-A09
	Heat-resistant up to 150°C		E32-A09H
	Heat-resistant up to 300°C	20 to 30 (center: 25)	E32-A09H2

*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

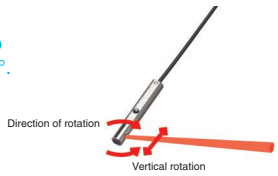
Application-specific Models

Wafer Mapping

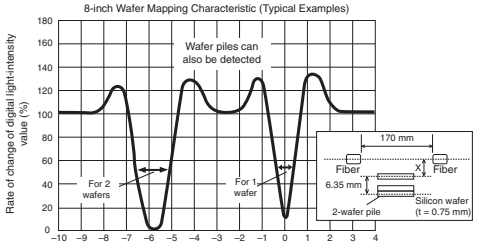
- Wafers are reliable detected with an ultrafine beam.
- The optical axis is adjusted before delivery to allow easy installation.

■ Features

Optical axis adjusted before delivery so that displacement is typically within 0.1°.



■ Engineering Data



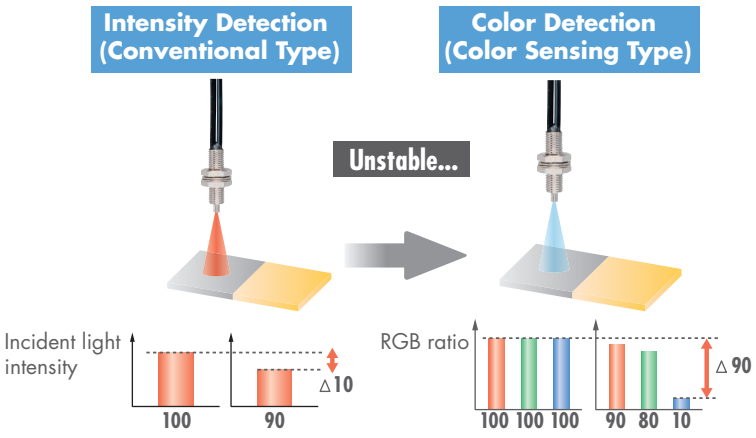
■ Overview of Model Variations

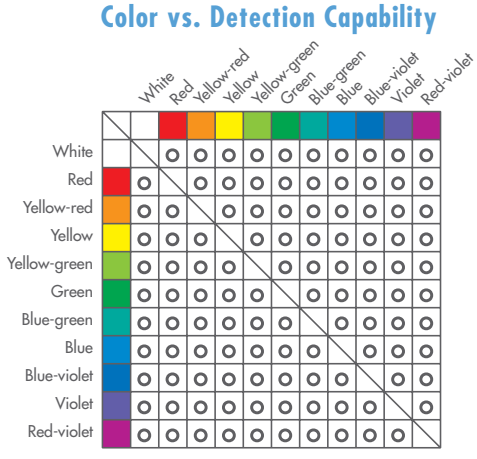
Type	Features		Shape, sensing distance (mm)*	Model number
Through-beam	Opening angle: 1.5°		890	E32-A03
		With mounting flange		E32-A03-1
	Opening angle: 3° ultraslim		340	E32-A04
		With mounting flange		E32-A04-1

True Color Detection

- **Use E32 fiber units with E3X-DAC amplifiers (see page 79) to accurately detect all RGB wavelengths**

Precise Color Detection





No Need to Select Separate Red, Green, Blue LED Amplifiers

A high-power white LED and a multi-RGB processing system combine to cover all RGB wavelengths, enabling easy and accurate detection of workpieces without having to use a different light source to match each one.

Resists Movement

Changes in the three parameters are processed as a ratio, so they are not affected by light-intensity variations due to workpiece movement.

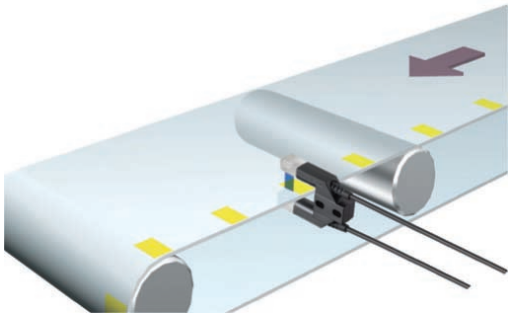
*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

Application-specific Models

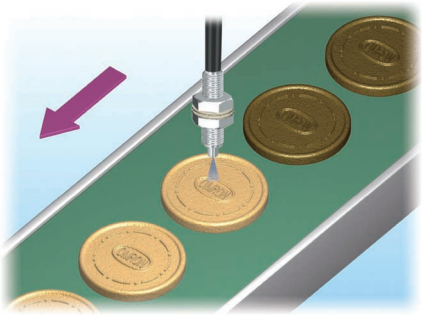
■ Applications

Detecting Opaque Marks—Reflective
Because it distinguishes RGB ratios, detection is highly resistant to workpiece movement.

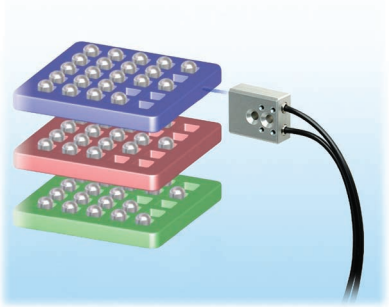
Detecting Translucent Marks
Detecting color differences in translucent marks on film with easy-to-install U-shaped sensing head.



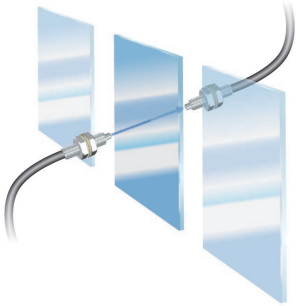
Distinguishing Products
Detection is highly resistant to the effects of backgrounds and surface protrusions.



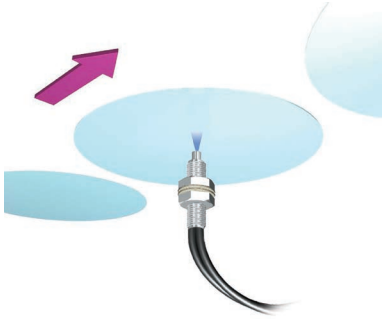
Distinguishing Trays
Twin sensing and remote control functions simplify setup of color sortation on a multi-product line.



Distinguishing Semi-Transparent Objects
Through-beam Fiber Heads are capable of detecting color differences in semi-transparent objects.



Detecting Wafers
Workpieces that absorb a specific wavelength can be detected with a wide range of wavelengths.



■ Overview of Model Variations

Type	Features	Shape	Sensing distance (mm)*		Model number
			Opaque object	Translucent object	
Through-beam	M4 screw		110	22	E32-T11R
	Long distance		3,200	600	E32-T17L
Reflective	Long distance		70	13	E32-D11L
	Coaxial, M6 screw		45	9	E32-CC200

*The sensing distances apply for use in combination with the E3X-DAC-S Amplifier Unit (general-purpose, standard mode).

Ordering Information

Through-beam Fiber Units

*1. There must be no icing or condensation within the range specified for the ambient operating temperature.
*2. For continuous operation, use the products within a temperature range of –40°C to 90°C.
*3. The maximum temperature that can be withstood varies with the location. Refer to dimensions diagrams for details.
*4. For continuous operation, use the products within a temperature range of –40°C to 130°C.
*5. These values are based on the assumption that there are no repeated sudden changes in temperature.

Material: Aluminum for body and optical glass. for the lens.

Note: This is the Lens Unit for the E32-C31 and E32-C41.

Lens Unit for Reflective Fiber Units
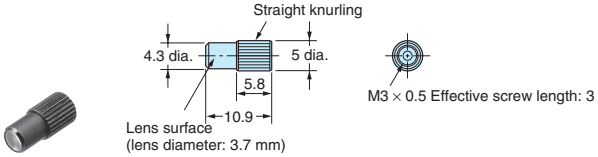
E39-F3C



Material: Aluminum for body and optical glass. for the lens.

Note: This is the Lens Unit for the E32-C31 and E32-C41.

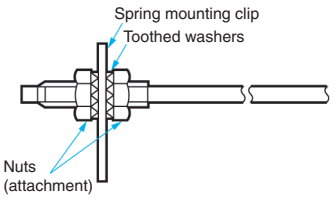
Precautions for Correct Use

■ Fiber Units Mounting

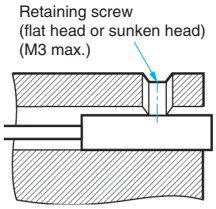
Tightening Force

The tightening force applied to the Fiber Unit should be as follows:

Screw-mounting Model

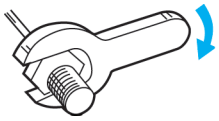


Cylindrical Model



Fiber Units	Claming torque
M6 screw/6-mm dia. cylinder	0.98 N·m max.
M3/M4 screw	0.78 N·m max.
2-mm dia./3-mm dia. cylinder	0.29 N·m max.
1.5-mm dia./1-mm dia. cylinder	0.2 N·m max.
E32-T12F 5-mm dia. fluororesin model	0.78 N·m max.
E32-D12F 6-mm dia. fluororesin model	
E32-L25A	
E32-M21	Up to 5 mm to the tip: 0.49 N·m max. More than 5 mm from the tip: 0.78 N·m max.
E32-T16	0.49 N·m max.
E32-R21	0.39 N·m max.
E32-T16W(R) E32-T16P(R) E32-T16J(R) E32-L24S E32-L24L E32-T25L	0.29 N·m max.

Use a proper-sized wrench.



Fiber Cutting Procedure

Cut a thin fiber as follows:

①	An attachment is temporarily fitted to a thin fiber before shipment.	②	Secure the attachment after adjusting the position of it in the direction indicated by the arrow.	
③	Insert the fiber to be cut into the E39-F4.	④	Finished state (proper cutting state)	

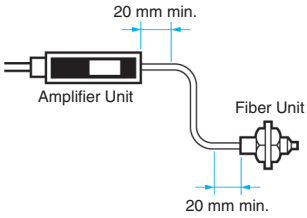
Note: Insert the fiber in the direction indicated by arrow.

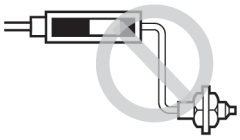
Connection

- Do not pull or press the Fiber Units. The Fiber Units have a withstand force of 9.8 N or 29.4 N maximum.
- Do not bend the Fiber Unit beyond the permissible bending radius given under *Ordering Information.*
- Do not bend the edge of the Fiber Units (excluding the E32-T□R and E32-D□R).

Correct

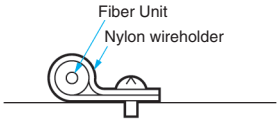


Incorrect

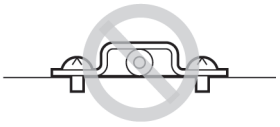


- Do not apply excess force on the Fiber Units.

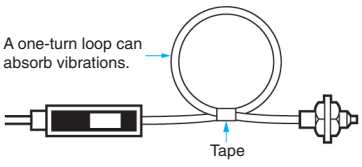
Correct



Incorrect

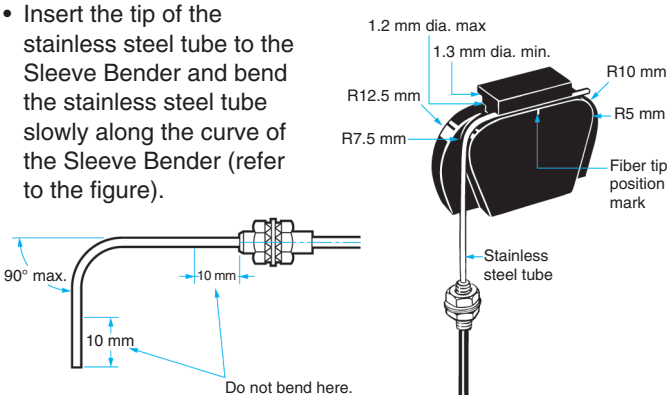


The Fiber Head could be broken by excessive vibration. To prevent this, the following is effective:



E39-F11 Sleeve Bender

- The bending radius of the stainless steel tube should be as large as possible. The smaller the bending radius becomes, the shorter the sensing distance will be.
- Insert the tip of the stainless steel tube to the Sleeve Bender and bend the stainless steel tube slowly along the curve of the Sleeve Bender (refer to the figure).

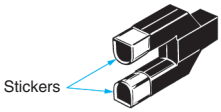


Heat-resistant Fiber Units (E32-D51 and E32-T51)

- The fibers of these Units cannot be extended using the E39- F10 Fiber Connector.
- The maximum allowable temperature for continuous operation with these Units is 130°C. It is 150°C for short-term use.

E32-T14 and E32-G14

These Units may enter the light-ON state if there are reflecting objects at the ends of the lenses. In this case, attach the black stickers provided to the ends of the lenses.



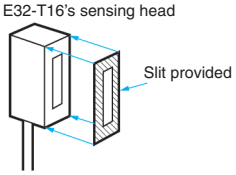
Wafer Sensors (E32-L25(A))

- To ensure correct performance, insert the fiber with a white line into the emitter-side port of the Amplifier Unit.

E32-T16 and E32-T16P

Example

E32-T16's sensing head



To use the slit provided, peel off the backing sheet, align it with the edges of the sensing surface, and attach it to the sensing head. Use the slit in applications where saturation occurs (i.e., changes in light intensity cannot be obtained) due to short sensing distances.

E32-M21

Separate the 4 fibers by distances sufficient to prevent interference.

Vacuum-resistant Fiber Units (E32-V)

Although Flanges, Fiber Units on the vacuum side, and Lens Units have been cleaned, as an extra precaution, clean these products with alcohol before use in high-vacuum environments to ensure that they are properly degreased.

Liquid-level Detection Sensors (E32-D82F)

- Secure the Fiber Unit using the unbendable section. Otherwise, the liquid-level detection position may be displaced.
- For applications in hazardous environments, install the Fiber Unit in the hazardous environment but install the Amplifier Unit in a safe environment.

Liquid-level Detection Sensors: Tube-mounting Models

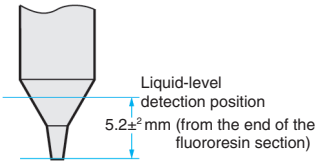
- Ensure that the tube is not deformed when using a band to secure the Fiber Unit.
- Drops of water, bubbles, or haze inside the tube may cause malfunctions.

• Adjustment E32-G14

The sensing distance is short, making the incident light intensity large. This makes it impossible to teach without a workpiece. Perform teaching with and without a workpiece.

Liquid-level (E32-D82F) Detection Position

The liquid-level detection position is at a distance of 5.2±2 mm from the end of the fluororesin section. (Refer to the diagram on the right.)



The liquid-level detection po-sition varies with the surface tension of the liquid and the degree of wetness at the Fiber Unit's detection position.

• Other Considerations

Liquid Level (E32-D82F)

- Operation may become unstable in the following cases:
  ① Bubbles stick to the cone of the sensing head.
  ② Solute is deposited on the cone of the sensing head.
  ③ The liquid has a high viscosity.
- There are some liquids, such as milky white liquids, for which detection is not possible.
- Do not let the end of the fluororesin section bump into another object. Damage to, or deformation of, the sensing head may result in unstable operation.

Heat-resistant Fiber Units (E32-D81R, E32-D61, and E32-D73)

The pitch of the emission-side and reception-side fiber-insertion ports varies with the Amplifier Unit. Be sure to use an appropriate Fiber Unit.

Amplifier Unit	Fiber Unit
E3X-DA□-S E3X-MDA□	E32-D□-S
E3X-DA□-N E3X-NA□	E32-D□

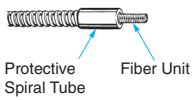
■ Accessories

Use of E39-R3 Reflector

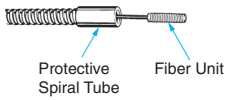
1. Use detergent, etc., to remove any dust or oil from the surfaces where tape is applied. Adhesive tape will not be attached properly if oil or dust remains on the surface.
2. The E39-R3 cannot be used in places where it is exposed to oil or chemicals.

E39-F32□ Protective Spiral Tubes

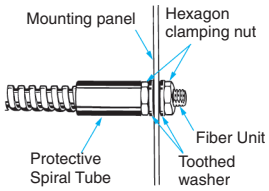
1. Insert a fiber to the Protective Spiral Tube from the head connector side (screwed) of the tube.



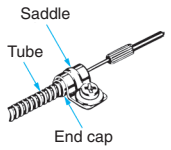
2. Push the fiber into the Protective Spiral Tube. The tube should be straight so that the fiber is not twisted when inserted. Then turn the end cap of the spiral tube.



3. Secure the Protective Spiral Tube on a suitable place with the attached nut.

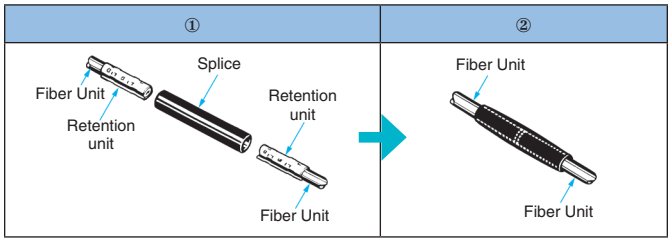


4. Use the attached saddle to secure the end cap of the Protective Spiral Tube. To secure the Protective Spiral Tube at a position other than the end cap, apply tape to the tube so that the portion becomes thicker in diameter.



E39-F10 Fiber Connector

Mount the Fiber Connector as shown in the following illustrations.



- The Fiber Units should be as close as possible when they are connected.
  Sensing distance will be reduced by approximately 25% when fibers are connected.
- Only 2.2-mm dia. fibers can be connected.

Simple Fiber Optic Amplifiers
E3X-SD with Digital Display, E3X-NA with Bar Graph Display

E3X-SD Features

- Streamlined features provide basic sensing immediately after plug-in
- Easy push button teach with or without workpiece
- Large, 6 mm wide digital display provides read-out of incident and operating level
- Incident settings and management can be performed reliably with 0 to 999% (10 times) fin tune adjustment
- Built-in OFF-delay, ON-delay, one-shot timer
- Optical communication design prevents mutual interference for up to 5 amplifiers
- Pre-wired (2 m cable) and wire-saving connector models available

E3X-NA Features

- Streamlined features provide basic sensing immediately after plug-in
- Use the LED bar display to quickly confirm sensor performance
- Optical communication design prevents mutual interference for up to 5 amplifiers
- Green LED models address mark-detecting applications
- High-speed models have a response time of 50 micro-seconds (μs)
- IP66 Water-resistant models available with M8 connector or pre-wired with 2 m cable

Item / Model	EX-SD□	E3X-NA□	E3X-NA□F	E3X-NA□V
Light source (wavelength)	Red LED (620 nm)	Red LED (680 nm)		
Power supply voltage	12 to 24 VDC ±10%, ripple (p-p): 10% max.			
Current comsumption	960 mW max. (Power supply: 24 V, Current consumption: 40mA max.	35 mA max.		
Control output	Open-collector output (NPN or PNP) Load power supply: 26.4 V max., Load current: 50 mA max. (Residual voltage: 1.5 V max.) (*1) Light-ON/Dark-ON mode selector			
Protection circuits	Power supply reverse polarity protection, output short-circuit protection, output reverse polarity protection (*2)			
Timer function	ON/OFF-delay timer: 10 ms (each fixed)	OFF-delay timer: 40 ms (fixed)		
Mutual interference prevention	Up to 5 Amplifiers (optically synchronized)		None	Up to 5 Amplifiers (optically synchronized)
Weight (packed state)	Pre-wired model: Approx. 100 g, Model with connector: Approx. 55 g (*3)			

Note: *1. For the E3X-NA, residual voltage is 1V max.
*2. The E3X-NA does not have output reverse polarity prevention.
*3. Add 10 g for water-resistant models.

E3X-DA-S Dual Display Digital Fiber Optic Amplifier

Features

- Dual digital display can monitor current and preset values, including digital, bar, percent and hold display functions
- Power tuning function addresses saturation or insufficient light conditions
- 4-element LED and Auto Power Control ensure stable, long term performance
- Three inspection speeds/distances in one model: standard, high-speed and high-resolution
- Advanced functions include differential operation for minute object detection, 2 independent outputs for area detection, remote input function and counter function

- Advanced models available for Mark Detection; Two-Outputs for Area output, self-diagnostics or differential operation; external input for remote setting
- Optical communications ports built into each sensor enables data exchange with one another and the Omron Mobile Console remote control
- Pre-wired (2 m cable) and wire-saving connector models available

	High-resolution mode	4 ms for operation and reset respectively				
Functions	Power tuning	Light emmission power and reception gain, digital control method				
	Differential detection	—			Switchable between single edge and double edge detection mode Single edge: Can be set to 250 µs, 500 µs, 1 ms, 10 ms, or 100 ms. Double edge: Can be set to 500 µs, 1 ms, 2 ms, or 200 ms.	
	Timer function	Select from OFF-delay, or one-shot timer. 1 ms to 5 s (1 to 20 ms set in 1-ms increments, 20 to 200 ms set in 10-ms increments, 200 ms to 1 s set in 100-ms increments, and 1 to 5 s set in 1 s-increments)				
	Automatic power control (APC)	High-speed control method for emission current				
	Zero-reset	Display can be reset to zero when required (negative values can be displayed).				
	Initial reset	Settings can be returned to defaults as required.				
	Mutual interference prevention	Possible for up to 10 Units. (*2, *3)				
	Counter	—				Switchable between up counter and down counter. Set count: 0 to 9,999,999
	I/O settings	—			Output setting (Select from channel 2 out-put, area output, or self-diagnosis.)	External input setting (Select from teaching, power tuning, zero reset, light OFF, or counter reset.)
Weight (packed state)		Approx. 100 g				

Note: *1. When counter is enabled: 80 µs for operation and resety respectively.
*2. Communications are disabled if the detection mode is selected during high-speed mode; the communications functions for mutual interference prevention and the Mobile Console will not function.
*3. Mutual interference prevention can be used for up to 6 Units if power tuning is enabled.

E3X-MDA Two-channel Dual Display Digital Amplifier

Features

- Two independent fiber-optic amplifiers in a slim, 10 mm wide track-mount unit
- Designed for gang mounting up to 18 sensors (9 units)
- Dual digital display can monitor current and preset values, including digital, bar, percent and hold display functions
- Three inspection speeds/distances in one model: standard, high-speed and high-resolution
- Logical AND/OR control output for local control in high-speed applications
- 4-element LED and Auto Power Control ensure stable, long term performance
- Optical communications ports built into each sensor enables data exchange with one another and the Omron Mobile Console remote control
- Pre-wired (2 m cable) and wire-saving connector models available

	Automatic power control (APC)		High-speed control method for emission current	
	Zero-reset		Display can be reset to zero when required (negative values can be displayed).	
	Initial reset		Settings can be returned to defaults as required.	
	Mutual interference prevention		Possible for up to 9 Units (18 channels) (*2, *3)	
	I/O settings		Output setting (Select from channel 2 output, AND, OR, leading edge sync, falling edge sync, or differential output)	
Weight (packed state)			Approx. 100 g	Approx. 55 g

Note: *1. When differential output is selected for the output setting, the second channel output is 200 µs for the operation and reset respectively.
*2. Communications are disabled if the detection mode is selected during high-speed mode; the communications functions for mutual interference prevention and the Mobile Console will not function.
*3. Mutual interference prevention can be used for up to 5 Units (10 channels) if power tuning is enabled.

E3X-DAC-S True Color Fiber Optic Amplifiers with Digital Dual Display

Features

- Reliability through precise and true color detection with White LED emitter and RGB (Red, Green and Blue) processing
- Enhanced stability: workpiece movement does not affect the sensor as the receiver element processes light as a ratio to compensate for intensity variations
- Easy push button setup guides the user to place the workpiece in an appropriate position for teaching
- Full-functional, dual digital display can monitor current preset values, including digital, bar, percent and hold display functions
- On-Board timing function incorporating OFF-delay, On-delay, and one-shot timing functions
- Advanced models offer remote control as well as twin sensing and output to simultaneously distinguish between two registered colors
- Pre-wired (2 m cable) and wire-saving connector models available

Amplifier Units with Connectors (Amplifier Unit Connectors must be purchased separately.)

Item	Appearance	Functions	Model	
			NPN output	PNP output
Standard models		Timer, Response speed change	E3X-DAC6-S	E3X-DAC8-S

■ Specifications

Item \ Type		Standard models	Advanced models
Item \ Model		E3X-DAC□-S□ (□: 11/41/6/8)	E3X-DAC□-S□ (□: 21/51)
Light source (wavelength)		White LED (420 to 700 nm)	
Sensing method		C Mode: RGB ratio determination (or I Mode: Light intensity determination for red, green, or blue) (*1)	
	Number of registered colors	1	2 (simultaneous determination)
Power supply voltage		12 to 24 DVC ±10%, ripple (p-p) 10% max.	
Power comsumption		960 mW max. (current consumption: 40 mA max. at power supply voltage of 24 VDC)	
Control output		NPN or PNP open collector Load power supply voltage: 26.4 VDC max. load current: 50 mA max. (residual voltage: 2 V max.)	
Remote control input		—	No-voltage input (contact/transistor)
Protection circuits		Reverse polarity for power supply connection, output short-circuit, Reversed output polarity protection	
Response time	Super-high-speed mode (*2)	Operate or reset: 60 µs	Operate or reset: 120 µs
	High-speed mode	Operate or reset: 300 µs	Operate or reset: 600 µs
	Standard mode	Operate or reset: 1 ms	Operate or reset: 2 ms
	High-resolution mode	Operate or reset: 4 ms	Operate or reset: 8 ms
Functions	Operating mode	ON for match (ON for same color as registered color) or ON for mismatched (ON for different color from registered color)	
	Timer function	Timer type: OFF delay, ON delay, or one-short Timer range: 1 ms to 5 s (variable)	
	Control outputs	—	Output for each channel, AND output, and OR output
	Remote control	—	One-point teaching, teaching with/without workpiece, zero reset, and light emission OFF
	Display switch (*3)	Seven patterns total: Match + Threshold + Margin + Threshold, Analog bar display, Peak + Bottom, etc.	
	Initialization	Initial reset (factory defaults) or user reset (saved settings)	
Weight (packed state)		Pre-wired model: Approx. 100g, Amplifier unit connector model: Approx. 55 g	

Note: *1. When teaching with/without a workpiece, the best sensing method will be automatically selected (RGB ratio (C Mode) or light intensity determination (I Model)).
If color differences are not strong enough and RGB ratios would result in unstable detection, then light intensity determination (I Mode) will be selected.
*2. Mutual interference prevention cannot be used in super-high-speed mode, and light intensity determination (I Mode) must be used.
*3. With light intensity determination (I Mode), the correlation is not displayed, but rather the light intensity is displayed.

E3C-LD/-LR Laser Optics Sensing Heads for Measurement

- Area, spot and line beam sensing heads offer variable focal point and optical axis alignment
- Safe Class I lasers require no special protective hardware
- Use with E3C-LDA, slim track-mount digital amplifiers (see page 82)

Coaxial retroflective with mirror surface rejection	Variable spot (0.8 mm dia.)	Up to 7 m with E39-R12	25 x 12.8 x 39	E3C-LR11
	Line, 28 mm L	Up to 1.7 m with E39-R12	25 x 12.8 x 39	E3C-LR11 + E39-P31
	Area, 28 x 16 mm	Up to 900 mm with E39-R12	25 x 12.8 x 39	E3C-LR11 + E39-P41
	Fixed spot (2 mm dia.)	Up to 7 m with E39-R12	25 x 12.8 x 39	E3C-LR12

E3C-LDA Dual Display Digital Amplifier for Laser Optics

Features

- Dual digital display simplifies setup and monitoring
- Selectable detection modes with response speed as fast as 100 µs
- One-touch sensitivity setting with Power Tuning function compensates for saturation
- Provides analog voltage and discrete outputs for position control, height measurement and other gauging applications
- Dual output models available offering area output, differential operation and self-diagnostics
- External input models offer remote setting, built-in counter and differential operation

Dielectric strength	1,000 VAC at 50/60 Hz for 1 minute						
Shock resistance	Destruction: 300 m/s^2 6 directions 3 times each (up/down, right/left, forward/backward)						
Vibration resistance	Destruction: 10 to 150 Hz with double amplitude of 0.7 mm, in X, Y, and Z directions for 80 min each						
Degree of protection	IP40 (IEC 60529)			IP40 (IEC 60529)			
Connection method	Connector (standard cable length: 2 m)						
Materials	Case and cover: ABS Front surface filter: Methacrylic resin			Case and cover: ABS Front surface filter: Glass			
Weight (packed)	Approx. 85 g			Approx. 100 g			

Note: *1. Sensing distance values are for white paper.

*2. These sensing distance values apply when a E39-R12 Reflector is used. The MSR function is built-in. The reflected light from the object being measured may affect the sensing accuracy, so adjust the threshold value before use.

*3. The beam radius is the value for the middle measurement distance and indicates a typical value for the middle sensing distance. The radius is defined by light intensity of 1/e2 (13.5%) of the central light intensity. Light will extend beyond the main beam and may be affected by conditions surrounding the object being measured.

*4. The E3C-LR12 has a fixed beam size (the focal point cannot be changed).

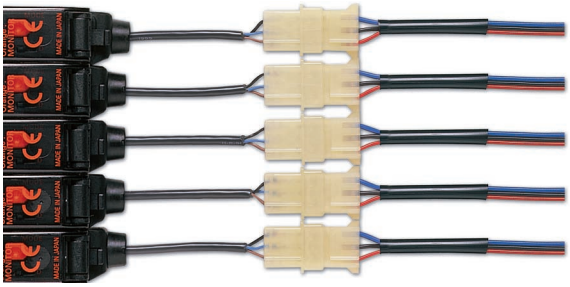
Wire-Saving Connector Models

- Streamlines installation and maintenance to reduce service time
- Unique connector design reduces wiring and space requirement because one master connector supplies power to all other slave connectors
- Detach the sensor without disturbing the fiber installation or output wiring for servicing



Pre-wired models
require three wiring connections for each sensor.
Shown: 15 wires plus extension connector wires.

The **E3X-DA-S** requires three wiring connections for the master sensor only. Each additional sensor in a group requires only one wiring connection.
Shown: **ONLY 7 WIRES** with no additional extension connectors.

M8 Connectors

Use these connectors with water-resistant E3X-NA14V and E3X-NA44V amplifiers only.

Size	Cable specifications	Appearance	Cable type		Model
M8	Standard cable	Straight connector 	2m	Four-conductor cable	XS3F-M421-402-A
			5m		XS3F-M421-405-A
		L-shaped connector 	2m		XS3F-M422-402-A
			5m		XS3F-M422-405-A

Mounting Bracket and Track

Description	Appearance	Dimensions H x W x D mm	Specification	Model
Surface mounting bracket		7.3 H x 35 W x 12 D	304 stainless steel; fits the DIN track holder	E39-L143
Mounting track		500 L x 35 H x 7.3 D	0.5 m length	PFP-50N
		1000 L x 35 H x 7.3 D	1 m length	PFP-100N
		1000 L x 35 H x 16.0 D	1 m length	PFP-100N2
End plate		50 x 10 x 10	Holds track-mounted devices in place	PFP-M

Mobile Console

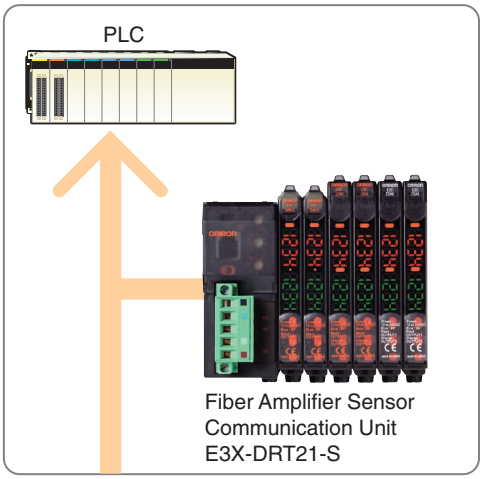
- Program and monitor the following amplifiers remotely with mobile console: E3X-DA-S, E3X-MDA, E3C-LDA
- Console includes 1.5 m cable for remote setup connection to the programming head
- Programming head track mounts flush against leftmost amplifier
- AC adapter powers console

Description	Appearance/ Dimensions	Model
Mobile console kit Includes console, programming head, cable and AC adapter		E3X-MC11-SV2
Mobile console (only)	 136 H x 52.8 W x 22 D mm	E3X-MC11-C1-SV2
Programming head (only) Mounts on DIN rail	 51.3 H x 20 W x 30.3 D mm	E3X-MC11-H1
Cable	 1.5 m length	E3X-Z12-1

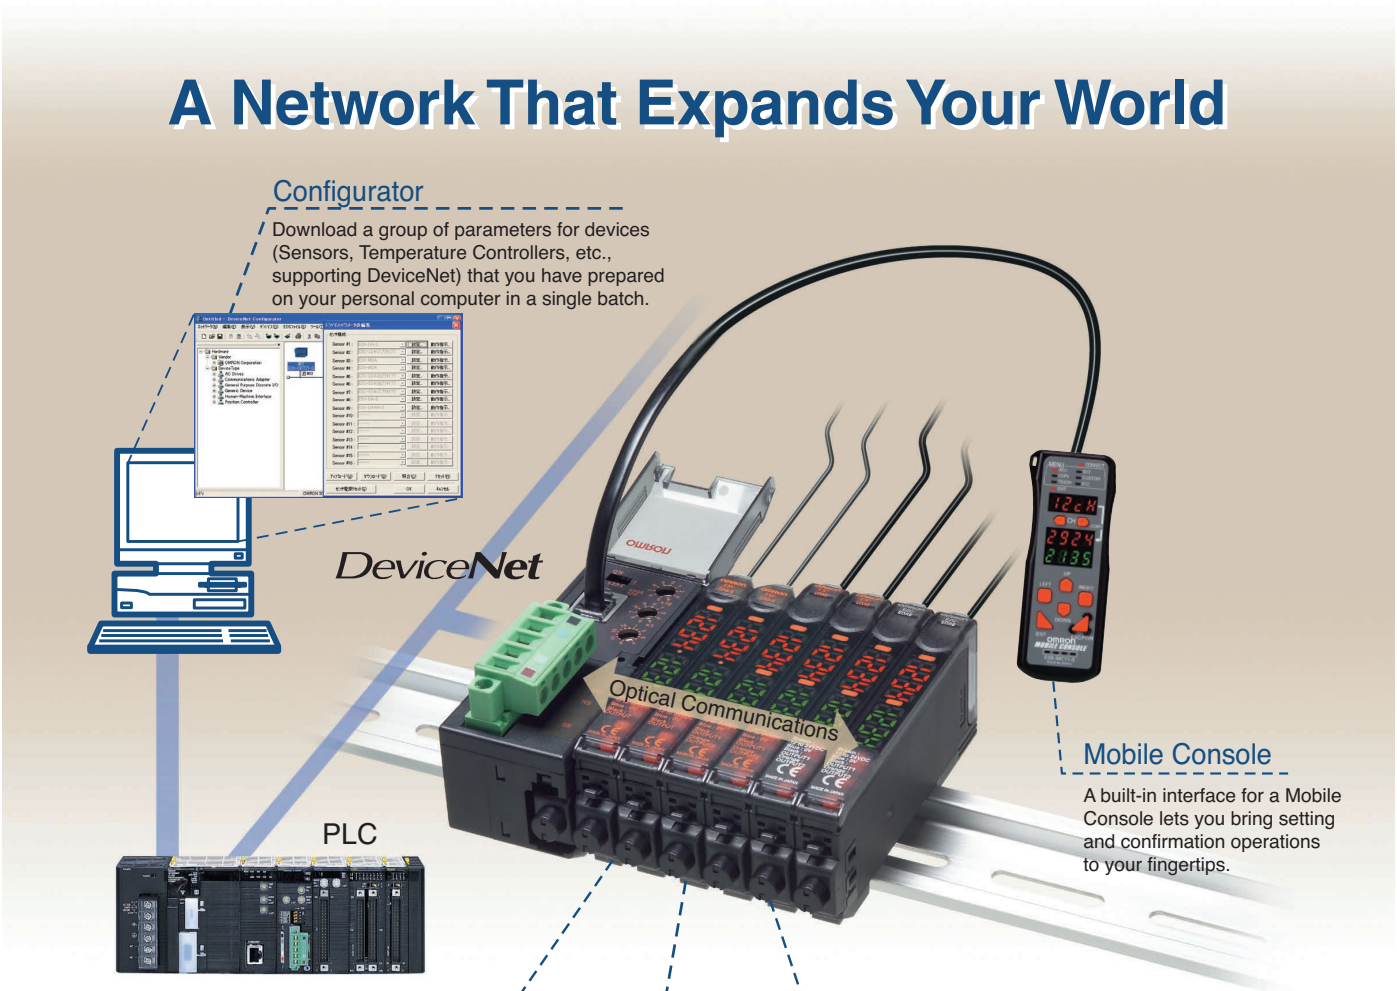
Fiber Optic or Laser Optic Sensor Communication Unit Supports Multi-vendor Networks

- ON/OFF signals and incident light levels can be sent to the host
- PLC without any need for programming (using the Remote I/O Communications Slave function).
- Threshold values and function settings can be read, written, or taught (using the Message Communications function).
- Device parameters prepared on a personal computer connected to the network can be downloaded in a batch operation (using the Configurator).

DeviceNet model



A Network That Expands Your World



■ Ordering Information

Fiber Amplifier Sensor Communication Unit

Type	Model
DeviceNet	EX-DRT21-S

Wire-reducing Connector

Type	Model
Cordless Slave Connector	E3X-CN02

■ Ratings and Specifications

Item		Description
Communications Methods		DeviceNet communications
Communications functions	Remote I/O Communications Slave function	Monitors ON/OFF output, status, incident light level (digital display data)
	Message Communications functions	Sets parameters using Explicit messages
	Configurator	Edits slave devices parameters, enables device monitor functions
Mobile Console connection		E3X-MC11-S-V2 can be connected
Power supply		Supplied from the DeviceNet communications connector(power is also supplied to all connected Sensors through Wire-reducing Connectors)
Maximum connectable Sensors		13 or 16 (depending on the operation mode)
Connectable Sensors		E3X-DA-S Series or E3X-MDA Series Digital Fiber Sensor E3C-LDA Series Laser Photoelectric Sensor with Separate Digital Amplifier E2C-EDA High-resolution Digital Proximity Sensor with Separate Amplifier (use connector-type Amplifier Units and the E3X-CN02 Cordless Slave Connector)
Power supply voltage		11 to 25 VDC
Current comsumption (See note.)		70 mA max.
Ambient operating temperature		–20 to 55°C
Ambient operating humidity		35% to 85% (with no condensation)
Storage temperature		–30 to 70°C
Dimensions (mm)		30 x 34.6 x 71.3 (W x H x D)
Weight (packed state)		Approx. 150 g

Note: This does not include the current supplied to the Sensor.
