

RF Wireless PowerPoint Presenter/Laser Pointer

Anyone who undertakes presenting using Microsoft® PowerPoint and multi media software such as Windows Media Player, WinMx etc, will find this all-in-one RF wireless pointer invaluable. It is simple to use and absolutely packed with features. Take for example the powerful inbuilt laser pointer, a fully functioning mouse that can operate at a distance of 10 metres and the stowaway compartment for the mini USB receiver. This PowerPoint partner can make bungled presentations a thing of the past, giving you the freedom to engage with your audience and not with your PC.

- RF 3 button mouse operates up to 10m from the receiver in any direction
- Integrated laser pointer - making it useful for all

types of presentations

- One-touch 'screen blanking' button lets you keep your slide show hidden until the audience is ready
- One-touch 'auto start' button puts your presentation immediately in full screen
- One-touch 'auto stop' button brings you back to presentation design page
- One-touch 'next or previous' page for navigating the slide show
- Multi media control - Volume up/down/mute and track

- Page up / Page down
- Track up / Track down
- Plug and play installation via the USB port - no software needed
- USB mini receiver
- Powered by 2 x AAA batteries (supplied)
- Supports OS: Win 98SE/2000/XP, Mac 9.0 or later

Note: Class 2 lasers are not considered dangerous.
