

Steel Tape

Steel Tape

Steel tape comes in 30m rolls with width of 13mm, 20mm and 25mm to directly compliment the magnetic tape above. It is coated with a white plastic on both sides and comes with a choice of adhesive on one side. It quickly makes any surface magnetically receptive and can cut easilt with normal scissors. It can be used in secondary galzing and visual communication (displays)

The following two adhesive backings are available

Standard This high-adhesion acrylic pressure-sensative adhesive is an excellent all round mounting adhesive for applications on paper, board, metal, painted surfaces, and plastic. It also has a good bond strength with low surface-energy plastics on which most acrylic adhesives cannot adhere well. It is UV and moisture stable.

Foam This is a high strength good all round mountiing adhesive for application to most surfaces smooth or uneven. It is UV and moisture stable
