

## Telephone Wall Sockets

A selection of Master or Secondary (Slave/Extension) wall mounting sockets that are available with IDC or screw terminals. The sockets are either surface or flush mounted and are available in 3 different styles. The master sockets contain a 1.8 $\mu$ F capacitor, whilst the secondary sockets contain terminal connectors only.

**Type 1** – Surface mount wall socket with all the components fastened to the cover. Supplied complete with wall fixing screws. Dims. (HxWxD): 67.5 x 67.5 x 29.1mm.

**Type 2** – Flush mount wall socket with all the components fastened to the removable cover. Dims. (HxWxD): 84 x 84 x 21mm.

**Type 3** – Flush mount wall socket with all the components fastened to the removable cover. The unit has two outlets from a single incoming line. Dims. (HxWxD): 84 x 84 x 21mm.
