Material Safety Data Sheet for GP Carbon Zinc batteries

IDENTITY (As Used on Label and List)
Carbon Zinc

Note: Blank spaces are not permitted if any item is not applicable or no information is available, the space must be marked to indicate that.

Section I

Manufacturer's Name
GPI International Ltd.

Emergency Telephone Number

Address (Number, Street, City State, and ZIP Code)
8/F GP Building, 30 Kwai Wing Road,
Kwai Chung, N.T. H.K.

Telephone Number for information 852-2484-3333

Date of prepared and revision Sep 8, 2011

Signature of Prepare (optional)

Section II - Hazardous Ingredients / Identity Information

Hazardous Components:
Description: Approximate % of total weight

Lead : <0.2 Wt%
Mercury : <0.0001 Wt%
Cadmium : <0.001 Wt%

Section III - Physical / Chemical Characteristics

Boiling Point N.A.
Specific Gravity (H₂O=1) N.A.
Vapor Pressure (mm Hg) N.A.
Melting Point N.A.
Vapor Density (Air=1) N.A.
Evaporation Rate (Butyl Acetate) N.A.
Solubility in Water N.A.
Appearance and Odor Cylindrical Shape, odorless

Section IV - Hazard Classification

Classification N.A.

Manufacturer reserves the right to alter or amend the design, model and specification without prior notice.
Section V – Reactivity Data

<table>
<thead>
<tr>

Health Hazard (Acute and Chronic) / Toxicological information

- In case of electrolyte leakage, skin will be itchy when contaminated with electrolyte.
- In contact with electrolyte can cause severe irritation and chemical burns.
- Inhalation of electrolyte vapors may cause irritation of the upper respiratory tract and lungs.

Section VII - First Aid Measures

First Aid Procedures

- If electrolyte leakage occurs and makes contact with skin, wash with plenty of water immediately.
- If electrolyte comes into contact with eyes, wash with copious amounts of water for fifteen (15) minutes, and contact a physician.
- If electrolyte vapors are inhaled, provide fresh air and seek medical attention if respiratory irritation develops. Ventilate the contaminated area.

Section VIII - Fire and Explosion Hazard Data

Extinguishing Media

Carbon Dioxide, Dry Chemical or Foam extinguishers

Special Fire Fighting Procedures

N.A.

Unusual Fire and Explosion Hazards

- Do not dispose of battery in fire - may explode.
- Do not short-circuit battery - may cause burns.
Section IX – Accidental Release or Spillage
Steps to Be Taken in Case Material is Released or Spilled

Batteries that are leakage should be handled with rubber gloves.
Avoid direct contact with electrolyte.
Wear protective clothing and a positive pressure Self-Contained Breathing Apparatus (SCBA).

Section X – Handling and Storage
Safe handling and storage advice

Batteries should be handled and stored carefully to avoid short circuits.
Do not store in disorderly fashion, or allow metal objects to be mixed with stored batteries.
Never disassemble a battery.
Do not breathe cell vapors or touch internal material with bare hands.
The cells and batteries shall not be stored in high temperature, the maximum temperature allowed is 60 °C for a short period during the shipment, Otherwise the cells maybe leakage and can result in shortened service life.

Section XI – Exposure Controls / Person Protection

<table>
<thead>

Section XII – Ecological Information
N.A.

Section XIII – Disposal Method

Dispose of batteries according to government regulations.
Section XIV – Transportation Information

In general, all batteries in all forms of transportation (ground, air, or ocean) must be packaged in a safe and responsible manner. Regulatory concerns from all agencies for safe packaging require that batteries be packaged in a manner that prevents short circuits and be contained in “strong outer packaging” that prevents spillage of contents. All original packaging for GP Carbon Zinc batteries has been designed to be compliant with these regulatory concerns.

Carbon Zinc batteries (sometimes referred to as “Dry cell” batteries) are not listed as dangerous goods under the IATA Dangerous Goods Regulation 52 Edition 2011, ICAO Technical Instructions and the U.S. hazardous materials regulations (49 CFR). These batteries are not subject to the dangerous goods regulations provided they meet the requirements contained in the following special provisions.

<table>
<thead>
<tr>
<th>Regulatory Body</th>
<th>Special Provisions</th>
</tr>
</thead>
<tbody>
<tr>
<td>ADR</td>
<td>295 - 304, 598</td>
</tr>
<tr>
<td>IMDG</td>
<td>UN 3028 Provisions 295 - 304</td>
</tr>
<tr>
<td>UN</td>
<td>UN 3028 Provisions 295 - 304</td>
</tr>

</tr>
<tr>
<td>IATA</td>
<td>A123</td>
</tr>
<tr>
<td>ICAO</td>
<td>UN 3028 Provisions 295 - 304</td>
</tr>
</tbody>
</table>

All GP Carbon Zinc batteries are packed in such a way to prevent short circuits or the generation dangerous quantities of heat and meet the special provisions listed above. In addition, the IATA Dangerous Goods Regulations and ICAO Technical Instructions require the words “not restricted” and the Special Provision number A123 be provided on the air waybill, when an air waybill is issued.

Non-dangerous goods.
Such battery have been packed in inner packaging in such a manner as to effectively prevent short circuit and movement that could lead to short circuit.

Section XV - Regulatory Information

Special requirement be according to the local regulators.

Section XVI – Other Information

The data in this Material Safety Data Sheet relates only to the specific material designated herein.

Section XVII – Measures for fire extinction

In case of fire, it is permissible to use any class of extinguishing medium on these batteries or their packing material. Cool exterior of batteries if exposed to fire to prevent rupture.

Fire fighters should wear self-contained breathing apparatus.

Manufacturer reserves the right to alter or amend the design, model and specification without prior notice.
