The IntelliTweeze® is a quick and easy way of testing and troubleshooting many types of components. With the use of only one hand, this lightweight unit will quickly measure resistance, capacitance, inductance, continuity and polarity.

Measures Resistance, Capacitance, and Inductance
The primary display shows the present reading. The secondary display (above the primary display) shows the present reading of additional parameters when the primary display shows other features (L,C). The bar graph provides an analog indication of the measure input.

Measures Continuity
The beeper sounds for resistance below the threshold, or to indicate momentary open circuit.

Measures Diode Polarity
Manual setting for testing polarity on diodes.
