

## IFO3000 Spinning Levitating Globe

Using the power of electro-magnetism the 140mm globe “magically” floats in mid-air, just like the Earth. Additional IFO accessories (Mini car, picture frame and shuttle) can be floated in the IFO3000 unit (purchase separately). These **additional accessories** have carefully selected magnets supplied with them that allow them to float and spin. Ideal for “catching” peoples attention in reception areas and sales counters etc.

- Advanced, patented magnetic-field technology ensures exceptional stability
- Features an auto-rotate mechanism which can turn objects clockwise, counter clockwise, or not at all
- Pass your hand above and below the globe and experience the marvel of electro-magnetic levitation

Contents: LH00652 is supplied with a 140mm blue globe, universal “spacer” to aid initial levitation and a 220V UK power adaptor
