The ATMEL MBC-SAM9X35 ARM9 Board is an ARM embedded board produced by Embest, integrate the ATMEL ARM926EJ-S-based processor AT91SAM9X35, operating at 400MHz frequency, and can support WinCE and Linux. The board has 128MB DDR2 SDRAM, 256MB NandFlash, 4MB DataFlash, 64KB Serial EEPROM, 128B one-wire EEPROM.

*Ethernet module is limited to the core board-P Series

, Hardware Features

ARM926EJ-S™ ARM® Thumb® Processor running up 400 MHz @ 1.0V +/- 10%

16 Kbyte Data Cache, 16 Kbyte Instruction Cache, Memory Management Unit

One 64 KByte internal ROM embedding bootstrap routine: Boot on NandFlash, SDCard, Dataflash or serial dataflash

Programmable order

One 32 KByte internal SRAM, single-cycle access at system speed

External 128MB DDR2 SDRAM, 256MB NandFlash, 4MB DataFlash, 64KB Serial EEPROM, 128B one-wire

10/100Mbps Ethernet MAC controller(only for MBC-SAM9X35-P)

, Software Features(updating)

filesystem

Test routines and resources based on MDK

Project	Description
audio	Audio test
nandflash	Get familiar with the Nandflash operation
fatfs	Get familiar with the basic operation of file system

Base on FAT file system and Embedded file system lib implementation

Use SPI interface to access dataflash code efficiency. datafalsh twi-eeprom Applying the twi host to access the eeprom chip

rtt The application of the real-time/timer The application of the real-time clock rtc The application of twi with the Master and twi

slave

the application of the Ethernet

The implementation of emac_uip_helloworld

web-server and the telnet the device emac_uip_telnetd The application of remote access emac_uip_webserver The application of the web server sdmmc The application of sdcard interface

sdcard The application of sdcard

fatfs_sdcard The application of file system and the sdcard

usb_device_core The application of USB UDPinterface

usb_device_hid_transfer The application of USB Human Interface Device class

The application of USB Communication usb_device_cdc_serial

Device class

usb_device_hid_keyboard Base on the USB HIDdriver, the button test

The application of the buzzer buzzer

tsensor The application of the temperature sensor lcd The application of the lcd touchscreen The application of the touchscreen Button Use the interruption to test the button
