

# Mini Microscope for iPhone 4

## MINSCPI4

Fit this tiny gadget to your iPhone 4 and it will be transformed into a mini microscope capable of 60 x magnification.

Are you curious about all the goings on in the world beyond what our eyes are capable of seeing? You probably need a microscope – and not one of the big hulking ones from science class. If you are the proud owner of an iPhone 4, then this is the gadget for you! Attach the mini microscope to the lens of your phone's camera and you'll be able to zoom in on your subject to really see it up close and personal.

Three built-in illuminating LED white lights, one of which can also reliably verify watermarks, ensure you won't miss out on any of the minutiae and, best of all, you can even take still images of your discoveries using the camera function on your phone.

- >> Compact 60x Microscope with 3 LED (2x white LED and 1x note detector LED)
- >> Pocket-sized for portability
- >> Dimensions: 3.7 x 4.1 x 1.7 cm
- >> Battery LR1130 x 3 pieces
