

The company TKK Srpenica was founded in 1947, with the aim to rebuild and develop traditional way of obtaining and processing chalk in Soča valley. During it's long and successful work, TKK Srpenica prove itself to be a specialist in the production of high quality chemical products used in building. Production programme involves the production of sealants (acrylic sealants, silicone sealants, MS, polysulphide and polyurethane sealants), polyurethane foam, adhesives, mortars and admixtures for concrete and mortars. Rich offer of products is enlarged with the production of technical sprays.

Main reason for success is foremost capable and motivated personnel. In the laboratories with modern equipment, engineers in cooperation with other specialist in building as final customers, thoroughly develop products. Continual development, putting the customer in the centre of business, conformability of products with strict European standards and conducting business according to ISO standards (9001 and 14001), are the essence of philosophy of TKK Srpenica.

TEKAPUR

Polyurethane foam

PU - foam hand held

For sealing, filling, insulating and installation.
Packaging: 750 ml, 500 ml, 400 ml, 250 ml

PU - foam winter hand held

For sealing, filling, insulating and installation at temperatures up to -10°C.
Packaging: 750 ml

PU - foam hand held multiposition

For easy and precise sealing, insulation, filing and setting on places which are hard to reach. Particularly useful in situations where a normal can, turned upside down, would obstruct precise application (for gaps under the ceiling).
Packaging: 600 ml

PU - foam plus

For sealing, filling, insulating, fixing, installing and mounting. It has 30% greater output.
Packaging: 750 ml

PU - foam hand held for sealing pipes

For gluing and jointing concrete water pipes, water shafts and drain pipes.
Packaging: 750 ml

PU - foam fire retardant hand held and gun grade

For sealing, filling, insulating and installation where fire - retardant materials are required.
Packaging: 700 ml

PU - foam gun grade

For sealing, filling, insulating, mounting and installation with PU - foam guns. Because of precision application is less waste.
Packaging: 750 ml

PU - foam winter gun grade

For precision sealing, filling, insulating, mounting and installation at temperatures up to -10°C.
Packaging: 750 ml

PU - foam gun grade for roofing tiles

PU foam for adhering and fixing roofing tiles to roofing frames.
Packaging: 750 ml

PU - foam gun grade for bonding

For fixing, sealing and filling. It has good adhesion and low post expansion.
Packaging: 750 ml

PU - foam gun grade fast setting

For sealing, filling, insulating, mounting and installation where fast setting is required.
Packaging: 750 ml

PU - foam gun grade sound insulating

For sealing, filling, insulating, mounting and installation where sound insulation is required.
Packaging: 750 ml

PU - foam gun grade mega 65

For precision sealing, filling, insulating and mounting. 40% more PU foam than normal PU foam.
Packaging: 750 ml

PU - foam gun grade mini mega

For precision sealing, filling, insulating and mounting. 40% more PU foam than normal PU foam.
Packaging: 500 ml

PU - foam two component

For more difficult sealing, filling, insulating, mounting and installation in areas without excessive dampness.
Packaging: 400 ml

TEKASIL

Silicone sealants

Acetat profi

For installation of glass, copelite glass and aluminium, and for sealing ceramics.

Base: acetic acid silicone

Packaging: 300 ml cartridge, 600 ml sausage

Acetat

For sealing joints between glass, aluminium and ceramics subjected to modest stresses.

Base: acetic acid silicone

Packaging: 280 ml cartridge, 600 ml sausage

Sanitar acetat

For sealing ceramics and aluminium in damp areas.

Base: acetic acid silicone

Packaging: 300 ml cartridge, 60 ml tube

300°C acetat

For sealing of joints which are exposed to high temperatures.

Base: acetic acid silicone

Packaging: 300 ml cartridge, 60 ml tube

Neutral profi

For installation of glass in wood, aluminium and PVC frames and sealing expansion joints.

Base: neutral oxim silicone

Packaging: 300 ml cartridge, 600 ml sausage, 60 ml tube

Neutral

For sealing balconies, terraces, garages, cars, boats and trailer homes.

Base: neutral oxim silicone

Packaging: 280 ml cartridge, 600 ml sausage

Sanitar neutral

For sealing joints between various materials in damp areas.

Base: neutral oxim silicone

Packaging: 300 ml cartridge

300°C neutral

For sealing various materials which are exposed to high temperatures.

Base: neutral oxim silicone

Packaging: 300 ml cartridge

Alkoxi neutral

For installing glass into wooden, aluminium or PVC frames.

Base: neutral alkoxi silicone

Packaging: 300 ml cartridge, 300 ml, 400 ml and 600 ml sausage

Firestop

For sealing joints to control the spread of fire, smoke and toxic gases, joints around fire doors, pipe, cable and channel entries through walls and floors.

Base: neutral oxim silicone

Packaging: 300 ml cartridge

2K pourable

Pouring compound for making simple reliefs and producing simple forms and stuccos.

Base: polycondensate two - part silicone

Packaging: 3,09 kg and 20,9 kg pail

2K Z 010

For making reliefs and producing complex forms with undercuts.

Base: polycondensate two - part silicone

Packaging: 5,25 kg and 21 kg pail

T

For the production of heat insulating glass where there is a lot of UV stress. It has excellent adhesion to various forms of glass, aluminium, ceramics, wood, PVC. It is resistant to various weather conditions and chemicals.

Base: neutral oxim silicone

Packaging: 300 ml, 400 ml and 600 ml sausage, 20 kg and 25 kg buckets

TEKADOM

Acrylic sealants

Acrylic sealant profi

For sealing porous materials. For joints between window frames, doors, plaster tiles and concrete elements. For the repair of small cracks in walls.

Base: acrylic dispersion

Packaging: 300 ml cartridge, 600 ml sausage

Acrylic sealant

For sealing porous materials (concrete, wood, ceramic tiles, plaster tiles,...). For repairing small cracks in walls. It can be painted, does not contain solvents and it can be used for sealing

on damp surfaces.

Base: acrylic dispersion

Packaging: 300 ml cartridge, 600 ml sausage

For parquet

For finishing works in the parquet laying trade. It is also suitable for laminates, wooden flooring and cork. It can be sanded, painted and it is resistant to atmospheric conditions and ageing.

Base: acrylic dispersion

Packaging: 300 ml cartridge

Bitumen

For repairs of cracks, holes, fractures on roofs and between old membranes. For sealing cracks, valleys and joints between concrete, wall, plaster and sheet metal (copper, zinc, aluminium). Suitable for sealing chimney covers.

Base: bitumen with solvents

Packaging: 300 ml cartridge

Waterproof sealant

For repairing leakages, crack filling and sealing in any weather. For sealing dry, wet and even greasy surfaces. It is mould resistant and can be painted.

Base: synthetic rubber with solvents

Packaging: 300 ml cartridge

Waterproof coating

For repairing leakages, filling cracks and is also used as a protective coating. For dry, wet and even greasy surfaces. It can be painted.

Base: modified rubber reinforced

Packaging: 1l can

Aquakit

For repairing leakages in water piping, tanks, central heating,... For various repairs under water in swimming pools, aquariums. It can be drilled, sawed and sanded. It can be painted.

Base: epoksi - merkapt

Packaging: 57 g blister

Tekastrip

Tekastrip is a plastic, adhesive multi - use tape fabricated on the basis of synthetic rubber, used as sealing or spacing material.

Packaging: reels 20 x 2 x 3 and reels of 50 m in length

TEKAFIKS

Adhesives

Construction adhesive BT

For gluing porous construction materials and styrofoam. It has quick adhesion for wood, concrete, ceramics, stone, styrofoam and PVC. Does not contain solvents. It is usable on dump materials.

Packaging: 300 ml cartridge, 60 ml tube

Construction adhesive ST

Universal adhesive for gluing all types of construction materials except styrofoam. For gluing decorative panels, wooden tiles, stair edges, floor and wall tiles, metallic parts,...

Packaging: 300 ml cartridge

PU universal adhesive

For gluing wooden parts where quick hardening is required (150 kg / cm²). Suitable for gluing wooden elements onto porous and non porous materials having carrying functions.

Packaging: 310 ml cartridge

For mirrors

For adhesion of mirrors to various surfaces (wood, ceramics, clinker, brick, glazed tiles,...).

Packaging: 300 ml cartridge

For aquarium

For the construction of aquarium and for sealing larger glass constructions. Also for sealing ceramics and aluminium.

Packaging: 300 ml cartridge

For marble

For sealing marble, neutral stone and granite. Ideal for sealing neutral stone facade. It does not leave stains on marble or neutral stone and it is mould resistant in damp places.

Packaging: 300 ml cartridge

Multi use

All types of household sealing and gluing. Replaces mechanical fixing and other adhesives. For sealing in toilets and other damp places.

Packaging: 290 ml cartridge, 60 ml tube

Super MS transparent

For gluing and sealing where sealant or glue shouldn't be seen. Very suitable for gluing glass on glass.

Packaging: 290 ml cartridge

MS marine deck bonding

For all types of bonding on deck. Resistant on sea water and UV. Environment friendly and can be painted.

Packaging: 290 ml cartridge

For bonding swelling waterstop

For bonding swelling waterstop on standard building materials, such as concrete, metal and plastics (PVC). It has good adhesion on dry, wet and rough surfaces.

Packaging: 290 ml cartridge

TEKAFLEX

Polyurethane sealants and sealants based on MS polymers

PU 15 polyurethane

For dilatation joints in construction or for sealing window frames. Especially suitable for places, where there is a lot of dilatation and stress. It can be painted and it is resistant to all weather conditions and UV.

Packaging: 310 ml cartridge, 600 ml sausage

PU 40 polyurethane

For gluing window frames, light construction

materials, roofing tiles, floor panels. For sealing joints in vacuum systems, containers, silos, aluminium constructions. It can be painted and it is resistant to all weather conditions and UV.

Packaging: 310 ml cartridge and 600 ml sausage

MS 15 hybrid MS polymer

For dilatation joints in construction, on outer walls, in green - houses or for sealing window frames. It is environment friendly. It can be painted. It is resistant to various atmospheric conditions, aging and also UV.

Packaging: 290 ml cartridge and 600 ml sausage

MS 40 hybrid MS polymer

For gluing constructions under vibrations. For sealing joints in vacuum systems, aluminium constructions, cisterns, silos. It is environment friendly and it can be painted. Resistant to atmospheric conditions, aging and UV resistant.

Packaging: 290 ml cartridge and 600 ml sausage

MS 55 hybrid MS polymer

For excellent adhesion and very strong bond on the most building materials, metals and plastics. It

has good extrudability even at low temperatures, excellent mechanical properties and high hardness. It is environment friendly and resistant to ageing and sunlight.

Packaging: 290 ml cartridge and 600 ml sausage

MS marine deck caulking hybrid MS polymer

For waterproof sealing of seams and teak wood decks of shipbuilding. It is resistant to sea water, UV and all weather conditions. It has excellent adhesion to most materials: wood, metals, aluminium, steel, concrete, ceramics, rubber, PVC, glass

Packaging: 290 ml cartridge and 600 ml sausage

TEKASOL

Technical aerosols

Multipurpose grease

Mineral oil based multipurpose grease for elimination of friction between mechanical moveable parts and sliding surfaces like hinges, latches, engine areas and bearings. It is water repellent and provides excellent protection and long lasting lubricating quality.

Packaging: 400 ml aerosol

Multipurpose adhesive

Neoprene adhesive for professional and do it yourself use on different surfaces like metal, plastics, wood, foam, glass, paper

Packaging: 250 ml aerosol

Spray paint remover

For removing any type of paint from metal or wood surfaces. It is very effective and can be used also on vertical surfaces.

Packaging: 400 ml aerosol

Welding antiadhesive

For cleaning and protection of product for the welding process. It protects tools and welding elements from sticking of the welding splitters without affecting the weld itself. Allows further varnishing, galvanizing or chroming.

Packaging: 400 ml aerosol

Marking spray

For making lines on a variety of surfaces. It can be used indoors and outdoors, for horizontal signalisation, for parking lots, for indication of danger zones and for limiting working areas.

Packaging: 400 ml aerosol

Releasing agent

For releasing of nuts, bolts, joints threads, hinges and all other mechanical parts affected by rust and oxidation. Protects metals against corrosion and repels moisture. Leaves long lasting, waterproof film.

Packaging: 400 ml aerosol

Zinc 98%

Protective coating for metals that gives an extremely tough and long lasting metal coating that can be painted or left as a final protection and protects metal surfaces from oxidation.

Packaging: 400 ml aerosol

Light zinc spray

Protective coating for metals. Makes metal surfaces resistant to weathering. It is ideal for retouching and for finishing and repairing gates, railings, gutters and all metal parts that require protection.

Packaging: 400 ml aerosol

MF 101

Cleans grease and grime, removes adhesive residues, protects electrical systems by replacing the moisture, lubricates and protects metal surfaces from moisture and corrosion.

Packaging: 400 ml aerosol

Silicone spray

Grease free lubricant, protective and parting agent as well as conditioner for plastics. Suitable for plastics, wood, rubber and metals. Forms a clean non-curing lubricated film and protects from oxidation and corrosion.

Packaging: 400 ml aerosol

TIOELAST

Polysulphide sealants

KVZ

polysulphide polymer

For sealing joints between various building materials subjected to larger dilatation.

Packaging: cartridge 450 ml; 0,6 kg; can: 2,5 l; 4 kg

KOS

polysulphide polymer

For sealing joints subjected to greater chemical stress.

Packaging: cartridge 450 ml; 0,6 kg; can: 2,5 l; 4 kg

TM

polysulphide polymer

For the construction of insulating glass.

Packaging: cartridge 450 ml; 0,6 kg; can: 2,5 l; 4 kg; 203,5 l barrels

Butmelt

polyisobutylene

For primary sealing of heat-insulation glass.

Packaging: reel 7 kg; 2,8 kg; 1,3 kg; 1 kg

CLEANERS

Tekapur cleaner

Cleaner for fresh polyurethane foam, useful also for removing fats, oils, tar, waxes, glue residue and fresh sealants. It is used also for cleaning guns for polyurethane foam.

Packaging: 500 ml aerosol

Tekasan

Liquid cleaner for mildew removal in damp places and as a disinfectant in toilets.

Packaging: 500 ml plastic container

Tekafin

Cleaner for cleaning the tools used for the application

of sealants.

Packaging: 1l, 5l tin

Apursil

Universal cleaner for home use (stains on carpet, remains of stickers and various adhesives). Also for cleaning hardened silicone and polyurethane foam.

Packaging: 150 ml aerosol

Tekapursil S

Cleaner used for the removal of hardened silicone. It also removes mould from old joint gaps.

Packaging: 110 ml tube

Silver line

PU - foam hand held

For sealing, filling, insulating and installation.

Packaging: 650 ml

on damp surfaces.

Base: acrylic dispersion

Packaging: 280 ml cartridge

Tekasil univerzal

For sealing joints between glass, aluminium and ceramics subjected to modest stresses.

Base: acetic acid silicone

Packaging: 280 ml cartridge

Tekadom univerzal

For sealing porous materials. For repairing small cracks in walls. It can be painted, does not contain solvents and it can be used for sealing

PU foam guns

Sealant guns

Other products for building industry

CEMENTOL

Admixtures for concrete, mortar and grout

Set accelerating and hardening accelerating admixtures

Plasticizing and superplasticizing admixtures

Set retarding admixtures

Air entraining admixtures

Water resisting admixtures

Water retaining admixtures

Admixtures for injection grouts

Admixtures for gypsum

Additives for cement

MORTARS

Special dry mortars

Adhesives for tiles

Self - leveling compound

WATER - REPELLENT AGENTS AND OTHER PROTECTIVE COATINGS

TEKAPUR
