Now in rugged pouch for the belt.

The fixed head and the fast-turning zone just below the head allow **rapid twisting**. This makes time-consuming grip adjustments, as required with other conventional precision screwdrivers, unnecessary.

The power zone has integrated soft zones near the blade tip to ensure **high torque transfer for loosening or tightening screws** without losing contact with the screw.

The precision zone directly above the blade gives the user a better feel **for the right rotation angle during fine adjustment work**.

The Wera Black Point tip, as well as a refined hardening process, ensure **long service life** and **enhanced corrosion protection**.

Multi-component screwdriver handle for **ergonomic working**.

Indispensable for many users, including electronics technicians, opticians, precision engineers, jewellers, EDP hardware fitters and model-makers.

# L-key Set Multicolour

With convenient colour-coded tubing.

**NEW**

## L-keys in SPKL quality Multicolour

9-piece set

Highest quality: Round material with profiled Hex-Plus design, also with the ballpoint version. The Hex-Plus profile extends the service life of hexagon socket screws. BlackLaser surface treatment for high corrosion protection.

The rubber sleeve provides a pleasant grip, particularly in applications at low temperatures. The colour-coded tubing makes it easy to find the right tool.

## Hex-Plus

Hexagon screws can endure a problem because the contact surfaces delivering the power from the conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

Many professionals work with their tools at both a fixed location, such as a workshop, and at external sites away from their base. Frequently it is only out on site that a decision is made as to whether use a manual or power tool for a particular job.

The unique Kraftform Kompakt tool kits equip the user for both types of operation with just a single set, and as the kits come in rugged pouches with belt loops, they are easily carried wherever needed.
