

The newly developed filter fan design serves three functions:

- Easy mounting for axial fan
- High air flow
- High EMI screening: numerous integrally molded contact springs hinder electromagnetic interference fields originating from within the cabinet or penetrating from outside.

The self-adhesive seal of the mounting frame prevents dust and water from entering the cabinet.

A spring contact strip on the EMI version additionally forms a continuous conductive connection between the cabinet cut-out and the mounting frame.

The necessary cut-out in the cabinet is effectively sealed against high frequency radiation directly on the line of the cabinet wall.

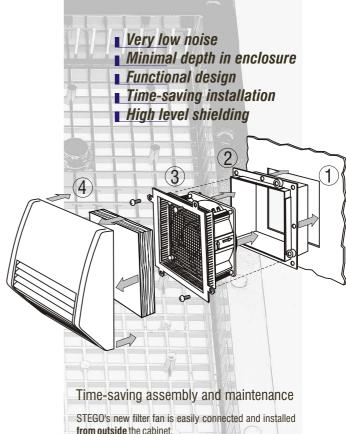

The functional design of the intake and exhaust fan hoods very effectively prevents direct infiltration of falling water and dust.

Air channeling makes the filter fan particularly quiet in operation.

from outside the cabinet.

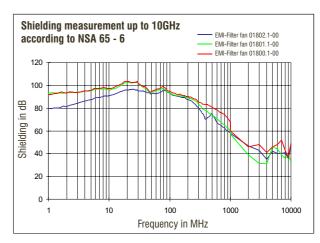

1) When using the EMI version, only the cut edge of the cabinet opening must be paint-free.

The advantage: quick and reliable removal of the paint layer and no damage to the cabinet sides.

2 Remove protective film from the sealing strips on the mounting frame and press into the cabinet opening. The frame stays permanently in the cabinet.

3 Electrically connect the axial fan using the clip connectors and push the unit into the mounting frame. Affix using screws.

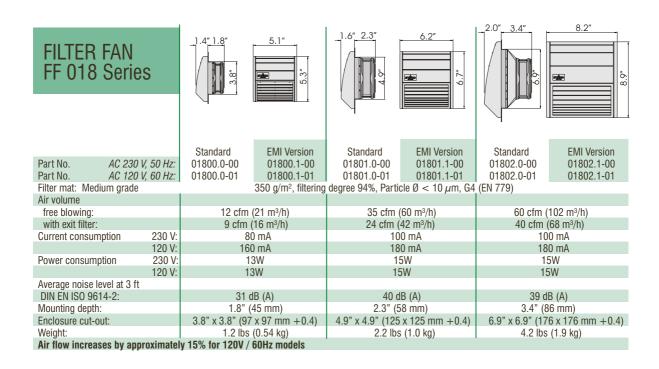

4 Insert the filter mat in the hood. Clip hood on. Finished.

U.S. Patent No. 6,699,301 B1

EXHAUST FILTER EF 118 Series

	Standard	EMI Version	Standard	EMI Version	Standard	EMI Version
Part No.:	11800.0-00	11800.1-00	11801.0-00	11801.1-00	11802.0-00	11802.1-00
Filter mat: Medium grade	350 g/m ² , filtering degree 94%, Particle Ø < 10 μ m, G4 (EN 779)					
Mounting depth:	0.6" (16 mm)		0.6" (16 mm)		0.6" (16 mm)	
Enclosure cut-out:	3.8" x 3.8" (97 x 97 mm +0.4)		4.9" x 4.9" (125 x 125 mm +0.4)		6.9" x 6.9" (176 x 176 mm +0.4)	
Weight:	0.6 lbs (0.27 kg)		0.8 lbs (0.38 kg)		1.3 lbs (0.60 kg)	

Mounting frame	Hole centers for attaching with screws - hole Ø 1/8" (3 mm)					
X	X = 4.3" (109 mm)	X = 5.4" (137 mm)	X = 7.4" (188 mm)			

OTHER TECHNICAL DATA:

Ball bearing, aluminum frame, plastic impeller UL94V-0 Axial fan:

Operational life min. 50,000 hrs at 77°F (RH 65%)

Ambient temperature -22°F to 158°F

2 lead wires 4" long with pressure clamps, type AWG 14 max. DC Axial fan in 12 V, 24 V, 48 V available on request

Filter fan & exhaust Plastic, UL94V-0

Color light grey, temperature resistant -31°F to 158°F. filter housing:

Mounting frame: With double sided industrial adhesive band for affixing

to the outside of enclosure. Certain operating circumstances may

make the additional use of screws necessary.

Filter material: Synthetic fiber with progressive construction, temperature resistant

to 212°F, self-extinguishing class F1. Moisture resistant to 100% RH.

Can be cleaned by washing or vacuuming for reuse.

Replacement filter mats available on request.

The fan mounting on the EMI Version is plated and the mounting

frame is fitted with Be Cu contact strips. Protection with standard filter mats G4: IP 54.

Using fine filter mats F5 increases the protection to IP 55 but

reduces the air volume.
