# USB2.0 4 Port Hi-Speed Hub

pro-SIGNAL

Features:

- USB V2.0 Specifications compatibility
- High-speed of 480 Mbps data transfer rate (Vs. 12 Mbps of USB 1.1 and 400 Mbps of IEEE 1394 firewires)
- Plug and play capability with USB devices
- Supports Self-Powered Mode, using Switching power indicated by power LED
- Hot-Swappable
- Connects up to a maximum of 127 USB devices through cascading multiple hubs
- Over current detection and protection with LED status indicators
- 4 external auto speed selectable USB Type A downstream ports, supporting 1.5, 12, and 480 Mbps

MAC OS X(10)

Introduction :

The USB 2.0 High-Speed Hub has 4 ports that will connect to either the USB Revision 2.0 High-Speed or the USB Revision 1.1 peripheral device. This high-speed hub allows you to add multiple high-performance USB 2.0 peripherals to the PC. Moreover, this product is fully backward compatible with the USB Revision 1.1 products, meaning your previously invested USB 1.1 devices can continue to function as usual. The USB 2.0 High-Speed Hub is fully compliant with the USB 2.0 specifications and permits you to connect up to a maximum of 127 USB devices to your PC through daisy-chain. Furthermore, with its increased bandwidth of 480 Mbps (exceeding that of IEEE 1394 firewires with 400 Mbps), this hub will allow you to connect devices that consume a great deal of bandwidth such as external storage devices, scanners, printers, DVD drives, CD-RW drives, MO (Magneto-Optical) drives, and digital cameras / camcorders to your computer

System Requirements

IBM Compatible Pentium-233 MHz or faster and MAC PCs
64Mb RAM or more
PC or MAC with available USB ports
Systems with OS: MS Windows 98SE / ME / 2000 / XP
