ANT016BSB

Static Shielding Bubble Laminate (Mil B 81705)

The lamination of an ESD transparent static shielding bag film laminated to an anti-static polyethylene. Bubble shield provides both physical and anti-static protection.

The outer layer is an ESD transparent static shielding film. This material forms a Faraday cage around the product, offering superior static shielding protection, while the inner layer of pink anti-static bubble shield gives excellent physical protection. Both of these materials are qualified to Military Standard B 81705.

Features:

- Provides 'Faraday Cage' protection against ESD
- Conforms to MIL-PRF-81705D Type III, EIA 625, EIA 541, ANSI/ESD S-20.20
- Semi transparent finish
- This product is fully reusable, protecting both your product and the environment

Configuration(s):

Our bags are available in custom sizes or in several industry standard sizes. Bags are offered heat sealed along the three edges and provided with a low static peel and seal lip.
