Description of the Han-Modular® system

The Han-Modular® series is a new system of inserts designed to meet the specific requirements of individual customers. In close cooperation with potential users a range of modular inserts have been developed allowing the simple assembly of custom designed complete connectors which meet the diverse requirements encountered by designers today.

Han-Modular® is a logical development of the Han-Com® series which already offers the combination of power and signal circuits in one connector.

The individual modules of this series now allow the integration of electrical, optical and gaseous signal and power connections in one connector assembly.

The pneumatic contacts are also suitable for the connection of liquid media. However it must be stated that a combination of electrical and liquid connections in one connector is not allowed according to VDE regulations.

The individual contacts used in this system are all from existing well proven ranges and it is possible to use combinations of 1 to 12 modules depending on the size of the hoods and housings chosen.

The basic modules snap into a mounting frame and can be exchanged separately at any time.

Advantages:

- Custom designs can be simply assembled
- Optimum solutions can be reached
- Stock can be minimized

Features

- Compact design saves space
- Modular structure increases flexibility
- Simple and quick assembly
- Robust design
- Two part grommet housing

Technical characteristics

Hoods/Housings

Material	zinc die-cast
Surface	nickel plated
Locking element	stainless steel
Hoods/Housings sealing	NBR
Limiting temperatures	-40 °C ... +125 °C
Degree of protection acc. to DIN EN 60 529	
for coupled connector	IP 65
Mechanical working life	
- mating cycles	500
PE contact	
wire gauge	10 mm ² / AWG 8
Stripping length	10 mm
Tightening torque	1 Nm

Protection covers

Material	polycarbonate
Locking element	Polyamide
Hoods/Housings sealing	NBR
Limiting temperatures	-40 °C ... +125 °C
Degree of protection acc. to DIN EN 60 529	
for coupled connector	IP 65
Flammability acc. to UL 94	V 0

Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

Measuring and testing techniques according to DIN EN 60 512-5

① Han® Axial screw module, Wire gauge: 10 mm²

② Han® C module, Wire gauge: 6 mm²

① Hood with side entry

② Thread M25

③ Bulkhead mounted housing with locking lever

④ Carrier hood

Identification	Part number	Drawing	Dimensions in mm
Hoods side entry M 25	19 14 001 0501	4 screws are included in the delivery range 	
Hoods top entry M 25	19 14 001 0401	4 screws are included in the delivery range 	
Hoods top entry M 32	19 14 001 0402	4 screws are included in the delivery range 	
Carrier hood	09 14 001 0311		
Protection covers	09 14 001 5402		
Housings, bulkhead mounting	09 14 001 0301		Panel cut out
Protection covers	09 14 001 5401		

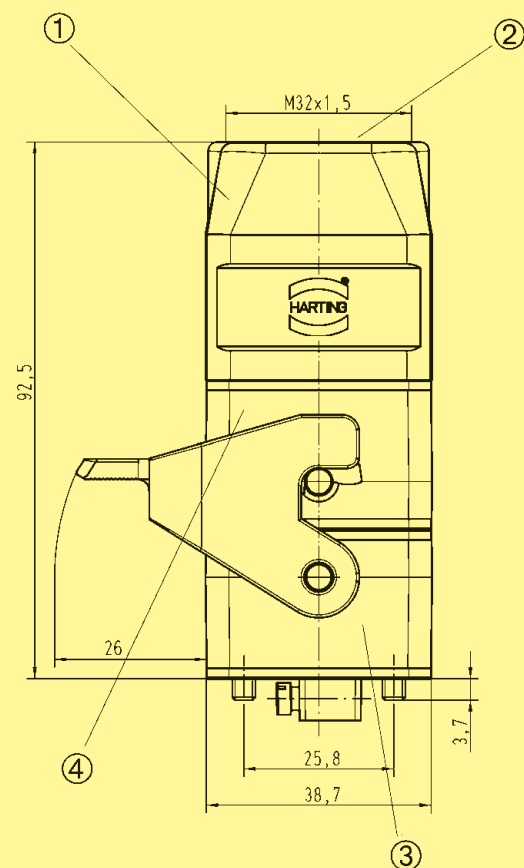

Features

- Compact and space saving
- High degree of flexibility due to modular assembly
- Easy and quick assembly
- Robust design
- Hood consists of two parts

Technical characteristics

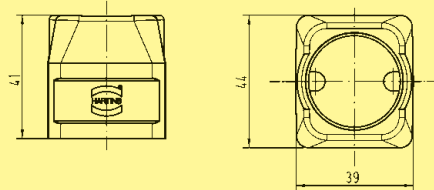

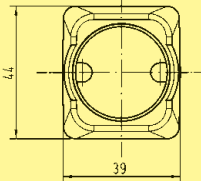

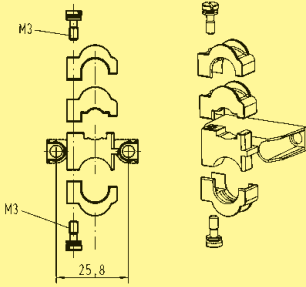

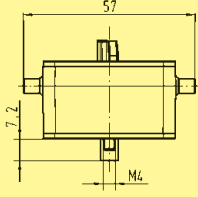

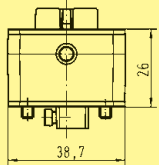

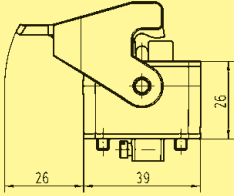

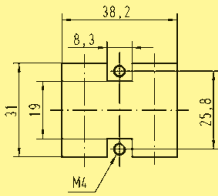

Hoods/Housings

Material	aluminium die-cast
Surface	powder-coated
Locking element	Han-Easy Lock®
Hoods/Housings sealing	NBR
Limiting temperatures	-40 °C ... +125 °C
Degree of protection acc. to DIN EN 60 529	
for coupled connector	IP 65
Mechanical working life	
- mating cycles	≥ 500
PE contact	
wire gauge	10 mm ² / AWG 8
Stripping length	10 mm
Tightening torque	1 Nm

Features

- Pre-leading grounding system according VDE
- Modules can only be assembled polarized to guarantee a correct orientation
- Alphabetical marking of module position
- High mechanical reliability of modules in case of vibration and impact stress
- No tools necessary to remove modules

Technical characteristics

Specifications DIN EN 60 664-1
DIN EN 61 984

Approvals  

Hinged frames

Number of modules 2, 3, 4, 6
PE contact
wire gauge
 - Power side 4 - 6 mm² (10 mm²)*
 AWG 12 - 10 (AWG 8)*
 - Signal side 1 - 2.5 mm²
 AWG 18 - 14
Material zinc die-cast
Limiting temperatures -40 °C ... +125 °C
Mechanical working life
 - mating cycles ≥ 500

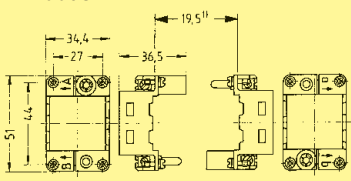

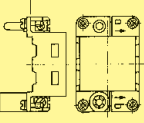

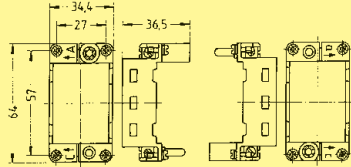

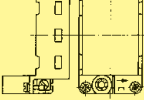

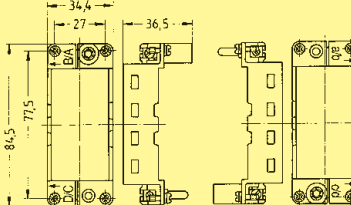

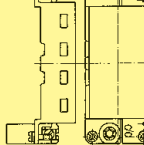

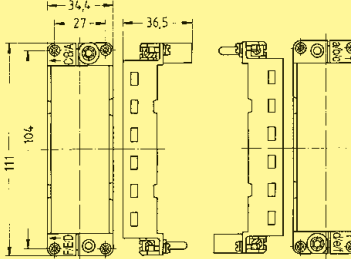

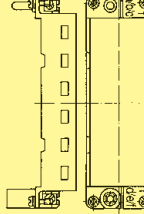

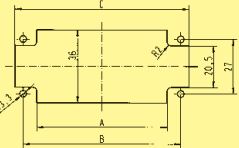

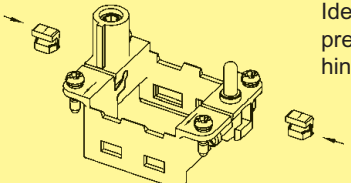

Hoods/Housings

Selection of hoods/housings see chapter 30 / chapter 31
Material aluminium die-cast
Surface powder-coated
 RAL 7037
Locking element Han-Easy Lock®
Hoods/Housings sealing NBR
Limiting temperatures -40 °C ... +125 °C
Degree of protection acc. to DIN EN 60 529
for coupled connector IP 65

Hex key SW 2 for axial setscrew			
with grip	09 99 000 0313		
Bit 1/4"	09 99 000 0369		

Features

- Axial screw terminal
- No special tools required for assembly
- Compatible to Han® C module with crimp termination

Technical characteristics

Specifications **DIN EN 60 664-1**
DIN EN 61 984

Approvals

Inserts

Number of contacts **3**
 Electrical data acc. to EN 61 984 **40 A 690 V 8 kV 3**
 Rated current **40 A**
 Rated voltage **690 V**
 Rated impulse voltage **8 kV**
 Pollution degree **3**

Rated voltage acc. to UL **600 V**
 Insulation resistance **≥ 10¹⁰ Ω**
 Material **polycarbonate**
 Limiting temperatures **-40 °C ... +125 °C**
 Flammability acc. to UL 94 **V 0**
 Mechanical working life
 - mating cycles **≥ 500**

Contacts

Material **copper alloy**

Surface
 - hard-silver plated **3 μm Ag**

Contact resistance **0.3 mΩ**

Screw terminal

- Tightening torque

mm ²	2.5	4	6	10
Nm	1.5	1.5	2	2

Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

Measuring and testing techniques according to DIN EN 60 512-5

- AWG	26 ... 14

Han
Modular

Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

Measuring and testing techniques according to
 DIN EN 60 512-5

Features

- Shielding bus separate from housing potential
- Perfect for transmission of sensitive signals (eg. bus signals)
- The four pole Han® Quintax contact is suitable for Ethernet Cat. 5e and PROFIBUS when diagonally wiring of the data pairs.

Stock items in bold type

Features

- For the transmission of clean and dry compressed
- Female contacts with / without shut off
- Removal of tubes from pre-assembled pneumatic contacts is possible

Shut off principle:

In the disconnected position the spring integrated in the female contact is active, thus the O-ring of the valve seals the opening of the air-way. During the mating process, when the defined depth of insertion is reached the male contact presses on the valve head and moves it backwards against the spring tension, so that the air-way opens.

Using of guiding pins in connection with pneumatic modules is imperative.

In addition to this guiding pins guarantee a coding, if pneumatic modules are used exclusively.

Features

- Signal pre-processing and conversion do fit into the connector
- Individual combination of input and output modules for optimal signal pre-processing
- Minimum size for integration in Han® industrial connectors (Han-Modular® and Han-Snap®)
- Economy of space by reduction the number of terminal blocks and interface modules in the switch cabinet

Han
Modular

General description

The Han-Elisa® modules are a flexible I/O system - directly in the connector.

The input and output modules are developed for 1 or 2 channels and can be combined variously and flexible for optimal signal pre-processing. Within the product family modules are available for current/voltage conversion, temperature, relay and timer.

Due to the minimized size thes modules can be integrated into the Han-Modular® and Han-Snap® system.

Signal pre-processing and conversion do fit into the connector and this will reduce installation space for terminal blocks and the number of interface modules. So the switch cabinets can be made smaller.

Technical characteristics

Power supply

(combination input and output module)

Measuring range	<p>0 ... 100 °C 20 75 108 1101</p> <p>0 ... 200 °C 20 75 108 1103</p>	<p>Input</p>	
Additional measuring ranges on request			

Han
Modular

Features

- Minimum size for integration in Han[®] industrial connectors (Han-Modular[®] and Han-Snap[®])
- Economy of space by reduction the number of terminal blocks and interface modules in the switch cabinet
- Female module for signal output

Technical characteristics

Inserts

Supply voltage	24 V (-10 % ... +25 %)
Load I_{out}	< 500 Ω
Load U_{out}	≥ 10 k Ω
Residual ripple	< 20 mV (500 Ω)
Step response (0 ... 99 %)	< 30 ms

Material	polycarbonate / LCP
Termination	Cage-clamp terminal
- mm ²	0.14 ... 1.5 mm ²
- AWG	26 ... 16

Power diagnostic	LED (green)
------------------	-------------

Temperature range

Working temperature	-20 °C ... +65 °C
Stock temperature	-40 °C ... +125 °C

Output module

Identification	Part number Female insert (F)	Drawing	Dimensions in mm
<p>Output module, current 3-ways-isolating amplifier; galvanically isolated</p> <p>Output signal 4 ... 20 mA</p> <p>Additional output signal ranges on request</p>	<p>20 75 104 2201</p>		
<p>Output module, voltage 3-ways-isolating amplifier; galvanically isolated</p> <p>Output signal 0 ... 10 V</p> <p>Additional output signal ranges on request</p>	<p>20 75 105 2201</p>		

Han
Modular

Features

- Coding of tools possible (e.g. press tools) by means of an alphanumeric identification
- I²C bus EEPROM as memory medium
- Communication with PLC via conventional digital I/Os
- Physical connection of PLC by means of well-proven Han® contacts
- Assembly of the ID module to the device by means of a Han® industrial connector

Technical characteristics

Inserts

Supply voltage	24 V via digital I/O device Han E® module (see page 06.30)
Electrical connector, 24 V	
Memory capacity	max. 128 Byte
Material	polycarbonate
Working temperature	0 °C ... +70 °C
Stock temperature	0 °C ... +85 °C
Max. length recommended between I/O device and ID module	100 m *

Han
Modular

General description

The HARTING connector identification module (ID module) is suitable for storing of data and for coding of connectors. It is integrated in a Han-Modular® standard E module.

The module can be connected to a 24 V digital I/O device of a PLC. Two digital inputs are used for detecting the module connection and the data input. Two digital outputs are used for the data output and the system clock. Furthermore the ID module must be connected with 24 V and GND. Communication is carried out with voltage levels of 24 V according to the I²C bus standard. The total memory capacity is 128 Byte, e.g. for storing part numbers to identify the module. It is also possible to store the start parameters or operating data for machine components.

A typical data structure is displayed in the following table:

Byte no.

16	15	14	13	12	11	10	9	8	7	6	5	4	3	2	1
Check sum		Operating hours of tool				Start parameter of the unit				Part number of the unit					

Applications for the ID module can be found in modular machines and product lines. A great advantage of the ID module is the non volatile decentralized storing of e.g. operating data. When changing the location stored data can protect the machines from damages. In service cases of the equipment data can be analyzed to minimize service time.

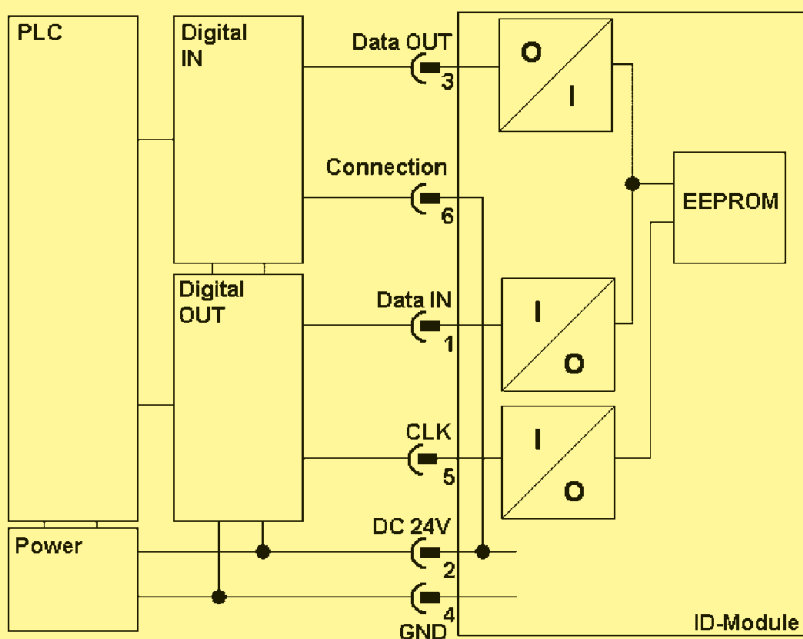

Input module

Identification	Part number Male insert (M)	Drawing	Dimensions in mm
Electronic identification module	20 70 001 1001

Block diagram / Wiring plan

Meaning of the connections

Pin no.	Name	Meaning/Function
1	Data IN	Input for data and control signals from PLC
2	DC 24 V	Power connection of the ID module
3	Data OUT	Output for data signals from ID module to PLC
4	GND	Ground
5	CLK	System clock for synchronisation
6	Connection	Output of the ID module for connection detection
