

December 9, 2011

Dear Valued Customer,

In order to provide an extended migration period for our customers, Spansion plans to issue an advance change notification (ACN) in late 2012 that will End-of-Life (EOL) the 90nm MirrorBit GL-P product offerings. The obsolescence notice will provide the customary 6-month Last-Time-Buy (LTB) plus 6-month Last-Time-Ship (LTS) schedules to our customers.

Spansion introduced the GL-S 65nm MirrorBit™ Eclipse Flash Family in 2Q of 2011. All densities, 1 Gbit, 512Mbit, 256Mbit, and 128Mbit, are now in high-volume production.

The S29GL-S product family supercedes the S29GL-P product family. Customers should consult the respective datasheets for technical guidance at:

<http://www.spansion.com/Products/Parallel-Flash/Pages/Spansion%20GL.aspx>

The GL-P to GL-S product migration and schedules are listed below:

<u>Old Product</u>		<u>New Product</u>	<u>QS Sample</u>	<u>Production</u>
S70GL02GP	⇒	S70GL02GS	Now	Now
S29GL01GP	⇒	S29GL01GS	Now	Now
S29GL512P	⇒	S29GL512S	Now	Now
S29GL256P	⇒	S29GL256S	Now	Now
S29GL128P	⇒	S29GL128S	Now	Now

If you have any questions or comments, please contact your local Spansion sales team.

Sincerely,

Robert France
Vice President, Marketing
