## Your Single Source For Value-Added Plastics Packaging

### Overview

Flambeau Packaging Solutions is an industry leader in design, development and manufacture of blow molded and injection-molded plastic storage products. We offer the industry's largest selection of stock cases and boxes for storage solutions. We pride ourselves as a market leader in contract manufacturing services for a wide range of demanding industrial applications.

### About Our Company

Flambeau Packaging Solutions is part of Flambeau Products Corporation, a member of the Nordic Group of Companies. Flambeau manufacturing facilities are located throughout the United States. Overall, the Nordic Group includes over 2,000 associates and has sales in excess of \$350 million.

### Design and Development

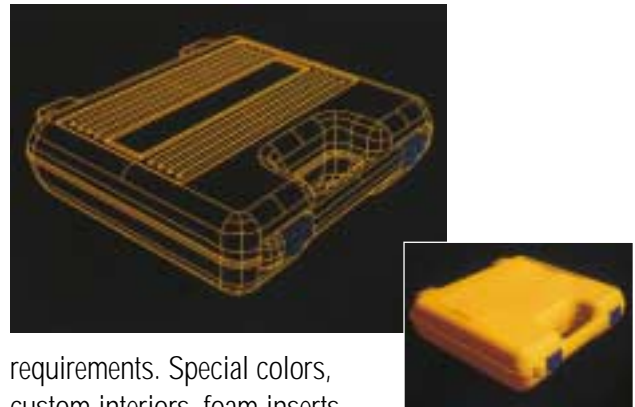

At Flambeau, we work closely with our customers to develop packaging concepts and designs to meet your specific needs. Our capabilities include design, engineering, tool-building, injection and blow-molding and finishing/decorating operations.

### Customer Service

Our customer service representatives help you solve problems. Our toll-free number places you in direct contact with professionals who can provide answers to your packaging needs. Whether it is technical assistance, or simply answers to a questions, our staff is available when you need them.

### Products

Flambeau offers more than 300 different sizes and styles of stock injection molded and blow molded boxes and carrying cases. For semi-custom cases, we have hundreds of options which can be tailored to fit your

requirements. Special colors, custom interiors, foam inserts, and a wide range of handles, latches and package accessories can be drawn upon to meet your needs.

### ISO 9001 Accreditation

Flambeaus' commitment to ongoing and continuous quality improvement is made possible by adhering to the strictest quality standards in all aspects of our business. From design and purchasing to inspections and testing controls, Flambeau continually meets or exceeds established standards.

### Flambeau Manufacturing Locations:

- Redlands, California
- Weldon, North Carolina
- Deerfield, Wisconsin
- Columbus, Indiana
- Middlefield, Ohio
- Sauffillo, Mexico

If our available stock and semi-custom stock containers don't fit your application, we offer total custom manufacturing capabilities. We can handle every detail from "Art to Part."

## Diamondback™ Tradesman's Case Utility Workstation™

NEW

Diamondback boxes are designed with a modern contoured style and manufactured from crystal clear styrene for stylish appeal and merchandising of your products. The all new Diamondbacks are excellent for use with candy, crafts, beauty aids and can be hot stamped with your name or logo.

- Sleek design for improved merchandising.
- Crystal Clear Styrene material, as clear as glass.
- Improved hinge strength and easy open lid.
- Stacking feet for neater displays.
- Applications include: food products, electronic parts, medical & lab supplies, hobby parts, office supplies, precision parts, small screws & washers. (See page 9)

Flambeau has designed a new case with special locking safety latches that make it a perfect case for handguns, hand and power tools, such as cordless drills, cordless screwdrivers, detail sanders, wrench sets and socket sets. Available as a custom case with your product logo or as a standard case for storage. Our new Tradesman's case will add value to your product's presentation. (See page 8)

Working on projects will be easier utilizing Flambeau's Utility Workstation. Ideal for toolrooms, MRO areas, temporary storage, and for servicing vehicles. This mobile system includes a sliding lid, which can be used as a work surface or removed and conveniently stored on the side of the Workstation. The lid can also be locked to secure items in the top tray. Two large compartmented cases fit in the top tray for organized parts storage. Additional flexibility comes from attachable bins and bulk storage bottom tray. (See page 11)

## Custom Capabilities

Custom packaging delivers a high quality message to your customers. Flambeau offers you hundreds of stock cases and boxes to choose from that can easily be customized. In-house design and tooling capabilities also support complete customization.

Working on projects will be easier utilizing Flambeau's Utility Workstation<sup>™</sup>. Ideal for toolrooms, MRO areas, temporary storage and for servicing vehicles. This mobile system includes a sliding lid, which can be used as a work surface or removed and conveniently stored on the side of the Workstation. The lid can also be locked to secure items in the top tray. Two large compartmented cases fit in the top tray for organized parts storage. Additional flexibility comes from attachable bins and bulk storage bottom tray, purchased separately. Capacity 300 lbs.

### Ordering Information

Stock Number	Description	Dimensions	Pk. per carton	Weight
8510ST	Utility Workstation <sup>™</sup>	29 x 22 x 40	1	38 lbs.

Minimum order is standard pack quantities.

# Protective Cases

Flambeau's line of blow molded cases provide you with value, image, protection and presentation options. Double wall construction allows exact product fit and protection. Custom-molded interiors can match your product exactly. For the optimum in flexibility, the new Infinity™ Series offers the ultimate performance and value with its sleek, contemporary design.

# BLOW MOLDED PROTECTIVE CASES

## Infinity™ Cases

### The next generation of blow molded cases

Designed to succeed the famous Airmold® P-Series tradition. The contemporary design of the new INFINITY™ Case not only looks professional, it also has the performance to match! Built-in features include:

- Cam-over ABS latches (metal latches optional).
- Textured finish to reduce dents and scratches.
- Stock foam and custom options.
- Lid dust seal.
- Interlock joints to add strength.
- Applications Include: Power Tool Storage, Hand Tool Storage, Instrumentation Equipment, Audio/Visual Equipment, Medical Products.

# Spectra Molding™

PROCESS

## SPECTRAMOLDING™ by Flambeau®

Flambeau revolutionizes plastic case decorating with the new SPECTRAMOLDING™ process. This proprietary process, only available from Flambeau, offers colorful graphic images and text to be permanently molded into the case. The result is a spectacular merchandising advantage no other molder can provide.

- High Resolution Graphics for eye-catching packaging.
- Conforms to a variety of textures and surfaces.
- Can be UV protected.
- Eliminates the need for adhesive labels and/or chipboard sleeves.
- Permanent labeling replaces heat transfers and hot stamps.
- Great for photographs and UPC codes.
- Available on blow molded cases and injection mold boxes.

• High resolution graphics for eye-catching packaging

• Conforms to a variety of textures and surfaces

• Can be UV protected

• Eliminates the need for adhesive labels and/or chipboard sleeves

• Permanent labeling replaces heat transfers and hot stamps

• Great for photographs & UPC codes

# Compartmented Boxes

Flambeau has the largest selection of stock compartmented boxes available anywhere. With different stock materials for different uses and environments. We can customize to meet your needs through color and material selection, compartment size and arrangement. In addition, Flambeau can logo imprint, hot-stamp and pad-print. Other resins are available for custom requirements.

## Infinite Divider System™

- The ultimate organizer for compartment storage.
- Ultimate flexibility – you determine divider locations.
- Patented design.
- Ideal for organizing odd length/size items.

## Diamondback™ Styrene Boxes

- Sleek design for improved merchandising.
- Crystal Clear Styrene material – as clear as glass.
- Improved hinge strength and easy open lid.
- Stacking feet for neater displays.
- Applications include:
  - food products
  - electronic parts
  - medical & lab supplies
  - hobby parts
  - office supplies
  - precision parts
  - screws & washers
  - small tools

## Precision Box

- Engineered storage box for small speciality items.
- Molded from sturdy acrylic material; features rust proof hinge pins.
- Resists most common chemicals.
- Available in colors; can be hot stamped.

## Mighty-Tuff™ Boxes

- Made with transparent cellulose propionate.
- Extremely tough and sturdy.
- Incorporates metal hinge.
- Excellent for industrial and institutional environments.

## Polypropylene Boxes

- Extremely durable; molded with heat-sealed hinges.
- Resists solvents such as gasoline, oil and most common chemicals.
- Ideal for organizing and carrying small items.
- Translucent, opaque yellow, or black colors available.

## Textured Integral Hinge Boxes

- Very sturdy, full-length living hinge.
- Snap-lock closure.
- Excellent for autoclave processes.
- Smooth label or imprint area for labeling.

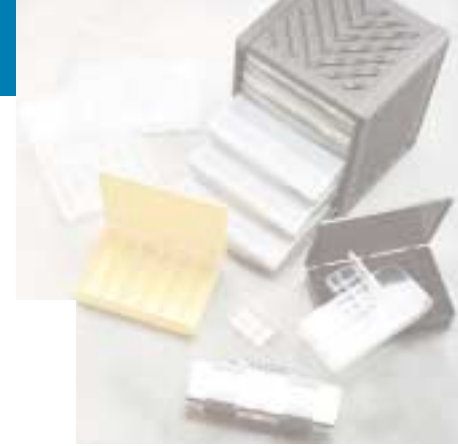

## K-Resin® Boxes

- K-Resin® is a sturdy, transparent material.
- Excellent for heavy-duty applications.
- Good impact resistance.
- Individually packed in chipboard sleeves.

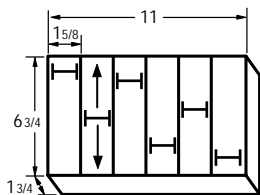

## Infinite Divider System™

The Ultimate Storage Container! Flambeau offers a complete system, Boxes and Cabinet, with "infinite" flexibility! Organize your space the way you need it. You place the dividers where needed. Dividers can be adjusted 1/8" at a time.

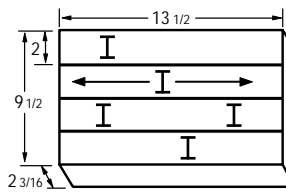

- Great for small parts of various sizes.
- Eliminates wasted space caused by fixed dividers.
- Made from durable chemical and solvent resistant polypropylene.
- Patented Design.
- Cabinet can be found on page 26.

8500NT	IDS™ Cabinet with 5 trays-No Boxes	14.5 x 15.5 x 15.8	1

## T901

The new open core T901 is a single compartment box designed to fit the IDS Cabinet. Manufactured from translucent polypropylene the new T901 is ideal for creating custom kits using vacuum formed trays or custom foam sets. Custom colors and hot stamping are also available.

### Ordering Information T901

Stock No.	Description	Dimensions	Pk. Per Carton
6727ID	T901	13-1/2 x 9-1/2 x 2-3/16	6

## Tuff-Tainers

Tuff-Tainers from Flambeau extend the compartmented box concept to include eight additional box sizes for organizing and protecting parts and components. Tuff-Tainers are made to resist most common chemicals and include snap latches, a detachable lid, and the ability to configure your own compartments. These boxes are ideal for hot stamping with your logo.

(Note: Tuff-Tainers do not fit the IDS™ Cabinet.)

## How to Locate the Box You Need

Pages 29 through 41 display the majority of compartmented boxes available from Flambeau. In fact, most of the boxes in the following tables are available from stock. Check with Customer Service (1-800-344-5716) before placing your order.

To find the box you need:

1. Determine the number of compartments required for your needs. (Boxes on pages 29-41 are listed by number of compartments.) Turn to the appropriate page.
2. Select the material best suited for your application.
3. Go to the Model Number Table beginning on page 29. Flambeau's model numbers identifying the box and resin composition generally available from inventory are listed.
4. Choose the desired model number for your needs. Call 1-800-344-5716 to place your order or to get assistance with a custom requirement.

# Mobile Storage Systems

Flambeau's Mobile Storage Systems lets you take your work with you. Whether you need to organize a few tools, a few parts, or an entire tool box, going across the shop or across the plant from the Utility Work Station™ to the Carry Packs, our Mobile Storage Systems makes your job easier.

4

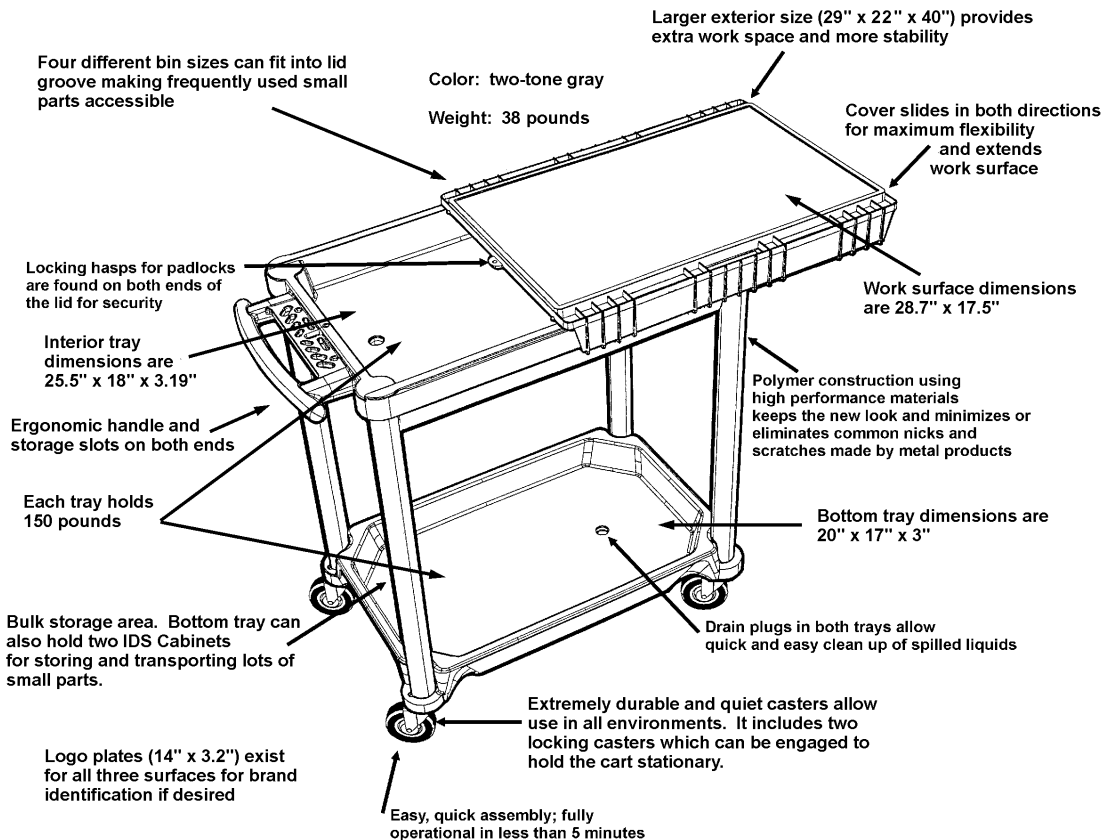

# Utility Workstation™

Working on projects will be easier utilizing Flambeau's Utility Workstation™. Ideal for toolrooms, MRO areas, temporary storage and for servicing vehicles. This mobile system includes a sliding lid, which can be used as a work surface or removed and conveniently stored on the side of the Workstation. The lid can also be locked to secure items in the top tray. Two large compartmented cases fit in the top tray for organized parts storage. Additional flexibility comes from attachable bins and bulk storage bottom tray.

# Carry Packs

Carry Packs take system storage one step further with their many versatile uses. Available in three different sizes, the 20220-2 and 21210-2 Carry Packs can hold up to four compartmented boxes, while the 21600-2 can hold two. Available in Styrene, K-Resin, or Polypropylene, each compartmented box slides in and out of the rack for quick and easy access. Carry Packs snap into a folded position for easy transportation or can be left open for convenient wall storage. Carry Packs frames can be ordered separately.

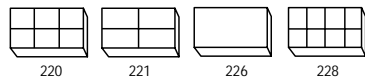

SERIES Carry Packs	Overall W x D x H	Color	Standard Package	Package Wt. lbs.
20220-2	9-3/4 x 8-3/4 x 1-1/2	Grey	6	4.6

## Drawer Cabinets and Chests

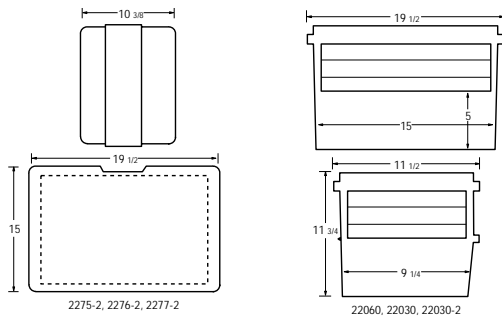

These large professional units are designed to organize, store and protect precision tools, hardware and small parts. Common features include interchangeable drawers with adjustable compartment sizes, padlock tab, two positive action latches, brass hinge and brass latch pins. All components are molded in high-impact resins, resistant to most chemicals, common solvents and oils. Model 22030-2 is molded in an industrial grade ABS plastic.

The Drawer Cabinet features a self-storing door panel providing all-weather protection for all the drawer configurations. Each Tool Chest has a unique front panel design that allows drawer access when the front panel is down. A unique lock prevents accidental spills and allows the lid and drawers to lift as a unit, providing access to the large lower storage area.

# Stationary Storage Systems

Create your own custom storage systems. Our Satchel-Style Cases are handsomely molded from rugged copolymer resins to meet a variety of storage carrying needs. Flambeau's Bin Rototower provides a large amount of storage capacity in a small narrow space. Our Frame Storage Cabinets are designed to meet small storage needs.

## Compartmented Cases

### Satchel-Style Cases

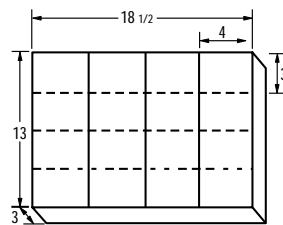

Handsome satchel-style cases molded from rugged copolymer resins to meet a variety of storage carrying needs. Flambeau quality features include: comfortable handle, double positive latches, pinned hinges and translucent cover. Copolymer resin provides a rustproof, odor and oil resistant case for almost unlimited use. Each of these cases may be individualized through custom coloring and hot stamping. Customization is available. Ask us for our quotation.

### Standards include

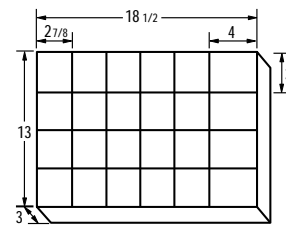

- Translucent lids allow for quick identification of contents.
- Rounded corners, no sharp edges and lightweight covers that won't slam on fingers make these cases "user friendly."
- Molded from copolymer resins that resist common solvents and odors, will not rust or dent.
- Brass hinge pins for optimum strength and durability.
- Identification card holder for quick case selection.
- Comfortable, strong luggage-style handle.
- Positive latches keep lids secure.
- Minimum order sizes apply.

### Custom Options

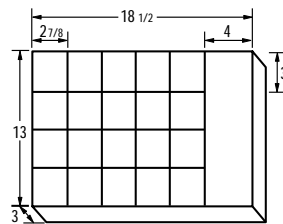

- Lids can be imprinted with your logo or message.
- Color of your choice - minimum quantities apply.

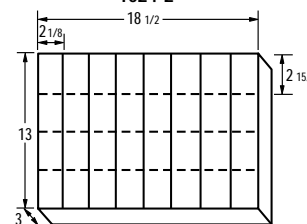

1016-2 Includes 12 dividers

1024-2

1021-2

1032-2 Includes 24 dividers

## Bin Storage Systems

Create your own storage systems using Flambeau Storage Bins. They may be stacked, mounted on a steel rail, desk stand, or incorporated into the Bin Rototower™. All bins are available in red, yellow or blue. Flambeau bins are molded of heavy-duty polypropylene material that is durable, rustproof and resists oil and common chemicals. The Bin Rototower™ provides a large amount of storage in a small amount of floor space as does the 350BT that gives you the ability to select your own assortment. The Rototower™ holds a total of 144 of the #60 bin; 96 of the #120 bin; 72 of the #240 bin; 64 of the #480 bin - or the bin combination of your choice. Weight capacity: Approximately 992 pounds.

## Plastic Frame Storage Cabinets

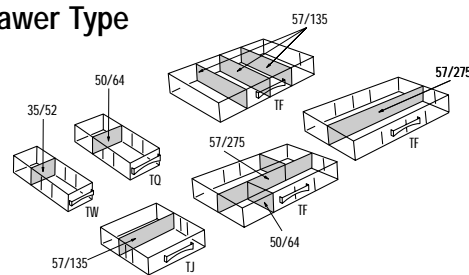

### Parts Station™ Storage Cabinets

High density storage can be achieved with these all-plastic cabinets. Maximize any work area by organizing and storing tools, hardware or parts. Flambeau Parts Stations™ are designed with a sturdy shell and drawer rail structure for extra strength. These rugged cabinets can be stacked or wall mounted for greater storage flexibility. Flambeau molds all drawers in clear styrene resin for optimum visibility and speedy retrieval of contents. Each cabinet features drawer stops to prevent accidental spills.

# Medical Products

Flambeau has an extensive line of medical packaging for emergency, clinical and custom OEM applications. Our EMS boxes, medical chests and instrument boxes come in a wide variety of styles, sizes and configurations to suit your needs. Whether it is Blow Molded or injection molded, the medical provider can select from standard items, custom products or modified standard items to meet application requirements.

## The Ultimate Drug Kit Paramedic Box or First Aid Box!

**NEW**

The NEW PM8040 is our most complete medical storage case yet! This case gives you the flexibility of bulk storage and compartmentalization to suit your needs.

### Features

- Manufactured from rustproof, dentproof and chemical resistant co-polymer resins.
- Includes (4) T6004 Tuff Tainers and (2) T2003 Tuff Tainers.
- Bulk storage compartment measures 18" across x 11" wide x 4" deep, includes slots to hold up to six (6) additional T2003 Tuff Tainers.
- Brass pin hinges and Cam-over latch design.
- Heavy duty handle.
- Exterior rack for additional storage.
- Quick access 5 compartment tray molded into the lid.

Model Number	L x W x D	Pack Per Ctn.
PM8040	20-1/2 x 12 x 14-1/2	2

## Drug Kits, Paramedic Boxes

Model PM2272 and PM2273

- 2- or 3-drawer styles.
- Drawers are removable and interchangeable.
- Non-slip rubber feet.
- Deep, easily accessible storage bin.
- Can be padlocked or sealed.

Model PM2072

- The standard in emergency care cases.
- Two tip-proof trays—2 inches deep.
- 11 compartments.
- Can be padlocked or sealed.

Model Number	L x W x D	Standard Drawers	Number of Compts.	Pack Per Ctn.
PM2072	19 x 10-3/4 x 10-1/8	N/A	11	1
PM2272	19-1/2 x 11-1/2 x 11-3/4	1-B, 1-C	8-14	1
PM2273	19-1/2 x 11-1/2 x 11-3/4	3-B	21-39	1

## First Aid Boxes

- 3 popular styles.
- PM1702 features removable tray - great for bulk supplies.
- PM1772 features 8 large compartments - ideal for bandages and larger items.
- PM1872 features 2 tip-proof trays, 9 compartments.

Model Number	L x W x D	Number of Compts.	Pack Per Ctn.
PM1702	16-1/2 x 8-3/4, x 7-1/2	2	4
PM1772	16-1/2 x 8-3/4, x 7-1/2	8	4
PM1872	17-5/8 x 10-1/4, x 8-3/4	9	4

## Drawer Cabinets

- 3 standard models - 4 to 6 drawers.
- Drawers are removable and interchangeable.
- Non-slip rubber feet.
- Can be padlocked or sealed.
- PM2275 is orange/white.

Model Number	L x W x D	Standard Drawers	Number of Compts.	Pack Per Ctn.
PM2274	19-1/2 x 10-3/8 x 15	1-A, 1-C, 1-D, 1-E	27	1

### Complete Custom Capabilities

Custom cases add convenience to your medical organization. For original equipment manufacturers, custom cases convey a high quality, high-value message to your customers. Flambeau Packaging Solutions offers the finest in custom/OEM Blow Molded and injection molded plastic products for packaging, handling and storage applications.

### Stock Boxes & Cases

Choose from our established line of medical storage solutions or customize to fit your organizational needs.

### Blow Molded Cases

Provide impact protection, long-life durability and exact part placement. Flambeau has over 200 stock Blow Molded cases to fit your storage needs. If one of our stock cases is not a practical solution, we offer semi- and full-custom cases to fit your specifications.

Flambeau features full in-house computer-aided design and tooling. If you need more information or a custom quotation, please contact our Customer Services Department at (800) 344-5716. Minimum order requirements and tooling charges may apply. Dimensions are nominal.

# Conductive Products

Flambeau's line of conductive cases, cabinets, storage boxes and bins are the industry standard for the protection and safe handling of static sensitive components. Flambeau offers a wide variety of sizes and styles that are easily configured to meet your needs. Our Conductive Storage products are manufactured to a  $10^5\Omega/\text{in}^2$  or better volume resistance specification.

## Injection Molded Boxes...

Conductive boxes are available in single-compartment and multi-compartment styles. These carbon filled hi-impact plastic boxes are ideal for storage and transportation of static-sensitive parts.

Flambeau's conductive cabinets are built in accordance with the guidelines of DOD-HDT3K-263 to bleed off any static charge at a safe controlled rate when properly connected to a ground. Each cabinet comes with a static-safe ground wire which protects users against electrical shock. If the cabinet is on a table which is electrically conductive or grounded, the cabinet ground wire may be left off. Two series of cabinets are available: Plastic frame and metal frame.

Meets:

- ASTM Standard D257 for Volume and Surface Resistivity.
- MIL B81705 for Static Decay.

## Blow Molded Cases...

Especially designed for handling ESD sensitive components. Electronic components, unterminated printed circuit boards and entire assembled systems are all sensitive to electrostatic discharges (ESD). These discharges can result in immediate or latent damage to today's highly complex micro circuits. Proper handling, shipping and storage procedures for sensitive electronic components must be used to guard against expensive damage.

- Faraday Cage Protection.
- Double Wall Product Protection.
- Optional Foam Lining Protects from Static Discharge.
- Reusable.
- Proven Static Control.
- Conductive:  $< 10^9$  ohms per square inch.
- Anti-static:  $10^9$  to  $10^{13}$  ohms per square inch.

### OPTIONS

- Grounding Snap.
- Clear Conductive Window.

# Packaging Solutions

Flambeau will customize our proprietary line of stock boxes and cases with your name or logo. We can create a full custom solution too. Our in-house design and mold manufacturing team can go from "art to part" providing you the best packaging solution.

#### CUSTOMIZATION:

- Increases Sales
- Creates Brand Awareness
- Improves Point of Purchase Presentation
- Provides Value Added Product Protection

#### OPTIONS INCLUDE:

- Spectra Molding - see page 16 for details
- Custom Interior: Provides Exact Part Placement
- Hot Stamping
- Color Matched Resins
- Foam Inserts

Call us at 1-800-344-5716 to understand all the capabilities we can provide for you.

## Injected Molded Box Design

**There are many ways an injection molded box or case can be modified to fill the specific presentation need for your market. This section addresses specific details concerning common ways of customizing a package to become a more effective marketing tool.**

### Labels

Labels can often be used to add color and attractiveness to a package. The following helpful hints should make your labeling more efficient.

- Apply labels at ambient temperature. Plastics expand and contract with temperature changes at different rates. This will minimize label deformations caused by temperature changes.
- Make sure your label printer knows the plastic the label will be applied to so they will use the correct adhesive.
- As the label becomes larger, the paper needs to become stiffer for ease of application.
- Labels for areas that are not recessed should be 0.001" shorter (per side) than the identified area for best appearance.
- Labels for recessed areas should be 0.003" shorter (per side) than the recess area for ease of application.

### Hot Stamping

Hot stamping is the most common and economical way of getting your custom identification onto any injection molded product. A hot stamp generally consists of one color.

- A hot stamp of a smooth surface will be fairly sharp and smooth. A hot stamp on a textured surface will not be smooth or as sharp.
- Hot stamping large solid surfaces should be avoided. These types of hot stamps are subject to additional yield loss due to issues with bubbles and coverage.
- Hot stamping of finely detailed surfaces is extremely difficult. If you require a lot of fine detail you should consider pad printing.
- Multiple colors are possible with hot stamping and they have special requirements. Contact Customer Services for details and a specialized quotation.
- Hot stamping is not available on Blow Molded protective cases.

### **Pad Printing**

Pad printing is an excellent way of producing very sharp images on smooth surfaces. Not available on Blow Molded protective cases.

### **Custom Cores for Injection Molded Products**

Custom cores can be made for every product Flambeau manufactures. Custom cores are manufactured differently for different products. Exact details are required for a specialized quotation. This can be an excellent long term low cost solution for high volume products when compared to foam filled or thermoformed inserts.

### **Custom Interiors for Blow Molded Cases**

The individual piece part fit with these cases comes from making a custom interior. Depending on your parts, and how they need to be laid out in the case, you may require only a custom interior base. As your requirements increase, there may also be a custom interior lid, custom doors or trays, or a variety of other operations. Flambeau's design engineers will help you determine the most efficient case to meet your objectives

### **Custom Colors**

Flambeau offers 12 standard colors to help minimize the cost component. Flambeau also manufactures products from hundreds of custom colors. A custom color will be very close to the color you specified. To the human eye, the same color can appear to be different for all the following reasons.

- The same pigment can result in different colors on different resins.
- A smooth surface and any slightly textured surface will look different.
- The same item can appear as a different shade under different light (sunlight, incandescent light, and fluorescent light).
- An exact color match is exceedingly difficult and expensive.

**Latches** - see page 20

**Handles** - see page 20

### **Shipping Containers and Instructions**

## Blow Molded Case Design

FIXED

REMOVABLE

### How Do I...

#### 1. Select Lid and Base Depths?

The base should be equal to or greater than the depth of the lid. Try not to use a base depth more than three times the lid depth as that will substantially increase your cost.

#### 2. Select a Fixed or a Removable Pin Hinge?

You would want a removable hinge if you have one or more of the following.

- The base will be used as a tray, possibly in a drawer.
- The actual item needs visibility in retail display.
- The lid and base are both employed as trays in actual use.
- The use of the product is easier if the lid is removed. Otherwise, select a fixed pin hinge.

### The Ten Best Rules of Designing Blow Molded Cases

1. Lay out parts so that no part is too close to another part.
  - For PK and smaller use 0.375"
  - For PV use 0.500" between cavities
  - For PW and larger use 1.00" between cavities
2. Make sure no part touches another part.
3. Specify preferred placement of the parts – this may include ease of use for your customer.
4. Make sure the center of gravity is located near the center of hinge side. Very heavy parts should be near the center of the hinge side with lighter parts toward the outside.
5. If parts have a large difference in height choose one of the following:
  - Put small parts to the edges and deep parts toward the center.
  - Put small parts on one side and large parts on the other side.
6. By planning ahead, it is often possible to combine several models or sets into a single Blow Molded case. Let Flambeau help you do this.
7. If there are a lot of very small parts (e.g. <0.25" sockets) and one or more larger parts, a general storage area may be best for the small parts.
8. Sometimes a deeper case is more cost effective than one of greater length and width. Simply rotate the parts and try again. Make sure the depth is not more than one half the length of the part. Also consider holding parts in the lid with a door or detents.
9. Blow molding does not demand the tolerance of injection molding. Nominal tolerances are 0.0625 per foot for a length of over 6 inches and 0.030 for under 6 inches.
10. Call Flambeau at 1-800-344-5716.

## Flambeau Packaging Solutions Provides You With:

- Over 50 Years Experience.
- Largest Selection of Stock Cases.
- Extensive Design and Complete In-house Product Development.
- Hot Stamping, Pad Printing, Heat Transfer and Other Decorating Capabilities.
- In-house Tool Shops.
- Custom Injection and Blow Molding.
- Express Service Shipment within 24 Hours.
- Multiple Manufacturing Facilities.
- National Sales Coverage.
- Understanding Of, and Presence In, Industrial and Retail Markets.

## Flambeau's Product Offerings Include:

- Full Custom Capabilities.
- Blow Molded Protective Cases.
- Injection Molded Compartmented Boxes and Cases.
- Mobile Storage Systems.
- Stationary Storage Systems.
- Express Service Cases.
- Special Storage Products.
- Conductive Storage Products.
- Medical Cases.
- Tool Boxes and Utility Boxes.
