MicroScanner² Cable Verifier
Raising cable verification to a higher power

For more than a decade, cabling installation and maintenance technicians have relied on MicroScanner to verify terminations and troubleshoot continuity faults. A lot has changed in the cabling world since the original MicroScanner was introduced. Industry economics require that installations be done fast and accurately with no callbacks. And converging voice, data, and video technologies have given rise to new requirements for service testing and multimedia support.

MicroScanner² recognizes these trends and presents a much-needed revolution to the way testing is done. It streamlines every aspect of the verification job. From its time-saving user interface and integrated multimedia support to its expanded service detection capabilities, MicroScanner² gives technicians the power to perform their jobs faster and more accurately than ever.

High power vision to verify voice/data/video cabling and services. That’s Network SuperVision.™ That’s Fluke Networks’ promise to you.

Reduce test time and user error
Yesterday’s cable verification testers force users to toggle between different modes (up to four) to view all test results. This not only slows the test process, but also causes user frustration and error. MicroScanner² has defied this convention by displaying key test results – wiremap, pair lengths, distance to fault, cable ID, and far-end devices – all on one screen.

Eliminate awkward test adapters
Tired of losing or breaking all the adapters needed for testing the various voice, data, and video media types? MicroScanner² makes these adapters things of the past with built-in RJ11, RJ45, and coax support. Both the main unit and the far-end identifiers can be used to test telephone jacks, Ethernet jacks, and CATV outlets right out of the box.

Rule out service problems fast
Today’s communications technicians have more problems to deal with than just the cabling. They have to rule out a whole host of cable and service issues before determining the cause of a connectivity problem. Is there telephone voltage? What’s the polarity? Is there a switch at the far end? Is PoE available? MicroScanner² gives technicians high power vision to verify today’s most common voice, data, and video services.

Locate elusive cables in seconds
MicroScanner² features built-in IntelliTone digital and analog toning to precisely locate virtually any cable or wire pair, regardless of work environment. Use digital mode to locate high-grade data cabling (Cat 5e/6/6a) in bundles, or at switches, patch panels, or wall outlets. Or, use analog mode on voice-grade cabling (Cat 3 and below), as well as coax, security/alarm, and speaker wiring.

Repair or replace tools less often
With all the abuse you put your tools through, you can’t afford for them to be delicate. MicroScanner² features a rubber wrap-around holster that makes it the right tool for even the toughest jobs. Toss it into your toolbox. Drop it from a ladder. It can handle it. Plus, it now comes standard with a vinyl carry pouch for enhanced protection and convenience.
MicroScanner² Cable Verifier

Coax connector for video and audio testing
Rubber holster enhances durability and grip
Digital toning is safe and effective on active networks
Length meter shows distance to termination, open, or short
PoE detection rules out insufficient power as source of problems
Detail mode gives additional test status information

Test Connectors
Twisted-pair: UTP, FTP, SSTP 8-pin modular jack accepts RJ45 and RJ11
Coax: F-connector for 75 Ω, 50 Ω, 93 Ω cables

Cable Tests
Length (460 m or 1500 ft), wiremap to TIA-568A/B standards, remote ID locators
Tone Generator
IntelliTone digital tone: [500 KHz]; analog tones: [400Hz, 1KHz]
PoE Detection
Solicits and detects the presence of 802.3af compatible PoE devices
Ethernet Port Test
Advertised speed of 802.3 Ethernet ports (10/100/1000)

Power Source
Battery type: 2 AA alkaline batteries

Dimensions
3 in x 6.4 in x 1.4 in (7.6 cm x 16.3 cm x 3.6 cm)

Weight
13 ounces; 363 grams (batteries included)

Warranty
One year

M12/ RJ45 Cable Specifications:
Cable type
Ethernet cable, Cat5e, shielded, 2 Pair AWG 26 stranded (7 wire), RAL 5021 (water blue), M12 4 pos. D-coded on RJ45 connector

Number of positions
4
Fixed cable length
2 m
Volume resistance
≤ 5 mΩ
Insulation resistance
≥ 100 MΩ
Ambient temperature
-20 °C to 50 °C
Inflammability class acc to UL 94
V0
Surge voltage category
II
Pollution degree
3
Degree of protection
IP20/IP67
External cable diameter
6.7 mm
Transmission characteristics
Cat 5 (IEC 11801:2002), Cat 5e (TIA 568B:2001)
