

Apple Lightning Digital AV Adapter (MD826ZM/A)
Lightning Digital AV Adapter

Use the Lightning Digital AV Adapter to mirror whatever's on your iPad with Retina display, iPad mini, iPhone 5, and iPod touch (5th generation) with Lightning connector - apps, presentations, websites, slideshows, and more - on your HDMI-equipped TV, display, projector, or other compatible display in up to 720p HD. Video mirroring is supported on all compatible devices.

Watch video on the big screen in up to 1080p by connecting your device with Lightning connector to a television, projector, or other HDMI-compatible display. Video out supports up to 1080p for iPad mini, iPad with Retina display, iPhone 5, and iPod touch (5th generation).

The Lightning Digital AV Adapter connects to your iPad with Retina display, iPad mini, iPhone 5, or iPod touch (5th generation) via the Lightning connector and to your projector or display using the digital AV adapter.
