Ext Powered Breadboard, 2250 Tie-points, with metal backplate

Global Specialties Premium Proto-Board solderless breadboarding systems continue to be the industry standard for quality, durability and reliability. Global's high quality plastic sockets

with nickel-silver contacts are mounted to either anodized aluminum, or high-impact plastic back plates. Non-skid rubber feet and color-coded binding posts are included for the ultimate in utility and versatility. Global's premium Proto-Boards have tie point capacities ranging from 840 to 4560 tie points (PB-105 is the largest externally powered solderless breadboard available). Use Global's Proto-Boards to design test fixtures, perform lab experiments and in all areas of custom electronic design applications.

Additional Info

- [Product Features](#)
- [Specifications](#)
- Today's Standard For Quality In Breadboarding
- Ideal for proto-typing circuit applications to 57MHz & more!
- QT Sockets & bus strips mounted on rugged back panel
- Recommended for design, test fixture, quality control and education.
- "The only breadboard you'll ever have to buy!"
- Three year warranty
- Nickel silver alloy pins are pre-stressed, spring loaded and non-corrosive for long term reliability
- Molded in a rugged thermoplastic for durability and high temperature application
- Heavy mylar backing eliminates possibility of short circuits
- Patented design
- Innovators of high quality breadboards since 1973
