VmodWW - VHDC Wirewrap

Connector(s):	One Vmod™ (high-speed VHDC) connector

33x17 hole wire wrap area

VHDCI connector for connection to Digilent System boards

32 plated through-holes connected directly to signals from the system board

Two power and one ground bus around

Prototype connections on every signal

The Digilent Vmod Wire Wrap (VmodWW) offers a ready-made solution for prototyping wire wrapped circuits as accessories to Digilent system boards. The VmodWW provides connectors suitable for direct connection with various Digilent system boards.

The VmodWW has a 33x17 hole wire wrap area and 32 plated through-holes connected directly to signals from a Digilent System Board.
