

Mil-Spec Backshells and Connector Accessories

United States ■ United Kingdom ■ Germany ■ France ■ Nordic ■ Italy ■ Spain

An Important Notice for All Buyers of Military Standard Cylindrical Connector Backshells

SAE Aerospace has assumed control of the M85049 specification for cylindrical connector backshells and accessories.

All existing M85049 specification documents are now superseded by the new AS85049 standard. For convenience in ordering however, basic part numbering for these components will still utilize the familiar M85049 prefix. In other words, only the ID of the controlling specifica-

tion documentation will convert to SAE nomenclature; individual slash sheet part numbers will maintain their original M85049 order numbers.

In addition to the above change, several new specification slash sheets have been added to the AS85049 family of cylindrical backshells for Mil-Spec connectors. Glenair will supply the following new products just as soon as the formal SAE qualification process is completed.

AS85049/103	Straight, Composite, Strain-Relief EMI/RFI Backshell
AS85049/104	45°, Composite, Strain-Relief EMI/RFI Backshell
AS85049/105	90°, Composite, Strain-Relief EMI/RFI Backshell
AS85049/109	Straight, EMI/RFI Shield Sock AS85049 Fig. 4
AS85049/111	90°, EMI/RFI Shield Sock AS85049 Fig. 4
AS85049/112	Straight, EMI/RFI Shield Sock AS85049 Fig. 2

Appendix A	Part Number Index	A-1

The following product type descriptions are provided as an aid in selecting the proper accessory for each functional requirement. Please use the part number index A to find the catalog page for a specific Mil-Spec accessory slash number.

Section 30 - Potting Boot Rings

Potting Boot Rings are designed for use with M85049/74 and /75 potting boots. The plastic potting boots snap in place to provide an easy and convenient receptacle for cable sealing potting material.

Section 31 - Shrink Boot Adapters

The adapters in this section are designed to accommodate lipped-type heat shrinkable boots, which are used for both mechanical strain relief and a degree of environmental protection.

Section 32 - Adapters/Extenders

Simple straight backshells which provide for thread adaptations or extensions behind the connector.

Section 36 - Non-Environmental Strain Relief Backshells

Straight backshells are combined with a variety of strain reliefs to provide cable to connector protection in situations where environmental sealing is not required.

Section 37 - Environmental Backshells

Glenair Environmental Backshells offer excellent immersion capability when used with impervious jacketed cables. A resilient grommet which fits into a counterbore in the backshell compresses and seals against the cable jacket when the strain relief is tightened.

Section 38 - EMI/RFI Non-Environmental Backshells

A choice of 360° shield/screen terminations are offered in straight and angled backshells, and include designs to accommodate combinations of individual or overall shields or screens. All designs included in this section provide low dc resistance across the termination area.

Section 39 - EMI/RFI Environmental Backshells

The backshells described in this section have EMI/RFI shield/screen terminations with cable sealing or environmental resisting features. Straight and angled designs are available.

Section 40 - TAG[®] Rings and TAG[®] Ring Backshells

Glenair's TAG[®] Ring backshells offer a unique and reliable method of terminating individually shielded wires where the shields are to be grounded through the backshell and connector shell. No special tools are required for assembly and full maintainability is provided.

Section 44 - Crimp Ring and Banding Backshells

Banding and crimp ring backshells provide an economical approach to terminating overall cable and harness shields/screens. These backshells utilize standard bands or crimp rings for full 360° shield/screen termination with the lowest dc resistance available.

Section 45 - Qwik-Ty® Strain Reliefs

Glenair's Qwik-Ty® strain reliefs offer a unique method of providing strain relief to open wire bundles used with circular connectors. The Qwik-Ty® provides a low profile, reduced weight and simple installation. Installation is quick and secure, using either plastic tie straps or lacing tape.

Section 50 - Rectangular Backshells

Glenair's selection of rectangular backshells provide strain relief and environmental protection for rack and panel style connectors.

Section 60 - Tools

Mil-Spec Connector wrenches, plug and receptacle holders and accessories are required for expert assembly of interconnect systems. Glenair manufactures a wide range of connector wrenches and other assembly tools. Contact Glenair or your local sales representative for a copy of the *Glenair Backshell Assembly Tools, Banding Tools and Accessories* catalog.

Section 61 - "E" Nuts

This section describes the various backshells without strain relief for use with circular connectors. (These are most commonly referred to as "E" Nuts.)

Section 62 - Strain Reliefs

Glenair offers a comprehensive selection of strain reliefs for circular connectors. Straight and angular versions are offered for most connector series.

Section 65 - Dummy Stowage Receptacles

A choice of dummy stowage receptacles is offered for most circular bayonet coupled and threaded coupled connectors.

Section 66 - Protective Covers

A wide selection of protective covers are offered for almost all bayonet or threaded coupled circular connectors. Glenair's proprietary versions (as shown in Glenair's *Circular Connector Accessories* catalog) offer a broad choice of attachments not provided on the Military Standard versions. EMI/RFI protective covers are offered for most bayonet coupled receptacle connectors.

Section 68 - Miscellaneous Accessories

Can't find it anywhere else? Try this selection of miscellaneous connector accessories. Included in this section are Jam Nuts, Potting Boots, Gaskets, Bushings, and Fiber Optic Terminus.

Section 71 - Conduit and Conduit Accessories

Glenair's M24758 Series conduit and associated fittings have been tested and qualified in accordance with MIL-C-4758 (SH). Glenair's M24758 products are designed to shield cables from electromagnetic radiation, electromagnetic pulse, and to provide weatherproofing. Glenair's M24758 Series products offer the highest level of performance and quality while providing a field-installable and cost-effective conduit system.

Standard Materials and Notes

The following standard materials are used for the majority of Glenair backshells and connector accessories. However, backshell components are not limited to those items

listed, but are representative of the elements used in Glenair's general accessory products. Contact Glenair for applicable specifications on items not listed below.

STANDARD MATERIALS - BACKSHELLS AND ACCESSORIES		
COMPONENT	MATERIAL	SPECIFICATION
Machined components: such as backshell bodies, fabricated elbows, protective covers, rotatable couplers, dummy stowage receptacles, lock nuts, G-spring support rings, EMI ground rings, grommet followers, etc.	Aluminum	AMS-QQ-A-200, 225, ASTM B211, 221, 209
Die cast components: such as angular backshells, strain relief backshells, strain relief bodies, strain relief saddles, special EMI ground rings, etc.	Aluminum	QQ-A-591 ASTM B, 85, 26
Backshells or strain reliefs: available in optional corrosion resisting steel; and hardware: such as screws, washers, rivets, wire rope, sash chain, band straps, etc.	Corrosion Resisting Steel	ASTMA582 (300 Series) AMS-QQ-S-763
Elastomeric seals: such as O-rings, cable jacket seals, grommets, etc.	Silicone	ZZ-R-765, MIL-R-25988
Anti-friction and thrust washers	Teflon	TFE
Anti-rotation devices	Corrosion Resistant Material	N/A

Note: Every effort has been made to present accurate information in this catalog. Editorial errors which are brought to our attention will be corrected in future editions. All dimensions presented in this catalog should be confirmed by the factory prior to inclusion within designs or specifications. We are constantly incorporating product improvements, and therefore Glenair reserves the right to make changes without notice.

Any liability or warranty as to quality, performance or fitness for use of Glenair products is always based on the condition that they apply to only new unused products that are properly stored, handled, installed, used, maintained and inspected by the user in a manner appropriate for the intended use of the product.

Tolerances

On all length callouts, tolerance is $\pm .060$ unless otherwise specified.

Unless otherwise specified, the following other dimensional tolerances will apply:

- .xx = $\pm .03$ (0.8)
- .xxx = $\pm .015$ (0.4)
- Lengths = $\pm .060$ (1.52)
- Angles = $\pm 5^\circ$

Potting Boot Rings are designed for use with M85049/74 and /75 potting boots. The plastic potting boots snap in place to provide an easy and convenient receptacle for cable sealing potting material.

Glenair Series 80 “Mighty Mouse” Connectors

The Mouse That Roared

One of the most common design requirements for interconnect technology used in high-reliability applications is size and weight reduction. When electronic systems expand in number and complexity in military air, sea and ground applications, the available space for interconnect cabling is reduced. And when the latest generation of land vehicle, fighter jet or Navy ship needs to accommodate more systems and controls than ever before—

and still weigh less than it did last time—then reducing connector package size and weight becomes a critical concern.

The Glenair Series 80 “Mighty Mouse” Connector was built precisely for such situations. At less than 1/2 the size and weight of high-density connectors such as the D38999—with comparable environmental and mechanical performance—the Series 80 Connector is truly “The Mouse That Roared.”

The Shrink Boot Adapters included in this section all are designed to accommodate lipped-type shrink boots such as those defined on MS3109 and MS3117 (not supplied by Glenair). Shrink boots are used both for mechanical strain relief and a degree of environmental protection.

Need something unusual in a multi-contact connector?

Then consider Glenair's expertise in high reliability connector design and development.

Glenair's line of innovative, specialty connectors has grown, year after year, to become one of the most diverse in the industry. Our application engineers have worked directly with commercial, industrial and military customers worldwide to design and build such products as quick disconnects for missile launchers, high tempera-

ture connectors for jet engines, shorting plugs to prevent accidental weapon firing, explosion-proof bulkhead feed-throughs for marine and off-shore platform use, and hermetically-sealed MIL-DTL-38999 connectors for military applications. So, for extraordinary applications, consider an extraordinary partner: Glenair.

Commercial and Mil Spec connector accessories

Corrosion resistance and weight reduction high on your list?

Upgrade to Glenair's composite thermoplastic backshells and accessories.

For most applications, backshells and accessories made from aluminum, stainless and carbon steel are recommended. But for applications where additional weight savings and corrosion resistance are required, many customers are now specifying composite thermoplastic materials.

Glenair is the recognized leader in composite thermoplastic research and development for the interconnect accessory industry. In fact, no one else has tooled even a small fraction of the composite products available today from Glenair—in stock and ready for same-day shipment.

Non-Environmental Strain Relief Backshells

Non-Environmental Backshells

Straight backshells are combined with a variety of strain reliefs to provide cable to connector protection in situations where environmental sealing is not required.

Assembly Instructions

The following suggested procedure serves as a guide for proper assembly and installation of Glenair Non-Environmental Backshells. It is recommended that trial samples of appropriate cables or wire bundles be used to determine proper trim dimensions of the individual conductors and cable jackets, if applicable.

- Temporarily assemble backshell (1) to connector.
- If cable is jacketed, insert cable into backshell (1) and bottom against connector. Hold cable in position and mark cable jacket at rear end of backshell.
- Remove backshell from connector and place on cable with strain relief (2).
- Trim cable jacket at a point 1/2 inch toward connector from mark made in step (b) above.
- Prepare and terminate cable conductors in accordance with established practices.
- Assemble backshell (1) to connector and tighten securely.
- Assemble strain relief (2) to backshell and tighten securely. Tighten strain relief saddles securely on cable or harness.

NOTE: As with any electrical connector assembly procedure, be sure to use the proper tools. For convenient, reliable assembly of the connectors and backshells, it is suggested that Glenair's connector holding tools, strap wrenches and connector pliers be used.

Still juggling an army of interconnect suppliers?

At Glenair we offer One-Stop-Shopping

Tired of managing dozens of specialty suppliers with only limited ability to keep pace with your evolving interconnect requirements? Glenair is committed to providing complete, system-level solutions to even your most challenging interconnect requirements. Our expertise extends well beyond discrete backshells and connec-

tors to encompass the entire range of interconnect components and assembled systems. From conduit systems to overmolded cable assemblies, Glenair is ready with a truly broad mix of interconnect products and assembly services. And best of all, many Glenair products are in stock, ready for immediate same-day shipment.

Commercial and Mil Spec connector accessories

Convolute tubing and metal-core conduit

Electrical and fiber optic cable assemblies

Composite thermoplastic components

Microminiature connectors and accessories

Backshell assembly and termination tools

Environmental Backshells

Environmental Backshells

Glenair Environmental Backshells offer excellent immersion capability when used with impervious jacketed cables. A resilient grommet which fits into a counterbore in the backshell compresses and seals against the cable jacket when the strain relief is tightened.

Assembly Instructions

The following suggested procedure serves as a guide for proper assembly and installation of straight Glenair Environmental Backshells for use with jacketed cables. It is recommended that trial samples of appropriate cables be used to determine proper trim dimensions of the cable jacket and individual conductors.

- Temporarily assemble backshell (1) to connector.
- Place grommet (2), follower (3), and strain relief (4) on cable in sequence shown. Keep these components at a convenient distance from the end of the cable so they will not interfere with subsequent assembly steps.
- Insert cable into backshell (1) and bottom against connector. Hold cable in position and mark cable jacket at rear end of backshell.
- Remove backshell from connector and place on cable with components in step (b) above.
- Trim cable jacket at mark in step (c) above. Depending on type of connector contact termination used (solder,

crimp, etc.) the length of individual conductors may require shortening by 3/4 inch to assure that the cable jacket will be in proper position when grommet (2) is clamped and compressed.

- Prepare and terminate cable conductors in accordance with established practices.
- Assemble backshell (1) to connector and tighten securely. Slide grommet (2) into backshell and position follower (3) against grommet.
- Attach strain relief (4) to backshell and tighten securely. If provided, tighten strain relief saddles securely on cable jacket.

NOTE: As with any electrical connector assembly procedure, be sure to use the proper tools. For convenient reliable assembly of the connector and backshell, it is suggested that Glenair's connector holding tools, strap wrenches and connector pliers be used.

1. For complete dimensions see applicable Military Specification.
2. Metric dimensions (mm) are indicated in parentheses.
3. Cable range is defined as the accommodations range for the wire bundle or cable. Dimensions shown are not intended for inspection criteria.
4. Approx. Chain Lengths:
 Dash No. 1-8 = 5.0 (127.0)
 Dash No. 9-40 = 6.0 (152.4).

STYLE 2

1. For complete dimensions see applicable Military Specification.
2. Metric dimensions (mm) are indicated in parentheses.
3. When maximum cable entry is exceeded, Style 2 will be supplied.
4. Cable range is defined as the accommodations range for the wire bundle or cable.
Dimensions shown are not intended for inspection criteria.

W = 1,000 Hour Cadmium Olive Drab
Over Electroless Nickel, Aluminum

Superseded Part Number

MS3188B 21 N

Basic Part No. _____
Dash No. _____
Finish (Material is Aluminum Only) _____
A = Cadmium Olive Drab over Nickel
C = Cadmium Olive Drab
N = Electroless Nickel

1. For complete dimensions see applicable Military Specification.
2. Metric dimensions (mm) are indicated in parentheses.
3. When maximum cable entry is exceeded, Style 2 will be supplied.
4. Cable range is defined as the accommodations range for the wire bundle or cable. Dimensions shown are not intended for inspection criteria.

If "on time" is a promise
you hope your vendors will keep...

...your best hope is to
place your orders with Glenair.

Most interconnect accessory suppliers quote several months or more to make a backshell. At Glenair, we not only quote the shortest lead times in our industry—generally 2-3 weeks—we also do the best job by far of getting the work out when we say we will. While it's true we can't

promise we'll always make our dates, we're confident we'll be way ahead of whoever's in second place when it comes to on-time delivery. And for those jobs which can't wait even 2-3 weeks, we offer over 35,000 part numbers in stock and ready for same-day shipment.

Commercial and Mil Spec connector accessories

Convolution tubing and metal-core conduit

Electrical and fiber optic cable assemblies

Composite thermoplastic components

Microminiature connectors and accessories

Backshell assembly and termination tools

STYLE 2

M85049/24-21 N

Basic Part No. _____
Dash No. _____
Finish and Material _____
B = Black Cadmium, Stainless Steel
N = Electroless Nickel, Aluminum
S = Passivated Stainless Steel
W = 1,000 Hour Cadmium Olive Drab
Over Electroless Nickel, Aluminum

Superceded Part Number

MS3188C 21 N

Basic Part No. _____
Dash No. _____
Finish (Material is Aluminum) _____
A = Cadmium Olive Drab over Nickel
C = Cadmium Olive Drab
N = Electroless Nickel

1. For complete dimensions see applicable Military Specification.
2. Metric dimensions (mm) are indicated in parentheses.
3. When maximum cable entry is exceeded, Style 2 will be supplied.

4. Cable range is defined as the accommodations range for the wire bundle or cable.
Dimensions shown are not intended for inspection criteria.

1. For complete dimensions see applicable Military Specification.
2. Metric dimensions (mm) are indicated in parentheses.
3. When maximum cable entry is exceeded, Style 2 will be supplied.
4. Cable range is defined as the accommodations range for the wire bundle or cable. Dimensions shown are not intended for inspection criteria.

Ten Reasons to Keep Glenair at the Top of Your List of Backshell Suppliers

1. We offer the lowest total cost of ownership in the interconnect industry: From our cost-saving "no minimum order" policy to our free product samples and application engineering, Glenair provides the best value in connector accessories available today.

2. Our full spectrum product lines make for one-stop-shopping: We have the most complete selection of rectangular backshells and accessories in the world, including every Mil-Spec slash number and more composite designs than the rest of the industry combined.

3. We have the largest capacity, broadest capability factory in the business and the knowledge and expertise to handle any production requirement no matter how large or complex.

4. We've provided complete convenience in ordering since 1956 (that's *your* convenience not ours): choose factory direct, your local Glenair office or your favorite distributor.

5. We care as much about quality as you do: We're BSENISO9001 registered in Europe and MIL-I-45208A and Boeing AQS D1-9000 Certified in North America.

6. We have over 30,000 accessory part numbers ready for immediate shipment including every Mil-C-85049 accessory and thousands of Glenair's most popular rectangular and circular backshell part numbers.

7. Our turnaround on quotes and custom orders is the fastest in the industry: We offer 24 hour turnaround on RFQ's and just 2 to 3 weeks delivery on custom orders, including Micro-Ds and other rectangular interconnects.

8. We have the largest and most experienced support staff in the business, including sales and engineering in every major aerospace market, on-site application engineering and dedicated product managers for every interconnect discipline.

9. We understand interconnect systems from the ground up: We're the only connector, backshell and accessory supplier to operate a full service harness facility. We even make our own line of assembly tools.

10. We're committed: Backshells and connector accessories are our life. We've served this market since 1956 and we're committed to meeting the evolving needs of our customers.

Glenair: A World of Interconnect Solutions

The backshells described in this section have EMI/RFI shield/screen terminations with cable sealing or environmental resisting features. Straight and angled designs are available.

Style Designator - A = EMI/Environmental

Material and Finish Designator
D = Corrosion Resistant Steel,
Cadmium Plate, Black
W = Aluminum, Cadmium Olive
Drab over Electroless Nickel

1. For complete dimensions see applicable Military Specification.
2. Metric dimensions (mm) are indicated in parentheses.
3. Cable range is defined as the accommodations range for the wire bundle or cable. Dimensions shown are not intended for inspection criteria.

STYLE 2

1. For complete dimensions see applicable Military Specification.
2. Metric dimensions (mm) are indicated in parentheses.
3. When maximum cable entry is exceeded, Style 2 will be supplied.
4. Cable range is defined as the accommodations range for the wire bundle or cable. Dimensions shown are not intended for inspection criteria.

M85049/6-21 W

Basic Part No. _____ Finish
Dash No. _____

B = Black Cadmium, Stainless Steel
N = Electroless Nickel, Aluminum
S = Passivated Stainless Steel
W = 1,000 Hour Cad. Olive Drab Over Electroless Nickel, Aluminum

MS3189A 21 C

Basic Part No. _____ Finish (Material is Aluminum Only)
Dash No. _____

A = Cadmium Olive Drab over Nickel
C = Cadmium Olive Drab
N = Electroless Nickel

STYLE 2

M85049/8-21 W

Basic Part No. _____
Dash No. _____
Finish _____
B = Black Cadmium, Stainless Steel
N = Electroless Nickel, Aluminum
S = Passivated Stainless Steel
W = 1,000 Hour Cad. Olive Drab Over
Electroless Nickel, Aluminum

Superseded Part Number

MS3188A 21 C

Basic Part No. _____
Dash No. _____
Finish (Material is Aluminum Only) _____
A = Cadmium Olive Drab over Nickel
C = Cadmium Olive Drab
N = Electroless Nickel

1. For complete dimensions see applicable Military Specification.
2. Metric dimensions (mm) are indicated in parentheses.
3. When maximum cable entry is exceeded, Style 2 will be supplied.
4. Cable range is defined as the accommodations range for the wire bundle or cable. Dimensions shown are not intended for inspection criteria.

* Denotes Style 2

1. For complete dimensions see applicable Military Specification.
2. Metric dimensions (mm) are indicated in parentheses.
3. When maximum cable entry is exceeded, Style 2 will be supplied.
4. Cable range is defined as the accommodations range for the wire bundle or cable. Dimensions shown are not intended for inspection criteria.

Tired of waiting an eternity for
a simple connector or accessory?

Then Glenair's "Same Day Delivery"
program is the answer.

Tired of long lead times for connectors and accessories? Then consider over 35,000 different part numbers in stock, in quantity, and ready for immediate same-day shipment—including virtually every Mil Spec accessory in the book. Consider as

well Glenair's "no minimum order" policy and our lightning fast turnaround on quotes for price and delivery.

Visit our website at www.glenair.com to search our Same-Day Inventory for all your time-sensitive interconnect requirements.

Crimp Ring Backshells

Crimp ring backshells provide an economical approach to terminating overall cable and harness shields where future repairability or maintainability are not required. These backshells use standard outer crimp rings for full 360° shield termination, and are available in versions for use with shrink boots or for molded cable terminations.

Banding Backshells

Banding backshells provide an economical approach to terminating overall cable and harness shields/screens. These backshells utilize standard bands for full 360° shield/screen termination with the lowest dc resistance available.

Qwik-Ty® Strain Reliefs

Glenair's Qwik-Ty® strain reliefs offer a unique method of providing strain relief to open wire bundles used with circular connectors. The Qwik-Ty® provides a low profile, reduced weight and simple installation. Installation is quick and secure, using either plastic tie straps or lacing tape.

The Space Shuttle Orbiter escapes earth at the speed of 17,000 miles per hour.

But a damaged connector can scratch the mission in the blink of an eye.

Glenair's Sav-Con® Connector Savers are designed to mate with circular and rectangular Mil Spec connectors and test cables which are subject to repetitive mating cycles during manufacture and test. One of the most dramatic applications of our Sav-Con® connectors is on the Space Shuttle Orbiter where they provide protec-

tion for the umbilical connectors from lift-off to touch-down on every mission.

Glenair's Sav-Cons® are available in general duty, environmental and high-performance versions, and provide outstanding reliability and protection with only minimal affect on circuit resistance. Visit us at www.glenair.com for order information.

Stop Toolin' Around

Finding the right tool for the job just got a little bit easier

Nobody can grasp the ins-and-outs of interconnect tool design and manufacturing without a full understanding of cable harness assembly.

At Glenair, we not only manufacture the connectors, backshells, cables and enclosures which go into interconnect cable harnesses, we run a top-flight cable assembly service of our own. And we've drawn on this extensive experience to design and build a

complete family of specialized backshell assembly tools for most Mil-Standard circular connectors, as well as connector wrenches, mini-strap wrenches, universal connector holding tools and braid termination tools for production use and field maintenance.

Contact Glenair for more information or for a copy of our complete *Glenair Backshell Assembly Tools, Banding Tools and Accessories Catalog*.

Just the Place for Glenair's Geo-Marine® Connectors and Cables.

Designed for use in oceanographic, geophysical and other severe environments, Glenair's line of Geo-Marine® connectors and cables withstand hydrostatic pressures up to 5,000 psi and exposure to extreme temperatures and

corrosives. Our Geo-Marine® products have been used in offshore oil drilling, seabed exploration, and pipeline inspection systems, and are available as either discrete connectors, accessories and cable or as engineered cable assemblies.

Geo-Marine® connectors and cables

Geo-Marine® connectors & Bulkhead feed-throughs

Complete molded Geo-Marine® cable assemblies

Geo-Marine® castellated and knurled coupling rings

Nickel aluminum bronze & stainless steel construction

High-density Geo-Marine® insert arrangements

Shipboard Interconnect Requirements?

Glenair is MIL-C-28840 Qualified

The standard connector series for shipboard use, MIL-C-28840 offers high-density insert arrangement and high-shock performance. Glenair's qualified product line is now fully tooled and many popular part numbers are in stock, ready for same-day shipment. The MIL-C-28840 features RFI/EMI shielding, scoop-proof shells and corrosion-resistant materials and finishes. In addition to all the connector

types and styles, Glenair makes all the backshell accessory slash numbers as well. The addition of the MIL-C-28840 connector product line is part of Glenair's total commitment to meeting all your shipboard interconnect requirements. So when you think M28840, think Glenair—from connectors to accessories. Please call the factory, or see our website, for order information .

Protective Covers

A wide selection of protective covers are offered for almost all bayonet or threaded coupled circular connectors. Glenair's proprietary versions (as shown in Glenair's *Circular Connector Accessories* catalog) offer a broad choice of attachments not provided on the Military Standard versions. EMI/RFI protective covers are offered for most bayonet coupled receptacle connectors. Glenair's *Circular Connector Accessories* catalog is available upon request or visit our web site at www.glenair.com.

M24758 Flexible Waterproof EMI/EMP Conduit and Associated End Fittings

Conduit & Accessories

Glenair's M24758 Series conduit and associated fittings have been tested and qualified in accordance with MIL-C-24758 (SH). Glenair's M24758 products are designed to shield cables from electromagnetic radiation, electromagnetic pulse, and to provide weatherproofing. Glenair's M24758 Series products offer the highest level of performance and quality while providing a field-installable and cost-effective conduit system.

Glenair uniquely offers three types of conduit conforming to MIL-C-24758 (SH): For superior shielding performance and crush resistance, Glenair's standard M24758/1 conduit offers a brass inner core with a bronze overbraid, sealed from the weather by a neoprene outer jacket. The brass conduit may also be ordered with a compressed inner core for increased flexibility.

For applications where crush resistance is not required, Glenair offers a fluorocarbon (FEP) inner core with two tin over copper braids and a neoprene outer jacket.

MIL-C-24758 specifies the following platings for fitting materials: CRES-Passivate; Aluminum-Cadmium over Electroless Nickel; Brass-no plating.

Glenair continues to design and manufacture many additional MIL-C-24758 style products to meet specific customer and industry needs. Other Glenair conduit products include: Series 75 Flexible Metal Core Conduit (IAW MIL-C-13909/A-A-52240), MIL-C-28840 Conduit and Fittings, and NAVSEA RP2000 and GR2000 series fitting. Please consult the factory if you have applications not covered by this catalog product offering.

1. The function of the M24758/5 fitting is to terminate flexible shielding conduit directly to a panel. Two jam nuts are supplied with this fitting. One nut secures the fitting to the panel, and a second nut acts as a lock nut to the first.
2. Metric dimensions (mm) are indicated in parentheses.
3. For complete dimensions see applicable Military Specification.

M24758/6 Conduit-to-Pipe Fittings

Conduit & Accessories

M24758/6-16-A

Basic Part No. ————
 Conduit Size Code ————

Material Designator:
 A = Aluminum
 B = Brass
 C = CRES 316

TABLE I

1. The function of the M24758/6 fitting is to terminate flexible shielding conduit with a reusable fitting having an external tapered pipe thread.
2. Metric dimensions (mm) are indicated in parentheses.
3. For complete dimensions see applicable Military Specification.

M24758/7 Conduit-to-Stuffing Tube Fitting

M24758/7-04-B-A

Basic Part No. _____
 Conduit Size Code _____
 Stuffing Tube Size Code _____

Material Designator:
 A = Aluminum
 B = Brass
 C = CRES 316

1. The M24758/7 adapter couples MIL-S-24235/9 through MIL-S-24235/17 stuffing tubes to M24758/1 conduit.
2. Any combination of conduit and stuffing tube sizes may be ordered by identifying the appropriate conduit size and stuffing tube size in the part number configuration.
3. Metric dimensions (mm) are indicated in parentheses.
4. For complete dimensions see applicable Military Specification.

To Most People It's Just a Rubber Connector Cover

At Glenair It's a Good Ol' "Marshal Bean"

We're always hard at work at Glenair developing new and improved interconnect products and accessories. Our "Marshal Bean" Protective Rubber Covers are a fine example—even if they *have* been around for a month of Sunday's.

"Marshal Beans" provide robust physical and environmental protection while eliminating the damage caused when metal connector covers bang against equipment housings, or when test cables get dragged across the shop floor! The covers come in two material types: a

flexible neoprene rubber or a proprietary conductive material which dissipates static electricity.

Glenair Bean Rubber Covers have been available for years, but this catalog introduces four new universal models that make order-entry a snap for standard MIL-C-24308 D-Subminiature's, MIL-DTL-83513 Micro-D's, ARINC 400's and all uniformly rectangular connectors. At Glenair, we reckon a flexible rubber cover is the perfect way to protect an interconnect cable. So isn't it time you hired "Marshal Bean" to ride herd on your connector investment?

M24758/11 Adapter for Coaxial Connectors

M24758/11-16-01-01-A

Basic Part No.				
Conduit Size Code (See Table I)				Material Designator: A = Aluminum B = Brass C = CRES 316
A-Thread Code (See Table II and Note 2)				Style Designator

1. The M24758/11 adapter couples coaxial connectors to M24758/2, M24758/3 or M24758/4 fittings.
2. Select an A-thread from Table II which matches that of the back of the nut on the connector being used. If none of the A-threads match, substitute the desired A-thread information in lieu of the A-thread code in the part number.
For example, a fitting for a 0.375" conduit with a 0.5-28 A-thread of 0.313" H-length would have the part number: M24758/11-03-0.5-28-0.313-A.
3. Metric dimensions (mm) are indicated in parentheses.
4. For complete dimensions see applicable Military Specification.

M24758/12 Adapter for MIL-DTL-26482 Series I Connectors

M24758/12-16-01-01-A

STYLE 01
FOR USE WHEN E DIAMETER IS
GREATER THAN K DIAMETER

STYLE 02
SAME AS STYLE 01 EXCEPT
J DIMENSION IS ZERO

STYLE 03
FOR USE WHEN E DIAMETER IS
EQUAL TO OR LESS THAN K DIAMETER

1. The M24758/12 adapter couples MIL-DTL-26482 Series I connectors (MS3110, MS3111, or MS3116 series) to M24758/2, M24758/3 or M24758/4 fittings.
2. For MIL-DTL-26482 series 2, the M24758/13 adapter may be used.
3. Metric dimensions (mm) are indicated in parentheses.
4. For complete dimensions see applicable Military Specification.

1. The M24758/13 adapter couples connectors listed in Table I to M24758/2, M24758/3 or M24758/4 conduit fittings.
2. The coupling nut end of this adapter shall conform to Military Standard MS3155 (Navy), "Connector, electric, rear accessory design standard". AS85049 Fig 4 takes precedence over this specification.
3. The E diameter and M-thread of this drawing are the same as the E diameter and M-thread of MS3155, and are included for reference purposes.
4. Metric dimensions (mm) are indicated in parentheses.
5. For complete dimensions see applicable Military Specification.

M24758/14 Adapter for MIL-C-28840 (EC) Backshells

M24758/14-16-01-01-A

Basic Part No. _____
 Conduit Size Code _____
 (See Table I)
 A Thread Code _____

Style Designator

STYLE 01
 FOR USE WHEN K DIAMETER IS
 SMALLER THAN E DIAMETER

STYLE 02
 FOR USE WHEN K DIAMETER
 IS EQUAL TO OR LARGER THAN E DIAMETER

1. The M24758/14 adapter provides a non-environmental coupling between certain MIL-C-28840 (EC) backshells and the M24758/2, M24758/3 or M24758/4 fittings, specifically, the A-thread of this adapter mates with the V-thread of the M28840/6 backshell (straight), the M28840/8 backshell (90°), or the M28840/9 backshell (45°).
2. Metric dimensions (mm) are indicated in parentheses.
3. For complete dimensions see applicable Military Specification.

M24758/16 Adapter for Miscellaneous Fittings

M24758/16-16-04-A

Basic Part No. _____
 Conduit Size Code _____
 (See Table I)
 A-Thread Code _____
 (See Table II)

Material Designator:
 A = Aluminum
 B = Brass
 C = CRES 316

1. The M24758/16 adapter couples miscellaneous fittings to M24758/2, M24758/3, or M24758/4 fittings.
2. The American National Thread Series (N) has been superseded by the Unified Thread Series (UN). The series N-thread sizes listed in table II are retained for use with those items which have series N-threads.
3. Metric dimensions (mm) are indicated in parentheses.
4. For complete dimensions see applicable Military Specification.

Conduit comes in all shapes and sizes (and materials).

And nobody offers a broader range of options than Glenair.

From the interconnection of laboratory test equipment to above-deck ship-board use, our plastic convoluted tubing and metal-core conduit provide outstanding wiring protection and shielding. We've designed our product line to satisfy virtually every application specification by

offering the widest range of materials in the industry: PTFE, Tefzel, PFA, FEP, Kynar, PEEK, brass, nickel-iron, and stainless steel - with overbraided shielding in tin copper, nickel copper, Aracon, phosphorous bronze, stainless steel, Halar, Nomex, Dacron, and Kevlar.

Annular & helical convoluted tubing

Metal-core conduit & a full range of shields & jackets

Metal or composite fittings and transitions

User-serviceable conduit systems

MIL-C-24758 fittings and adapters

Complete custom-designed conduit assemblies

Every Picture Tells a Story

This One Speaks Volumes

Glenair is in the business of solving even the most complex interconnect design problems. That's why we've built our conduit product line to take advantage of our forty years of experience in harness assembly and interconnect packaging.

We know that your problem isn't solved when the connector and wire are selected. The real work starts with the packaging of the key components for actual use. Glenair is ready with

wire protection solutions that include plastic convoluted tubing, metal-core conduit, jacketing and metal or fabric overbraiding. We also produce a line of robust composite junction boxes, which add new design options to traditional conduit wire protection assemblies.

At Glenair, we're ready to go with both the individual technologies, as well as the most innovative and effective packaging solutions available today. Now *that's* a story worth telling.

Please Note: SAE Aerospace has assumed control of the M85049 specification for cylindrical connector backshells and accessories.

All existing M85049 specification documents referenced in this index are now superseded by the new AS85049 standard. For convenience in ordering however, basic part numbering for these components still utilize the familiar M85049 prefix.

Several new specification slash sheets have been added to this index since the last published version. The following new products will be available just as soon as the formal SAE qualification process is completed.

AS85049/103	Straight, Composite, Strain-Relief EMI/RFI Backshell
AS85049/104	45°, Composite, Strain-Relief EMI/RFI Backshell

Series 80 "Mighty Mouse" Connectors and Cables

Glenair's "Mighty Mouse" Connectors and cables offer superior environmental performance in an ultraminiature package. Products include miniaturized threaded, quick disconnect and bayonet connectors .

Sav-Con® Connector savers

Glenair's makes a connector saver for every Military Standard circular connector. The low-profile go-betweens are designed to prevent damage to deliverable connectors and extend the life of test cables and harnesses.

Micro-D TwistPin Connectors and Accessories

Glenair offers both Military Standard 83513 Micro-D connectors as well as COTS selections, backshells, mounting hardware and more. Our unique TwistPin contact system offers superior performance.

Geo-Marine® Interconnect Solutions

Our Geo-Marine® product line includes corrosion-free composite junction boxes, harsh environment connectors and cables, Ex Barrier Glands, underwater interconnect assemblies and hydraulic earth bond equipment.

Backshell Assembly Tools, Banding Tools and Accessories

Most interconnect tool suppliers are selling somebody else's ideas, but as you will discover in this catalog, Glenair builds its assembly tools from the ground up. 64 information-packed pages.

Glenair: A World of Interconnect Solutions

Glenair has been the leading manufacturer and supplier of commercial and Military Standard connector accessories since 1956. Building on that foundation, we now offer a dozen, full-spectrum product lines designed to meet every interconnect requirement.

Fiber Optic Interconnect Solutions

Glenair's tactical fiber optic connectors and cables are used in military aerospace applications such as fighter jets and unmanned aerial vehicles. Products include Mil-Dtl-38999 connectors, termini and inspection and test toolkits.

Military Standard Circular Connectors

Military Standard Circular Connectors from Glenair now include hermetic, environmental and filter versions of MIL-C-26482, MIL-C-28840, MIL-DTL-5015, and Mil-DTL-38999 Series I, II, III and IV—many in stock and ready for shipment.
