

ARM MCBSTM32EXL Evaluation Board

MCBSTM32EXL Starter Kit

The MCBSTM32E Starter Kit is the ideal way to begin working with STM32 devices from STMicroelectronics. The starter kit includes:

- MCBSTM32E or MCBSTM32EXL Evaluation board,
- ULINK-ME USB-JTAG adapter,
- MDK-ARM (evaluation software).

These tools help you get started writing programs and testing the microcontroller and its capabilities. Sample applications that run on the MCBSTM32EXL are included.
