Master Appliance Corp., Designers and Manufacturers of Heat Tools for Industry

Located near the western shores of Lake Michigan in Racine, Wisconsin, Master Appliance invented and introduced the first industrial quality heat gun to the worldwide marketplace in 1958. In 1985, we introduced North America's first butane-powered, cordless soldering iron, torch and flameless heat tool, ideal for field use. These professional quality heat tools, and others developed since, have enjoyed worldwide market success. Today our products are used in thousands of facilities, workshops and in the field for drying, welding, shrinking, soldering, desoldering, gluing and for many other common and unique applications, where heat is the need.

Local Availability, Sales, Parts & Service

Master heat tools are sold worldwide through a network of Authorized Stocking Distributors. Trained Sales and Customer Service Representatives, located at our headquarters and throughout the world, insure fast personal service. Contact us for the name, address and telephone number of your nearest stocking distributor or sales representative. Visit our website for up-to-date information on products, accessories, parts, warranty and repair service.

Engineering, Design, Research and Development

Master is continually developing innovative new heat tool products with enhanced capabilities, making it easier to work with new materials and processes used throughout industry. Our Heat Tool Specialists use state-of-the-art technology to develop innovative new heat tools which meet the needs of our customers for professional quality heat tools.

Manufacturing

Master Heat® Tool products are made with superior, quality materials and the finest craftsmanship. Great designs and expert assembly, in a lean, efficient manufacturing setting, assure our customers maximum product quality, performance and value.

Master & Varitemp® Heat Guns

Professional quality, heavy-duty, multiple use heat guns

- High temperature and power ratings: up to 1000°F/540°C at 1740 watts
- Varitemp model features variable temperature control which allows selection of temperatures from ambient to 1000°F/540°C
- High air flow rating: 23 CFM at 3000 FPM gets the job done fast
- Powerful high speed universal motor
- Sturdy die cast aluminum housing
- Double protected heating element housing
- Easily replaceable, reinforced, mica-insulated ceramic heating element
- Externally accessible carbon brush holders for quick replacement
- Three position "OFF-COLD-HOT" rocker switch
- Contoured, well balanced handle
- Non-slip rubber-backed base with 90° rotation
- 6 foot, 3-wire grounded cordset made with flexible, oil and sunlight resistant rubber jacket
- Optional Momentary Contact Switch
- Use to shrink tubing and packaging, bend plastics, cure adhesives, dry and heat parts, strip paint, defrost frozen pipes, heat sensitive materials, solder/desolder and more

Momentary Contact Switch:

Unit shuts off when switch is released. An option for Master Heat Gun models. To order add "MC" suffix to model number. Example: HG-501A-MC

International Voltages Available:

International voltage models with appropriate cordsets are available upon request. Contact our Sales Department for model numbers and availability.

Master Deluxe Varitemp® Heat Gun

Variable Temperature Heat Gun with versatile pivoting stand

- Stable, deluxe heavy-duty, pivoting metal stand with non-slip rubber feet
- Unique, adjustable spring loaded slide handle with ergonomic grip
- Easy selection of multiple pivoting angles for hands-free or hands-on use, to provide the best balance and aim
- High temperature and power ratings: Ambient to 1000°F/540°C at 1740 watts
- Variable temperature control provides easy dial-in temperatures
- Powerful high speed universal motor
- High air flow rating: 23 CFM at 3000 FPM gets the job done fast
- Sturdy die cast aluminum housing
- Double protected heating element housing
- Easily replaceable, reinforced, mica-insulated ceramic heating element
- Externally accessible carbon brush holders for quick replacement
- Three position "OFF-COLD-HOT" rocker switch
- 6 foot, 3-wire grounded cordset made with flexible, oil and sunlight resistant rubber jacket
- Use to shrink tubing and packaging, bend plastics, cure adhesives, dry and heat parts, strip paint, defrost frozen pipes, heat sensitive materials, solder/desolder and more

Proheat® Dualtemp™ & Quick-Touch™ Heat Guns & Kit

Dual temperature heat gun & Quick-Touch heat gun

- Compact, lightweight, easy-to-use
- Balanced ergonomic design prevents operator fatigue
- Two heat settings 500°F or 1000°F (260°C or 540°C)
- Base provides built-in stand for hands-free use
- Protective hand/switch guard and hanging loop
- New Quick-Touch PH-1000 has Momentary Contact Switch
- Use to activate adhesives, bend plastics, dry filler material, shrink tubing and more
- Make your Proheat even more versatile. See our wide variety of professional quality attachments & accessories on page 13

Quality attachments for professional applications

Proheat® Variair® Heat Gun & Kit

Dial-in variable airflow & temperature heat gun

- Compact, lightweight, easy-to-use
- Balanced ergonomic design prevents operator fatigue
- Variable temperature from 130° 1000°F (54° 540°C)
- Variable air flow from 4 16 CFM
- Electronic closed loop temperature control system maintains constant temperature when varying air flow or using specialty attachments
- Base provides built-in stand for hands-free use
- Protective hand/switch guard and hanging loop
- Use to heat temperature sensitive materials including specialty connectors, solder preforms, shrink tubing and more
- Make your Proheat even more versatile. See our wide variety of professional quality attachments & accessories on page 13

Proheat® LCD Dial-in Heat Gun & Kit

Dial-in variable temperature & airflow with LCD display & lockability

- Compact, lightweight, easy-to-use
- LCD with digital display of temperature and air flow settings
- Dial-in temperatures in 10° increments from 130° 1000°F (50° - 540°C) displayed in degrees Fahrenheit or Celsius
- Adjustable air flow from 4 to 16 CFM (113 453 l/min.)
- Proloc[™] Magnetic key provided with every unit locks controls to prevent changing of temperature and airflow
- Electronic closed-loop temperature control system maintains constant temperature when varying air flow or using specialty attachments
- Base functions as built-in stand for hands-free use
- Power-interrupt Reset feature prevents unattended heat gun from resuming heat after a power failure
- Use to heat or dry temperature sensitive materials, shrink tubing, shrink packaging and specialty connectors, solder and desolder, bend plastics, activate adhesives, remove decals, defrost frozen pipes and more
- Make your Proheat even more versatile. See our wide variety of professional quality attachments & accessories on page 13

Proheat® LCD Plastic Welding Kit

A self-contained plastic welding system

- The MASTER PROHEAT Plastic Welding Kit makes fabricating and repairing thermoplastics fast and simple. Each kit is a self-contained, general purpose plastic welding system with everything needed for hot air welding a wide variety of thermoplastic materials: rigid and flexible plastics, auto bumpers, tarps, liners, covers, tents, inflatables and more. The kit includes practice welding rod and instruction manual.
- The heart of the system is the MASTER PROHEAT LCD Model PH-1400 Dial-in Electric Heat Gun. Dial-in control lets you set both temperature and airflow. Once the proper temperature and airflow for a specific welding application is determined, it can be "locked-in" and saved for use again and again with the exclusive, innovative magnetic key lock-in feature. An electronic control system prevents over-heating when the heat gun is used with special welding attachments.

Welding Applications

Welding Flooring Material

Pendulum Welding

Speed Welding

Mirror Welding

Each Welding Kit Includes:

- One Compact, Light weight, Easy-to-use, Master Proheat® Model PH-1400 Heat Gun
- 5 Starter Welding Rod Assortment
- 6 qty- 1/8" Dia., 9" Long, Round PVC Welding Rod
- 6 qty- 1/8" Dia., 9" Long, Round PP Welding Rod
- 6 qty- 1/8" Dia., 9" Long, Round ABS Welding Rod
- 6 qty- 1/8" Dia., 9" Long, Round HDPE Welding Rod
- 6 qty- 1/8" Dia., 9" Long, Round LDPE Welding Rod

PH-1400

- Dial-in LCD display of temperature and air flow settings
- Dial-in temperatures in 10° increments 130°F to 1,000°F
- Dial-in air flow from 4 to 16 CFM (113 to 453 l/min)
- Control system prevents overheating when using specialty attachments
- Temperature & airflow lock-in feature
- Assembled in USA

■ 35295

Speed Welding Tip - For welding rod up to 6 mm diameter

■ 3527

Tacking Tip - For tacking parts together prior to welding so they will not move

■ 35294

3/8" Reducer - Required to attach welding tips

35293

5/8" Reducer - To provide concentrated airflow

■ 35017

1-¼" Shrink Attachment -Reflects air around shrink tubing or pipe

- Plastic Welding & Proheat Instruction Manuals
 Provide Informative
 How-to-Use Instructions
- Heavy Duty Storage & Carrying Case safely & conveniently stores kit contents

Proheat® LCD Programmable Heat Gun & Kit

Six programmable temperature & airflow settings with LCD display

- Compact, lightweight, easy-to-use
- Six programmable settings with digital display of temperature and air flow
- Programmable heat and air flow removes the guess work
- Program temperature in 10° increments from 130° to 1000°F (50° - 540°C) in your choice of degrees Fahrenheit or Celsius
- Adjustable air flow from 4 16 CFM (113 453 l/min.)
- Electronic closed loop temperature control system maintains constant temperature when varying air flow or using specialty attachments
- Base functions as built-in stand for hands-free use
- Ergonomic handle provides balanced grip
- Temperature & Air Flow Lock-In feature provides added management control. Perfect for production applications requiring consistent application of heat
- Power-interrupt Reset feature prevents unattended heat gun from resuming heat after a power failure
- Use to heat or dry temperature sensitive materials, shrink tubing, shrink packaging and specialty connectors, solder and desolder, bend plastics, activate adhesives, remove decals, defrost frozen pipes and more
- Make your Proheat even more versatile. See our wide variety of professional quality attachments & accessories on page 13

PH-1500K

Proheat LCD Programmable Heat Gun with rugged storage case and all 5 specialty attachments

Nozzle Deflector
Deflects heat away
from windows

35295
Plastic Welding Rod
Nozzle w/ 7mm intake
For use with welding rod,
use with 3/8" reducer

35271
Tacking Tip
For tacking parts together prior
to welding so they will not move,
use with 3/8" reducer

35296 3/4" (20 mm) Lap Welding Nozzle For lap welding plastic materials, use with 3/8" reducer

WELDING ATTACHMENTS

35266 1 1/2" 40mm Angle Slit Nozzle Lap welds roofing materials

35267
3" (75mm) Teflon Coated
Butt Welding Heat Disc
For butt welding
PVC pipes

35268 1 1/2" (40mm) Lap Welding Slit Nozzle For lap welding PVC Sheeting

Attachment Kit Kit of 5 most popular attachments

ACCESSORIES

Bench Stand To position guns for various applications

Seam Roller with ball bearings For lap welding, edging tape and roofing applications

35351 Storage Case Transport & store in a rugged plastic case

35297

ABS Welding Rod

Acrylonitrile Butadiene Styne
(Pkg. of 16)

Round, 1/8" Dia. x 9" Long, Natural,
for welding ABS plastics

35298

PP Welding Rod Polypropylene (Pkg. of 16) Round, 1/8" Dia. x 9" Long, Natural, for welding PP plastics

PVC Welding Rod Polyvinyl Chloride (Pkg of 16) Round, 1/8" Dia. x 9" Long, Grey, for welding PVC plastics

35299

35300 LDPE Welding Rod Low Density Polyethylene (Pkg of 16) Round, 1/8" Dia. x 9" Long, Natural, for welding LDPE plastics

HDPE Welding Rod High Density Polyethylene (Pkg. of 16) Round, 1/8" Dia. x 9" Long, Black, for welding HDPE plastics

Ecoheat® Heat Gun & Kit

Economical, lightweight, multi-use heat gun

- Two heat settings: 500°F or 1000°F (260°C or 540°C)
- Two fan speeds Low or High (7 or 9 CFM)
- Resettable thermostat Automatically protects element against
- Lightweight 1 lb. Easy to hold at any angle for long periods of time, eliminates operator fatigue
- Built-in hand guard Protects hand and fingers. Recessed switch guards against knocks and bumps
- 3-wire grounded cordset Positive grounding system for user safety
- Thermoplastic housing For high impact durability
- Built-in stand Very stable, allows user to set heat gun down in an upright position for hands-free use
- Use to bend and form plastics, dry body fillers, remove decals, spot dry paint, shrink tubing, packaging and more

260° or 540°C 7 or 9 CFM 120V 60 Hz Kit includes EC-100 Heat Gun, 7/8" reducer attachment, 1-1/4" shrink tubing reflector, 1-15/16" and 3-1/8" spreader attachments packed in a durable storage/carrying case Attachment kit contains 7/8" reducer attachment, 1-1/4" shrink tubing reflector, 1-15/16" and 3-1/8" spreader attachments 35215 Durable storage/carrying case

Kit includes storage case and four specialized nozzle attachments shown left to right:

7/8" reducer, shrink tubing reflector, 1-15/16" spreader and 3-1/8" spreader

Specifications

- Air Volume: 7 or 9 CFM Air Velocity: 720 or 1100 FPM Motor: Permanent Magnet Nozzle Opening: 1..2" I.D., 1.35" O.D. ■ Cordset: 6 ft., 3-wire grounded ■ Dimensions: 8.5" L x 3.2" W x 7.7" H
- • (4) Tool Net Weight: 2 lbs. Shipping Weight Tool: 3 lbs. Shipping Weight Kit: 5 lbs.

NOTE: Users should independently evaluate the suitability of the product for their application.

Masterflow® Heat Blower

Professional quality, continuous-duty, process heat blower

Specifications

- Air Volume: 47 CFM Air Velocity: 2200 FPM Motor: Induction - Nozzle Opening: 1.85" I.D., 2.25" O.D.
- Dimensions: 12" L x 6" W x 9" H, (AH-301 & AH-302, 9" L x 6" W x 9" H) - Base Size: 6" x 6" - Cordset: 6 ft., 3-wire grounded = : . Net Weight: 6 lbs. = Shipping Weight: 8 lbs.

- 3 models produce 300°F, 500°F or 750°F. High temperatures accommodate many heating, drying & shrinking applications
- High air flow: 47 CFM at 2200 FPM gets job done fast
- Brushless induction type motor for quiet, continuous-duty operation
- Easily replaceable, reinforced, mica-insulated heating element
- Rubber-backed stand permits 90° non-slip adjustability
- Use in any position or mount on equipment
- Ergonomic handle for carrying or portable use
- Mount over conveyor line or on machinery
- Use to heat or dry materials, bend plastics, shrink wrap and more

MODEL NO.	DESCRIPTION	1				REPLACEMENT ELEMENT

Master-Mite® Heat Gun

Continuous-duty bench-top heating system

- Complete system comes standard with 650°F/343°C heating element, adjustable stand and heat shrink attachment
- Ideal heat & air flow (3.8 CFM), performs benchtop heating jobs without blowing components around the work station
- Quiet-running shaded pole motor, eliminates noisy production areas
- 3 optional easy-to-change plug-in heating elements available: 500°, 650° & 800°F
- Use to activate adhesive, cure epoxies, dry components, melt solder preforms, remove decals, shrink tubing and more

MODEL NO.	DESCRIPTION					
10008	650°F/343°C	120V	60Hz	4.5A	475W	
10009	650°F/343°C	220V	50Hz	2.0A	450W	

Optional Replacement Heating Elements

Master-Mite® ESD Heat Gun

Continuous-duty ESD bench-top heating system

- Complete system comes standard with black 800°F/427°C heating element, shrink attachment and adjustable stand
- Totally grounded system with housing surface conductivity 500 ohms square. Conductive housing will not build up or hold a static charge
- Housing helps to shield against EMI & RFI (electromagnetic & radio frequency interference)
- Quiet-running, maintenance free shaded pole motor
- Low velocity air flow will not blow components around the workstation
- 3 optional interchangeable plug-in heating elements available
- Complete line of attachments available
- Use to activate adhesive, cure epoxies, dry components, melt solder preforms, remove decals, shrink tubing and more

Econolron® EI-20

Economical, butane-powered soldering iron, flameless heat tool & torch

35407 Popular accessory kit includes: 35395 solder head base, 35396 poly cut tip, 35397 needle tip, 35398 2.4mm solder tip, 35399 double sharp tip, 35400 hot knife tip

> Refill with Master Ultratane Butane for best performance. (page 29)

- Standard with soldering tip, hot air tip and torch tip
- Completely portable, lightweight and easy to handle
- Temperatures up to 2370°F/1300°C
- Ignite tool with flint lighter built into the cap
- Use to pinpoint flameless heat, silver solder, solder and desolder, heat shrink tubing and environmental connectors, strip insulation and cut plastics with hot knife tip, use as an open flame torch and more

Refill with Master Ultratane Butane for best performance. (page 29)

NOTE: Users should independently evaluate the suitability of the product for their application.

High Performance Ultratip® Technology

Longer tip life, superior thermal conductivity

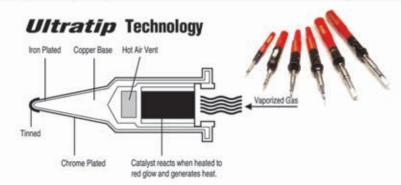

Master Appliance Ultratorch® heat tools feature Ultratip® soldering tips. Ultratip is the long lasting, oxygen-free, copper based, iron and chrome plated soldering tip with a built-in catalyst, tinned with lead-free solder.

Ultratorch heat tools, with Ultratip Technology, are perfect for use with today's lead-free solders. In fact, Ultratip soldering tips have more than double the iron and chrome plating thickness of our competitors' brass based tips, providing higher thermal conductivity and much longer tip life.

Tips for Lead-Free Hand Soldering

Because hand soldering tends to be done at the end of the line, where the value of a board is at its highest, switching to lead-free solder may have a significant effect on your manufacturing yields, costs and productivity. Simply increasing tip temperature is not the answer because it can cause flux to evaporate before it's had time to activate.

The keys to success here are tip material, tip shape, tip condition, the soldering iron's power output and it's time on the joint.

By choosing the tip shape closest to the component you're soldering, and always selecting the largest tip, you'll transfer heat more efficiently at lower settings. We offer a wide selection of tips for your applications.

Since lead-free solder's higher tin content erodes the tip's iron plating faster, Ultratip's thicker iron and chrome plating will significantly extend the tip life. Cleaning your tips often and immediately re-tinning them will also keep them in top condition longer.

Ultratorch® UT-35

Economical, butane-powered, 3-in-1 soldering iron, flameless heat tool & torch

- Standard with Ultratip® soldering tip, hot air tip and protective cap
- 3-in-1 soldering iron, flameless heat tool and torch
- Completely portable, lightweight and easy to use
- Does not require cords, batteries or cartridges, just a lighter
- Adjustable temperature control for temperatures up to 1200°F
- Equivalent to a 20-60 watt electric soldering iron
- Built-in window indicates fuel level
- Refill with Master Ultratane Butane for best performance (page 29)
- Use to pinpoint heat, remove surface mount components, repair vinyl, heat shrink tubing, solder & desolder, spot dry, strip insulation with hot knife and more

Ultratorch® UT-100SiEA

for best performance. (page 29)

Self-igniting butane-powered flameless heat tool with fan assisted air flow

- Eliminates scorching and burning damage to shrink tubing during installation
- Variable temperature 302° 572°F (150° 300°C) with fan
- Enhanced Air Flow volume is 4 times greater with fan
- Variable temperature 482° 932°F (250° 500°C) without fan
- Butane-powered and completely portable/cordless, for use where no electrical outlets are available
- Built-in battery-powered motor uses 4 standard AA batteries
- Built-in LED light provides lighting in dark locations
- Built-in stand is convenient for safety and hands-free use
- Ideal for terminating shrink tubing and specialty connectors 10mm I.D. or less
- Use with or without enhanced air flow and with or without shrink attachment
- Ergonomic handle makes tool easy to use over an extended period of time
- UL & TUV Listed

Ultratorch® UT-100 & UT-100-TC

Butane-powered soldering iron, flameless heat tool and torch

UT-100-TC

Ultratorch Professional Kit:

Includes heat tool, 3 soldering tips, flameless hot air and open flame torch tips, hot knife, solder, wire cutter, needle nose pliers and cap in a rugged storage/carrying case

UT-100 Ultratorch

Solder

Flameless Heat

Torch

- Triple function soldering iron, flameless heat tool and brazing torch
- Features oxygen-free, copper based Ultratip® soldering tips, with thick iron and chrome plating for long life and high thermal conductivity
- Cordless and completely portable, ready-to-use in 30 seconds
- Adjustable temperature control
- Soldering temperature up to 932°F, ideal for use with today's lead-free solder
- Hot air temperature up to 1202°F, perfect for Solderseal™ environmental "heat and seal" connectors
- Torch temperatures up to 2372°F/1260°C
- Sturdy metal tank with fuel viewing window holds enough fuel for 2 hours of operation
- Refill with Master Ultratane Butane for best performance (page 29)
- Use to pinpoint heat, remove surface mount components, repair vinyl, heat shrink tubing, solder and desolder, spot dry, torch materials and more
- Optional accessories available and interchangeable between UT-100 & UT100Si (See page 21)

Ultratorch® UT-100 & UT-100Si Tips and Accessories

Ultratip® soldering tips for use with UT-100 & UT-100Si Ultratorches

- Oxygen-free, copper based Ultratip® soldering tips have thick iron and chrome plating for long life and high thermal conductivity
- Ultratips are manufactured using a patented process which produces uniform iron and chrome plating thickness
- Ultratip® soldering tips feature leading-edge combustion chamber/exhaust port design
- All tips pre-tinned with lead-free solder
- Optional tips interchangeable between all UT-100 & UT-100Si models

Ultratorch® UT-100Si, UT-100SiK & UT-100Si-TC

Self-igniting butane-powered soldering iron and flameless heat tool

UT-100Si-TC

Ultratorch Professional Kit:

Includes heat tool, 3 soldering tips and flameless hot air tip, hot knife, solder, wire cutter, needle nose pliers and cap in a rugged storage/carrying case

UT-100SiK Ultratorch Kit

Dual function, self-igniting soldering iron and flameless heat tool

 Features oxygen-free, copper based Ultratip® soldering tips, with thick iron and chrome plating for long life and high thermal conductivity

- Cordless and completely portable, ready-to-use in 30 seconds
- Self-ignition with push button for fast, easy starting
- Adjustable temperature control
- Soldering temperature up to 932°F, ideal for use with today's lead-free solder
- Hot air temperature up to 1202°F, perfect for Solderseal™ environmental "heat and seal" connectors
- Sturdy metal tank with fuel viewing window holds enough fuel for 2 hours of operation
- Contains everything needed to heat shrink tubing and specialty connectors, remove surface mount components, solder and desolder, repair vinyl, spot dry and cut materials
- Optional accessories available and interchangeable between UT-100 & UT-100Si (See page 21)

MODEL NO. DESCRIPTION UT-100Si-TC Includes Ultratorch, three Ultratip soldering tips: 70-01-02, 70-01-05, 70-01-11, hot air tip: 70-01-52, shrink attachment: 70-01-55, hot knife: 70-01-16. open end wrench, ejector, sponge, cap, solder, wire cutter and needle nose pliers packed in a rugged plastic carrying case Includes Ultratorch, Ultratip soldering tip: 70-01-02, UT-100SiK hot air tip: 70-01-52, shrink attachment: 70-01-55, open end wrench, ejector, sponge and steel case UT-100Si Includes Ultratorch, Ultratip soldering tip: 70-01-02, hot air tip: 70-01-52, shrink attachment: open end wrench, ejector and cap UT-100Si-HK Includes Ultratorch, hot knife: 70-01-16, open end wrench, ejector and cap

Refill with Master Ultratane Butane for best performance. (page 29)

Ultratorch® UT-200 & UT-200Si

Butane-powered soldering iron/heat tools

- Operates as a soldering iron, flameless heat tool and
- Standard with Utratip® soldering tip, hot air tip, shrink attachment and protective cap
- Equivalent to 200 watt max. electric soldering iron
- Adjustable temperatures up to 2372°F/1260°C
- High power (BTU's) makes it perfect for heavy-duty service and maintenance
- Sturdy metal tank holds enough fuel for 2.6 hours of operation at middle temperature setting
- Refill with Master Ultratane Butane for best performance (page 29)
- Use to pinpoint heat, heat shrink tubing, solder and desolder, strip insulation, terminate specialty connectors, torch materials and more
- Optional accessories interchangeable between UT-200, UT-200Si and UT-300Si models

DESCRIPTION MODEL NO. UT-200 Butane-powered soldering iron, heat tool and torch with soldering tip, hot air tip, shrink attachment and UT-200Si Self-igniting, butane-powered soldering iron/heat tool, with soldering tip, hot air tip, shrink attachment and protective cap

See page 24 for more accessories.

Specifications

- Approx. Soldering Tip Temp.: 482° 986°F (250° 530°C)
- Approx. Hot Air Tip Temp.: 1004°F (540°C) Approx Torch Temp: UT-200 2372°F (1260°C) ■ Fuel Tank Capacity: 2.2 fl. oz. (63 cc)
- Dimensions: 11.9" L (300mm) Net Weight: 9 oz.
- Shipping Weight: 1 lb. Shipped Empty

NOTE: Users should independently evaluate the suitability of the product for their application.

UT-200Si

- Operates as a soldering iron and flameless heat tool
- Self-ignition with push button for fast, easy starting
- Standard with Utratip® soldering tip, hot air tip, shrink attachment, spanner and open end wrenches, and protective cap
- Equivalent to 200 watt max, electric soldering iron
- Adjustable temperatures up to 1004°F/540°C
- High power (BTU's) makes it perfect for heavy-duty service and maintenance
- Sturdy metal tank holds enough fuel for 2.6 hours of operation at middle temperature setting
- Refill with Master Ultratane Butane for best performance (page 29)
- Use to pinpoint heat, heat shrink tubing, solder and desolder, strip insulation, terminate specialty connectors, torch materials and more
- Optional accessories interchangeable between UT-200, UT-200Si and UT-300Si models

Solder

Desolder

Flameless Heat

Ultratorch® UT-300Si

Butane-powered pistol grip soldering iron and flameless heat tool

Refill with Master Ultratane Butane (page 29)

- Operates as a soldering iron or flameless heat tool
- Standard with Ultratip® soldering tip, hot air tip, shrink attachment and protective cap
- Convenient slide switch ignition system for quick ignition
- Pistol grip design, great for extended use applications
- High performance soldering tip can reach approx. 932°F/500°C
- Built-in window indicates fuel level
- High capacity, can run up to 3 hours on a full tank
- Use to pinpoint heat, heat shrink tubing, solder and desolder, strip insulation, terminate specialty connectors and more
- Optional accessories interchangeable between UT-200, UT-200Si and UT-300Si models

MODEL NO.	DESCRIPTION
UT-300Si	Butane-powered soldering iron and flameless heat tool

Specifications

Ultratorch® UT-200, UT-200Si & UT-300Si Tips and Accessories

For use with UT-200, UT-200Si & UT-300Si Ultratorches

- Oxygen-free, copper based Ultratip® soldering tips have thick iron and chrome plating for long life and high thermal conductivity
- Ultratips are manufactured using a patented process which produces a uniform iron and chrome plating thickness
- Ultratip® soldering tips feature leading-edge combustion chamber/exhaust port design
- All tips are pre-tinned with lead-free solder.
- Optional accessories interchangeable between UT-200, UT-200Si and UT-300Si models

Microtorch MT-5

Pocket-sized, self-igniting butane-powered microtorch

- Compact pocket size, fits easily into pocket or tool kit
- Quick starting self-igniting piezo electric ignition eliminates the need for lighters or matches
- Flame resists wind and moisture and is perfect for outdoor use
- Adjustable flame height for low and high temperatures up to 2500°F/1300°C blue flame
- Safety lock and attached safety cap prevent unintentional ignition
- Hands-free mode
- Refill with Master Ultratane Butane for best performance (page 29)
- Meets Consumer Products Safety Commission (CPSC) Child Safety Requirements
- Use to heat and ignite materials, repair glass, shrink tubing, solder and desolder, terminate specialty connectors and more

MODEL NO.	DESCRIPTION	
MT-5	Microtorch, pocket-sized	

Specifications

■ Approx. Flame Temp. 2500°F
 ■ Fuel Tank: Plastic, Built-in, Refillable
 ■ Approx. Run Time: 20 min. @ max. setting
 ■ Dimensions: 2.9" H x 1.3"
 W x .9" D
 ■ Net Weight: 1.7 oz.
 ■ Shipping Weight: 1 lb.
 ■ Shipped Empty

NOTE: Users should independently evaluate the suitability of the product for their application.

Microtorch MT-11 & MT-11K

Palm-sized microtorch

- Built-in self-igniting system with safety lock
- Temperatures up to 2500°F/1300°C
- Compact palm-sized, perfect for tool kits and field service kits
- Adjustable wind-resistant flame
- Replaceable, refillable "fuel cell" (included) (page 29)
- Meets Consumer Products Safety Commission (CPSC)
 Child Safety Requirements
- Kit includes microtorch with empty fuel cell and 15/16 oz. can of butane packed in single shipper carton with proper D.O.T. markings
- Ships via ground transportation without hazmat charges
- Use to heat materials, ignite materials, pinpoint torch, shrink tubing, solder and desolder, terminate specialty connectors and more

MODEL NO.	DESCRIPTION	
MT-11	Microtorch, palm-sized, shipped without fuel	
MT-11K	Microtorch with 15/16 oz. can of butane (10448)	

Specifications

■ Approx. Flame Temp.: 2500°F
 ■ Approx. Run Time: 20 min. @ max. setting
 ■ Fuel Tank: Refillable Fuel Cell
 ■ Dimensions: 4.3" H x 2.5" W x 1" D
 ■ Net Weight: 2.1 oz.
 ■ Shipping Weight: 1 lb.
 ■ Shipping Weight Kit: 2 lbs.

Microtorch MT-30

Low profile, table-top microtorch with stable base

- Built-in self-igniting system with safety lock that ensures the switch is not turned on when not in use
- Wide, heavy, stable base is perfect for bench-top use
- Durable self-contained, refillable metal fuel tank
- Large capacity fuel tank for 60-minute continuous run time on full charge
- Adjustable broad or pinpoint flame with temperatures up to 2500°F/1300°C
- Refill with Master Ultratane Butane for best performance (page 29)
- Use for laboratory applications, to heat materials, shrink tubing, terminate specialty connectors, work with silver wire, add patina to copper jewelry, as a pinpoint torch and more

MODEL NO.	DESCRIPTION
MT-30	Microtorch, low profile table-top

Specifications

■ Approx. Flame Temp.: 2500°F ■ Approx. Run Time: 60 min. @ max. setting ■ Fuel Tank: Metal, Built-in, Refillable ■ Dimensions: 5.1" L x 3" W x 3.5" D ■ Net Weight: 12 oz. ■ Shipping Weight: 1 lb. ■ Shipped Empty

NOTE: Users should independently evaluate the suitability of the product for their application.

Mini-Triggertorch MT-70 & MT-70P

Self-igniting butane powered microtorch, soldering iron, heat tool

NOTE: Users should independently evaluate the suitability of the product for their application.

- Gas adjustment wheel provides adjustable, long blue torch flame with temperatures up to 2500°F/1300°C
- Self-igniting piezo electric ignition is easy to start and eliminates the need for lighter or matches
- Incorporates "trigger" switch with "pulldown" lock to meet Consumer Products Safety Commission (CPSC) Child Safety Requirements
- "Hands-free" slide lock for continuous use and instant off operation
- Ergonomic handle design ensures a non-slip grip
- Removable base for table-top or hand-held use
- 60 minute continuous run time with a full charge
- Durable self-contained, refillable plastic fuel tank
- Refill with Master Ultratane Butane for best performance (page 29)
- Unique shutter lever to easily extinguish ignition flame if using optional soldering or hot air tip attachments
- Use to heat parts, ignite materials, melt plastic, shrink tubing, solder & desolder, terminate specialty connectors and more

MODEL NO.	DESCRIPTION
MT-70	Triggertorch, mini, table-top
MT-70P	MT-70 Mini-Triggertorch & MT-11 Palm-sized Microtorch

Specifications

■ Approx. Flame Temp.: 2500°F
 ■ Approx. Run Time: 60 min. @ max. setting
 ■ Fuel Tank: Plastic, Built-in, Refillable
 ■ MT-70 dimensions: 5.5"
 L x 3.8" H x 1.3" W
 ■ Net Weight: 6.4 oz.
 ■ Shipping Weight: 1 lb.
 ■ MT-70P Shipping Weight: 2 lbs.

Microtorch MT-51, MT-51B & MT-51H

Hand-held or table-top butane-powered microtorch

- Built-in self-igniting system with safety lock
- "Hands-free" slide lock for continuous use and instant off operation
- Durable self-contained, refillable plastic fuel tank
- Wide, stable base is perfect for hands-free use
- Temperatures up to 2500°F/1300°C
- 2 hour continuous burn time, perfect for continuous heat applications
- Adjustable broad or pinpoint flame
- Refill with Master Ultratane Butane for best performance (page 29)
- Meets Consumer Products Safety Commission (CPSC)
 Child Safety Requirements
- Use to heat materials, ignite materials, pinpoint torch, shrink tubing, solder and desolder, terminate specialty connectors and more

MT-51B ships via ground transportation with no Hazmat charges

MODEL NO.	DESCRIPTION
MT-51	Microtorch, table-top
MT-51B	Microtorch, table-top with 15/16 oz. butane (10448)
MT-51H	Microtorch, table-top includes hot air tip (35387) and 1" diameter heat shrink attachment (35394)

Specifications

■ Approx. Flame Temp.: 2500°F ■ Approx. Run Time: Two Hours ■ Fuel Tank: Plastic, Built-in, Refillable ■ Dimensions: 6.1" H x 3" W x 1.3" D

■ Net Weight: 5 oz. ■ Shipping Weight: 1 lb. ■ Shipped Empty

Triggertorch™ MT-76 & MT-76K

Professional quality, hand-held or table-top, butane-powered, self-igniting triggertorch, soldering iron and flameless heat tool

MT-76K, 4 tools in 1

Open Flame Torch, Soldering Iron,
Flameless Hot Air and Hot Knife

- Gas adjustment wheel provides adjustable, long blue torch flame with temperatures up to 2500°F/1300°C
- Self-igniting piezo electric ignition is easy to start and eliminates the need for lighter or matches
- MT-76 includes soldering tip and hot air tip for soldering up to 752°F/400°C and heating up to 932°F/500°C
- Kit includes triggertorch, removable stand, 5" wire cutter, 5" needle nose pliers, soldering tip, hot air tip, shrink attachment, polyfoam cutter, hot knife tip, roll lead free solder, and stand with sponge packed in a durable plastic storage/carrying case
- Incorporates "trigger" switch with "pulldown" lock to meet Consumer Products Safety Commission (CPSC) Child Safety Requirements
- "Hands-free" slide lock for continuous use and instant off operation
- Unique shutter lever to easily extinguish ignition flame when using soldering or hot air tip attachments
- Ergonomic handle design ensures a non-slip grip
- Removable base for table-top or hand-held use
- Durable self-contained, refillable plastic fuel tank with capacity for 2 hour run time
- Refill with Master Ultratane Butane for best performance (page 29)
- Use to heat parts, ignite materials, melt plastic, shrink tubing, solder & desolder, terminate specialty connectors and more

General Industrial Torch GT-70

Hand-held or table-top, butane-powered, heavy-duty, general industrial torch

- Self-igniting piezo electric ignition is easy to start and eliminates need for lighter or matches
- Large capacity, built-in, durable, metal fuel tank for 30-minute continuous run time on a full charge
- Large sized adjustable blue flame accommodates heavy-duty industrial applications with temperatures up to 2500°F/1300°C
- Safety lock prevents unintentional ignition, locks for storage
- Removable base for table-top or hand-held use
- Refill with Master Ultratane Butane for best performance
- Meets Consumer Products Safety Commission (CPSC)
 Child Safety Requirements
- Use to braze with special alloy welding rods, heat and bend thin metals, loosen rusted bolts, pop dents out of metal, shrink and terminate heavy wall adhesive-lined tubing, solder and desolder and more

MODEL NO. GT-70	DESCRIPTION General Industrial Torch

Ultratane® Butane

For use with all Master butane-powered products

- Recommended fuel for all Master butane-powered products
- Triple-refined formula reduces clogging of filters
- Special vapor pressure promotes consistent ignition
- Contains no CFC's
- Available in three convenient sizes: 5 1/8 oz. (145 gram), 3 3/4 oz. (106 gram), and 15/16 oz. (26 gram) cannisters
- Model 10448 and 11799 meet Limited Quantity Class Markings and can ship via ground transportation without hazardous material charges
- Model 51773 has proper D.O.T. markings and ships via ground transportation with hazardous material charges

MODEL NO.	DESCRIPTION
51773	51/8 oz. (145 gram) canister with universal tip adapter
11799	33/4 oz. (106 gram) canister with universal tip adapter
10448	15/16 oz. (26 gram) canister with universal tip adapter

11799 3³/₄ oz.

10448 15/16 OZ.

PortaPro® Glue Gun

Cordless, butane-powered hotmelt glue gun

GG-100 PortaPro Glue Gun

Includes glue gun, general purpose tip (35408) and four general purpose 6" glue sticks

- Completely portable, lets you work almost anywhere
- Industrial power and durability
- One touch, fast piezo ignition
- Reaches operating temperature in less than 4 minutes
- 140 minutes continuous run time with a full charge
- Fuel view window indicates fuel level
- Refill with Master Ultratane Butane for best performance (page 29)
- Built-in fold away stand
- Unlimited versatility
- Use to bond corrugated materials, chipboard and wood, fasten plastics, light metals, textiles, shock absorbent packaging, capacitors, resistors, soldered parts, electrical potting/staking parts on PC boards and jumper wires, reseal products during packaging, and glue down carpeting

Sealed Electrical Systems

Environmentally sealed connections create permanent repairs

- Heavy Duty Trucking
- Marine & RV
- Plant Maintenance Departments
- OEM & Automotive Aftermarket
- Heavy Duty Equipment
- Oil Fields & Mining
- Municipalities & Military Bases

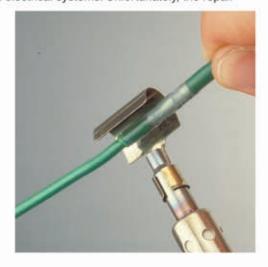

The past decade has seen the advent of sweeping technological advances in the automotive, fleet, and marine industries. Many of these advances involve improved electrical systems, controlled by miniature onboard computers. Consequently, small variations in voltage can significantly affect vehicle performance.

To combat these problems and increase longevity, the major manufacturers in these industries are using completely sealed electrical systems. Unfortunately, the repair

and maintenance industry is lagging behind. The integrity of sealed electrical harnesses is often breached when repairs are made with inferior, unsealed electrical connectors. Master Appliance has the solution.

The heat shrink connector is the innovative solution that allows the aftermarket to keep pace with changing technology. Each repair made with a heat shrink connector is individually protected from corrosion, contaminants and current leakage. This ensures that the original integrity of the wiring harness is maintained.

Master Appliance high quality adhesive-lined Heat-Seal Electrical Connectors are available in three styles:

ProsealTM

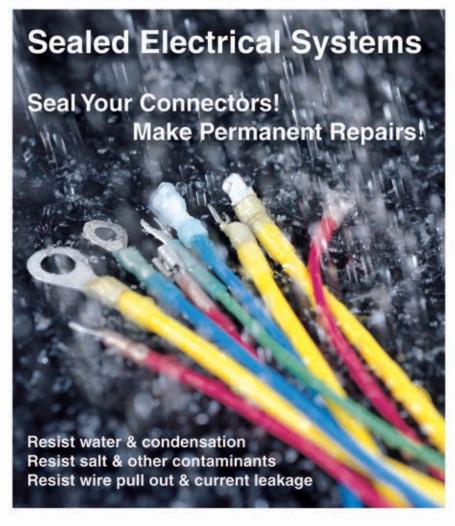

Crimp and heat-seal connectors

Solderseal™

Solder & heat-seal connectors

Multiseal™

Crimp, solder & heat-seal connectors

Proseal™ Connector Assortment Kits

High quality crimp & heat-seal connectors

- The finest "Crimp & Heat-Seal" connector on the market today. Better wire contact - Less voltage drop - Better current flow
- Seamless butt connectors & brazed seam rings and spades –
 Prevents opening of connector barrel for stronger crimp
- Uniform adhesive flow does not overflow onto terminal to impede contact
- Heat shrink tubing does not reduce in length, creating better insulation along with superior wire support and strain relief
- Translucent, adhesive-lined polyolefin shrink tubing Allows visual inspection, prevents wire corrosion and provides a water and contaminant resistant seal
- Color-coded tubing with wire gauge imprint Provides easy identification of the correct part for the job
- Superior integrity of electrical systems Sealed electrical systems ensure the original integrity of wire connections and wiring harnesses and conforms with OEM standards. 89 lbs tensile strength

Solderseal™ Connector Assortment Kits

High quality solder & heat-seal connectors

- High quality, sealed solder connection that takes the guesswork out of soldering water tight connections
- Low temperature pre-measured solder with flux for greater tensile strength and superior current flow
- Uniform adhesive flow does not overflow onto terminal to impede contact
- Heat shrink tubing does not reduce in length creating better insulation along with wire superior support and strain relief
- Translucent, adhesive-lined polyolefin shrink tubing Allows visual inspection, prevents wire corrosion, and provides a water and contaminant resistant seal
- Ensures the original integrity of wire connections and wiring harnesses and conforms with OEM standards 102 lbs tensile strength

Crimping Tools

Hand tools for heat-seal electrical connectors

Cutter, Stripper, Crimper

- Two precision-ground wire cutters: up-front anvil-type and scissors-type located behind pivot point
- Cuts, strips and crimps stranded wire in 22 to 10 AWG sizes and solid wire in 18 to 8 AWG sizes
- Cuts 6-32, 8-32, 10-32, 10-24 and 4-40 bolts and screws
- Scissors action wire stripper is precision-ground for accuracy and clean, neat stripping
- Cushioned handle for user comfort, made of heat-treated tool steel for long life, reliability and accuracy

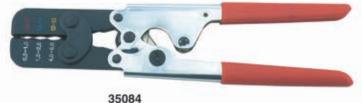

MODEL NO.	DESCRIPTION
35083	Cutter, Stripper, Crimper

Ratcheting Crimper

- Crimps 22-18, 16-14 and 12-10 AWG size connectors
- Rounded crimp die area for insulated terminals
- Industry standard color-coded crimp numbers for easy size identification
- Full-cycle ratcheting handle ensures a complete crimp
- Made from heat-treated steel for long life and reliability
- Cushioned handle for user comfort

Master Heat® Tools Factory Warranty

Every Master Heat Tool comes with a one year limited warranty

One Year Warranty

Master Heat Tools are carefully tested and inspected before being shipped from the factory. We warrant our products to be free from defects in materials and workmanship, under normal use and service, for one year from the date of purchase. In the event of a defect in materials or workmanship we will either repair or replace, at our option, without charge any part which in our judgement shows evidence of such defect.

Warranty does not apply to wearable items such as attachments, brushes, heating elements, soldering tips, hot air tips, burners or ejectors, which require periodic replacement, nor does it apply if the heat tool has been misused, abused, tampered with or altered.

At the end of the warranty period, Master Appliance shall be under no further obligation, expressed or implied. Master Appliance assumes no responsibility for, and this warranty shall not cover, any incidental or consequential damages from any defect in products or their use.

This warranty gives you specific rights. You may also have other rights which may vary from state to state. Warranty information is included within the Instruction Manual for each product or may be obtained by contacting Master's Customer Service Department at 800-558-9413, 262-633-7791 or www.masterappliance.com.

Master heat tools are sold worldwide through a network of Authorized Stocking Distributors. Trained Sales and Customer Service Representatives, located at our headquarters and throughout the world, insure fast personal service.

Contact us for your nearest stocking distributor or sales representative.

Visit our website for up-to-date information on products, accessories, parts, warranty and repair service.

Heat Technology

FACTS ABOUT HEAT

Applied heat technology is the basis of all Master Appliance products. Definitions of some of the basic principles of heat follow:

Heat is the form of kinetic energy which causes a rise in temperature in a body as it is absorbed or a reduction in temperature as it is lost to the environment.

Temperature differential is the driving force of heat energy. The greater the temperature differential between two objects, the greater the flow of heat energy from the higher-temperature object to the cooler object.

BTU's (British Thermal Units) or calories are the units used to measure heat energy. One BTU is equivalent to 252 calories.

Thermal conductivity is the property of a material related to is ability to transfer heat through itself. The higher the thermal conductivity of a material, the greater the heat transfer rate. In general, metals have higher thermal conductivities than insulators. Copper and aluminum have higher thermal conductivities than steel, while steel has a higher thermal conductivity than wood or plastics.

The heat transfer rate is the quantity of heat energy flowing per unit of time through an object. It can be measured in BTU's per minute or by calories per second flowing through a specified area of the object.

COMMON MODES OF HEAT TRANSFER

- Convection employing a heated fluid such as air to convey heat from the source to the object being heated. Master Heat guns are an example of applied convection.
- Conduction heat transfer within an object. Ultratorches, in the soldering mode, are an example of applied conduction.
- Radiation heat transfer employing electromagnetic waves similar to light or radio wave. This method does not require the presence of solids, liquids, or pases to transmit heat energy. The sun is the best example of radiant heat.

Convection Heat/Hot Air

Most Master heat tools use the convection principle to provide hot air for many different applications and processes.

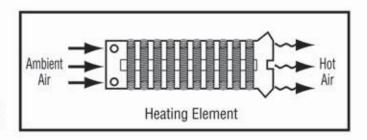

Hot air is particularly well suited for use in a wide variety of applications and processes throughout industry.

The appropriate Master heat tool is selected depending on the airflow and temperature characteristics needed to do the job. Temperature is controlled by selecting a proper model or by using one of our variable temperature units. Air flow is determined by the unit selected, its outlet configuration and by the use of specially designed attachments if required.

How Master Heat Tools Work

Air is forced through (or over) an electric heating element. In the process, heat energy is transferred from the heating element to the air.

Most Master heat tools use a self-contained motor-driven fan to supply the air which is then passed over an electric heating element.

Temperature Conversion Formulas °C = 5/9 (°F -32) °F = 9/5 (°C +32)

Master Heat® Tool Applications

Professional quality heat tools for Industry

Master Heat Tools

Heat has many industrial applications. The proper use of the right heat technology and the right product are necessary to achieve optimum results in each application.

Master is continually developing new products and techniques to meet the demands of new applications. Master heat guns are designed and constructed to provide our customers with dependable, cost-effective ways to apply heat properly for specific jobs.

As a leader with over fifty years of experience in the industry, the Master Appliance name assures its customers of an uncommon expertise in heat technology, quality products and unsurpassed service.

Our original heat gun met the heating needs of the maintenance, repair, operation and production applications of its time. Today's Master heat tools are designed with expanded capabilities which make it easy to work with the growing range of new materials and processes being developed by industry.

Master heat tools are used for drying, heating, welding, shrinking, soldering and de-soldering as well as a variety of other applications. Wherever heat is the need, Master has the answer.

Because each application is unique, the Master heat tool line offers options such as varying temperatures and air flow, a choice of nozzle configurations, attachments and voltage/plug combinations to meet your needs.

The introduction of new plastics, adhesives and other materials is a continuous process. The range of options and attachments offered by Master heat tools enables you to use the newest materials and techniques while relying on the traditional Master quality and durability.

Master is always here to help. When you're considering a new application, material or process, call Master Appliance for professional, efficient and courteous assistance.

Applications/Processes

Master heat tools are being used for hundreds of applications and processes throughout industry including:

- Activate adhesives and potting compounds
- Bend and form plastics and plastic laminates
- Cure and set adhesives
- Defrost freezers and frozen coils
- Dry body filler
- Dry conformal coatings on circuit boards
- Dry parts
- Expand metals
- General heating and drying applications
- Desolder backs of printed circuit boards to thru-hole components
- PVC bending
- Preheat flux
- Remove dents in fiberglass and other materials
- Remove pin striping
- Remove/install plastic autobody panels
- Remove windshield caulking
- Shrink and terminate environmental splices
- Shrink and terminate heat-shrinkable insulated solder preforms
- Shrink heat-shrinkable anti-static film
- Shrink heat-shrinkable molded parts
- Shrink heavy gauge shrink packaging
- Shrink heavy wall and adhesive-lined tubings
- Smooth vinyl tops
- Solder and desolder
- Spot dry paint
- Stretch vinyls
- Strip paint
- Vinyl repair

New applications and processes which require heat are discovered everyday. Users should independently evaluate the suitability of the product for their application.

As with all electrical and butane-powered tools, for your safety, read the instruction manual before using.

Product specifications are subject to change without notice.
