

Adafruit Bone Box - Enclosure for Beagle Bone/Beagle Bone Black -

ID: 699

Description

Pack up your **Beagle Bone** or **Beagle Bone Black** in this lovely clear plastic case. We designed this case to be the ideal enclosure, with plenty of elegant details to make it useful to you!

New! As May 2 we are shipping an enclosure that will fit both the original Beagle Bone and has a slot for the HDMI port of a Beagle Bone Black.

The enclosure comes as 6 laser cut acrylic pieces, 4 plastic standoffs, 8 hex-nuts and 8 1/2" 4-40 screws. Assembly is easy, and requires only a Phillips screwdriver. Once assembled, the box has lovely engraved ends with cut-outs for the DC power, Ethernet, microSD card, USB host and USB debug ports. The ends are even bone shaped - they act as a bumper to keep the attachment screws from scratching your desk.

There's plenty of space inside to add on **one of our Beagle Bone Proto Capes with components or connectors soldered on**. Fits any **Beagle Bone** version out there - but not BeagleBoards!

It's easy to put together, check out our quick tutorial

Technical Details
