

GSM COMMUNICATOR Speech & Text Dialler GJD710

The **GJD710** GSM Speech and Text Communicator provides a simple yet effective solution to all your security equipment notification needs.

Once triggered the GSM Speech and Text Communicator automatically sends a voice or text message to one of 9 designated, pre-programmed telephone numbers providing a fast and reliable warning, thus ensuring total peace of mind.

6 inputs allow connection to intruder detection alarm panels, nurse call devices, gas and flood sensors, etc.

The additional 4 outputs can be linked to other associated equipment – strobe, siren or sounder.

Features:

- 9 programmable dial-out numbers for each trigger
- Programmable voice messages or SMS sent to some or all phone numbers on trigger
- Trigger inputs can be programmable as instant or “double knock” (2 activations needed within 60 seconds)
- Programmable dial-out/SMS delay after trigger
- Programmable trigger “runaway” prevention – ability to limit number of dial-outs/SMS’s to 50 in any 24 hours
- Removable antenna allows remote antenna connection to optimise GSM reception
- Built-in microphone
- Built-in “listen in” – open up trigger or via dial in
- “Pay as you go” SIM low credit indication*
- Battery back-up
- Dialler outputs can be programmed as user-activated only or user-activated + trigger/event follow activated
- Outputs can be programmed as toggle latching on/off or momentary
- Users can activate outputs remotely via dial-in
- Network provider field strength indicator
- Back-lit LCD shows text in any of 8 languages
- Programmable as either a silent (dial-out only) or audible alarm

*network dependable
