

Battery Powered LCD Peep Hole Viewer with 2.7" High Resolution LCD Screen and Wide Angle Lens (Model: DOOR-I)

The DOOR-I is an easy to fit, Video Door Entry System and works the same way a peephole does but displays the image in full colour and high resolution on to a 2.7" LCD screen.

The DOOR-I is equipped with a recording function to save visitor's photos when the power button is on using a Micro SD card (maximum of 32GB).

It has a brightness enhancement function which increases the image brightness in a low light environment and includes a wide angle lens of 90°.

Camera - Front

Camera - Side

Camera - Rear

Specifications
