

WL-700N-XSX

802.11n 300Mbps Nano Wireless USB adapter

Class-leading 300Mbps performance. In nano scale.

Why compromise on having only 150Mbps Wireless connectivity in your ultra-compact Wireless USB device when you can have full, 300Mbps Wireless technology, but still enjoy a 'nano-style' form factor for your mobile Computer.

The new Dynamode **WL-700N-XSX** is an ultra-compact 'Nano' sized full 300Mbps WiFi compatible device using 2T2R transmit technology to help give a sustained, fully 802.11n compatible device with full backward 802.11n 150Mbps performance, plus even older 802.11g legacy devices if necessary.

Ideal as a permanent connection for your Notebook for example, the **WL-700N-XSX** is compact enough in that it can be left connected even when put back into its carry-case. Other advanced features include a soft access point (AP) mode, QoS (quality of service) for a better multimedia and gaming experience and of course low-power consumption thanks to the latest WiFi signal processor.

Further product details available from www.dynamode.com
