TEK-BEAGLE: Beagleboard-xM Case

TEKO know-how in standard enclosures comes into play with the launch of our new "TEK-BEAGLE" case which is specifically designed for housing the "Beagleboard-xM (Rev. C) card. Following the great success of TEK-BERRY - our innovative Raspberry PI housing - we are very pleased to present the new TEK-BEAGLE.

TECHNICAL SPECIFICATIONS

Flame retardant material Bayblend (ABS + PC) – Flame class VO - provides excellent mechanical strength even when exposed to high temperatures. Fast and secure assembly by 4 self-tapping screws in the base. Internal fixing studs for an easy and intuitive assembly of the "Beagleboard-xM".

DESIGN

The new "TEK-BEAGLE" case has a fresh and innovative design that is stylish, tactile and modern. The design is complemented by many technical features which are aimed at enhancing the performance of the embedded Mini-PC.

Base

Aeration slots are moulded into the base section to provide proper airflow and help to prevent overheated components. The sides of the case protrude to protect the connectors.

Supply includes 4 transparent non-slip feet that cover the assembly screws. The case is available in transparent, light grey or black.

Model	Colour	L	W	H
TEK-BEAGLE.0	Transparent	103mm	103mm	28mm
TEK-BEAGLE.40	Light Grey	103mm	103mm	28mm
TEK-BEAGLE.9	Black	103mm	103mm	28mm

Custom colours available on demand, MOQ = 500 pcs.
