Continue to get value from your existing development and process control system. The COM port based driver means that the Ethernet to DIO devices are completely compatible with all popular packages such as LabView, MATLAB and Agilent VEE and support a range of popular APIs.

Slim Shape:
Small foot print for when DIN rail space is a premium
Only 22.6mm wide

Extended Temperature Range:
-30ºC to +80ºC operating range copes with changing temperatures for harsh environments. Monitor CPU temperature via the web interface or programmatically using ASCII commands.

Brainboxes' Easy Wire Feature:
Removable screw terminal blocks make installation easier and quicker
Colour coded blocks and ports prevents incorrect connection
Numbered Pins simplifies wiring and removes confusion

Grounding:
Correctly wired grounds help cut down on electromagnetic interference
5 pin terminals allow a ground on the 5th pin of each block
Functional earth connection to the DIN rail

Gateway RS485 Serial Port:
Half duplex RS485 port allows connection and control of industry standard
NuDAM, eDAM and ADAM modules modules using ASCII protocols.

Wide Range Redundant Dual Power Input:
+5VDC to +30VDC accommodates variation in the +24VDC factory floor
and allows alternative power sources. A second power supply can be fitted
as a back-up to prevent down time should one power source fail.

Can use 5 Volt power from any computer USB port via optional accessory
cable PW-650 - Useful for configuring the device from a laptop in the field.

Watchdog feature:
Allows independent known good states to be set for power up, comms link
watchdog and hardware watchdog. Programmable time range allows full
control.

Signed Drivers and Rigorous testing:
We use continuous automated testing of our in-house drivers and software
to ensure when you install one of our devices 'it just works'. Our software
allows hassle free installation, configuration and monitoring via our easy
to use webpage. The software gives local COM ports that are backwards
compatible enabling legacy applications and the device to work with a
myriad of different 3rd party software. We make all our software versions
available to download from our website.

Lifetime Warranty and Support:
We can help with every aspect of your project, from getting you up and
running to custom application.

Software Development

COM Port on Windows

On a PC running the Microsoft Windows family of OS's the ED Boost.IO Manager provides a standard COM port interface so enabling thousands of proven legacy applications to work straight out of the box. COM port compatibility allows you to continue to get value from your existing application software investment. Moreover your engineers don't need to retrain to use the Brainboxes ED range of I/O devices.

Industry Standard Packages

The COM port based driver means that ED-xxx devices are completely compatible with all popular packages such as: LabView, MATLAB, Agilent VEE. You can continue to get value from your existing development and process control system. Hundreds of thousands program with these packages every day.

Software Platforms

The future is mobile, with data available everywhere on demand; Brainboxes has designed a software suite which allows you to design your new systems with mobile in mind with most popular platforms and development environments supported. With APIs and sample program code for: Microsoft .NET, C#, Visual Basic, C++, JavaScript, PHP, Java, Objective-C

Devices Supported

The ED sample codes running on Operating Systems such as Windows XP, Server 2008, Server 2012, Windows 7, Windows 8, and Linux based systems such as Android and Raspberry Pi allow you to run your applications on Servers, Desktops, Laptops, Tablets, Phones or low cost embedded devices, almost any device you wish.
